COLLEGE of AMERICAN PATHOLOGISTS

Laboratory Quality Solutions

2020 Surveys and Anatomic Pathology Education Programs

PERFORMANCE YOU CAN MEASURE. ACCURACY YOU CAN TRUST.

Together, we move forward to achieve better patient care.

Laboratory medicine is forever changing—more rapidly than ever before. Our comprehensive range of laboratory quality solutions constantly evolves to keep in step with these changes, enabling you more time for what matters most—accuracy in the laboratory.

Year over year the CAP innovates, drawing on the collective knowledge of thousands of experts in laboratory medicine to help laboratories navigate the changes they face. Much of this innovation comes from integrated solutions that include accreditation and proficiency testing (PT). Leveraging this knowledge helps you stay ahead of new technologies, changing testing requirements, and emerging diseases that contribute to the rapid evolution of clinical laboratory medicine.

CAP PT programs give you confidence in your results by allowing you to compare your performance against the largest peer groups. And our accreditation peer inspection model allows participants to develop meaningful connections and share best practices.

The CAP strives to improve every aspect of PT and accreditation, including:

- Expanding our broad range of PT with new testing programs—39 new Surveys in 2019 and 2020 for microbiology, anatomic pathology, molecular pathology, and many other disciplines
- Annually updating our 21 discipline-specific accreditation checklists—simplifying the compliance process and providing a roadmap for running a high-quality laboratory

And we are never done moving forward. The CAP continues to innovate and improve our laboratory quality solutions, providing better ways to serve you. After all, achieving the highest quality service and best patient care possible is the primary goal for all of us.

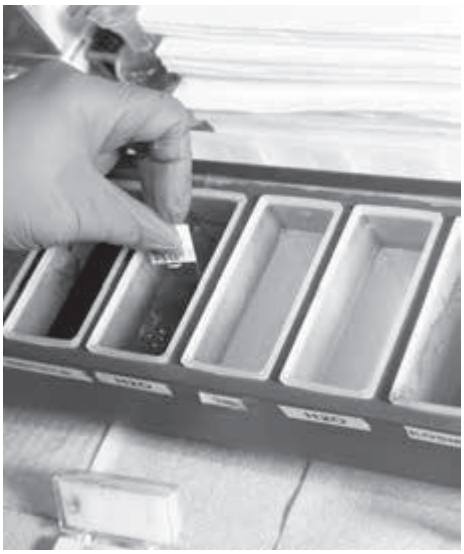
23 Program Code Page Index 345–348

Insight at a glance.

In just seconds, the CAP's Performance Analytics Dashboard provides valuable insights into your laboratory's performance, letting you proactively focus energy on areas that need immediate attention while filtering out distractions. Updated daily, this complimentary proficiency testing and CAP accreditation performance monitoring tool reduces the stress of managing today's laboratory by giving you fast access to a single laboratory's or an expansive network's performance.

To view a demo, search Performance Analytics Dashboard at cap.org.

1 New Developments



Immunohistochemistry (IHC) testing is changing at a rapid pace—so is our proficiency testing.

- Evaluate your laboratory's preanalytic processing steps for tissue and slide preparation of melanoma (HQMEL) and gliomas (HQNEU).
- Assess analytic and interpretive steps of IHC testing for the biomarkers c-Myc and Bcl-2 (MYBC).
- Test both pre- and postanalytic steps for IHC of dermatopathology markers (DPIHC).

New Developments

Quality Management Tools			
Subsection	**Name**	**Program Code**	**Page**
Q-PROBES™	Technical Competency Assessment of Peripheral Blood Smears	QP201	25
Q-PROBES	Red Blood Cell Utilization: Single and Double Unit Transfusions	QP202	26

2 Continuing Education

Simplify your record keeping with Competency Assessment Program.

Be ready for your next inspection:

- Use checklists and courses to document specific actions and dates.
- Meet deadlines with automated scheduled reminders.
- Upload supporting documentation for complete, organized records.
- Offer staff 80+ CE credits from included Competency Assessment courses.

Continuing Education

Continuing Education Programs 8
Competency Assessment Program 15
QM*Ed*™ Online Educational Courses 18

Continuing Education Programs

Your laboratory demonstrates its commitment to quality by choosing CAP Surveys programs. You'll find the same level of quality in the CAP Continuing Education Programs.

CME (Continuing Medical Education for Physicians)

Accreditation

The College of American Pathologists (CAP) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

CME Category 1

The CAP designates these enduring materials educational activities for a maximum of the stated number of *AMA PRA Category 1 Credits*™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Note to CME participants of enduring* materials courses:

An AMA requirement mandates that all physicians wishing to claim CME credits must pass a scored assessment. All CAP enduring materials CME courses require participants to pass a scored assessment prior to claiming credit.

*Enduring courses are those courses that endure over time, such as print or online courses.

CE (Continuing Education for Nonphysicians)

The CAP designates these educational activities for a maximum of the stated number of credits of continuing education. Participants should claim only the credit commensurate with the extent of their participation in the activity.

The American Society for Clinical Pathology (ASCP) Board of Certification (BOC) Certification Maintenance Program (CMP) accepts these activities to meet its continuing education requirements. The states of California and Florida also approve these activities for continuing education credit.

Cytotechnologists may apply the credits from the PAP Education (PAPCE/PAPJE/PAPKE/PAPLE/PAPME), NGC, FNAG, FNA, and TICP programs toward the required educational activities for the American Society of Cytopathology (ASC) Continuing Education Credit Program (CECC) and the International Academy of Cytology (IAC).

This activity is eligible for continuing medical education (CME) credit or continuing education (CE) credit.

Surveys Continuing Education Activities

When your laboratory participates in CAP Surveys, every member of your team can enroll in education activities and earn continuing education (CE) credit at no additional charge. Simply follow these steps:

1. Establish a free Web account.
2. Complete a reading provided in the Participant Summary or Final Critique.
3. Answer online learning assessment questions.
4. Claim CE certificate.

Each member of your staff can access the Surveys education activities for a maximum of 12 months.

Surveys Educational Activities

Program Name	Program Code	Discipline	Catalog Page(s)
General Chemistry and Therapeutic Drugs	C1, C3/C3X, C4, C7, CZ/CZX/CZ2X, Z	Chemistry	56-58
Quality Cross Check—Whole Blood Glucose	WBGQ	Chemistry	41
Endocrinology	Y, YY, DY, BGS, BU, EPO, ING, RAP	Chemistry	84-86, 88-89
Blood Gas	AQ, AQ2, AQ3, AQ4	Chemistry	92
Coagulation—Limited	CGB, CGL, CGDF	Coagulation	160
Cytogenetics	CY, CYBK	Cytogenetics	242

Ticks, Mites, and Other Arthropods	TMO	Participant Summary	194
Worm Identification	WID	Participant Summary	194

*Notes:

- CAP Self-Reported Training Opportunities do not offer CE credit, but can be used toward fulfilling requirements for certification maintenance by agencies such as the American Society for Clinical Pathology (ASCP). Please verify with your certifying agency to determine your education requirements.
- These opportunities are subject to change. Refer to the Participant Summary/Final Critique for availability.

Continuing Certification (CC)

Continuing Certification (CC), formerly known as Maintenance of Certification (MOC), is the board certification program that involves continuous professional development and ensures that an American Board of Pathology (ABP) board-certified pathologist is committed to lifelong learning and competency in a specialty and/or subspecialty.

There are six competency categories defined by the American Board of Medical Specialties (ABMS) and endorsed by the ABP to fulfill specific CC requirements. They are listed below with their descriptions.

All CAP education activities providing CME credits meet the CC Part II: Lifelong Learning requirements. Some programs will meet the requirements for Self-Assessment Module (SAM) and/or CC Part IV at the laboratory or the individual levels. Programs that meet Part IV are identified within the description of the program. Visit the CAP website for the current list of programs that meet the requirements for CC Part II and Part IV.

Interpersonal and Communication Skills
Demonstrate interpersonal and communication skills that result in effective information exchange and teaming with patients, patients' families, and professional associates.

Medical Knowledge
Demonstrate knowledge of established and evolving biomedical, clinical, and cognate sciences and the application of this knowledge to pathology.

Practice-Based Learning and Improvement
Demonstrate ability to investigate and evaluate diagnostic and laboratory practices in your own laboratory, appraise and assimilate scientific evidence, and improve laboratory practices and patient care.

Patient Care
Demonstrate a satisfactory level of diagnostic competence and provide appropriate and effective consultation in the context of pathology services.

Professionalism
Demonstrate a commitment to carrying out professional responsibilities, adherence to ethical principles, and sensitivity to diverse patient population.

Systems-Based Practice
Demonstrate understanding of and contribution to local, regional, and national health care systems, and support health care in systems-based practice definition.

Self Assessment Module: This activity fulfills the SAM credit requirements for CC and is therefore eligible for SAM credit. Participants who successfully complete an online assessment may apply their earned credit(s) to the ABP's SAM requirements.

Note to CME/CE participants: **The AMA mandates that all education providers (such as the CAP) require participants pass assessment questions in an enduring* program in order to earn and claim CME credits. All participants in any activity granting CME/CE will be required to complete and pass assessment questions before claiming their credits.**

For CME/SAM activities ONLY: Participants have a total of three opportunities to take and pass the post-test, with feedback provided after each question. The AMA requires that participants pass the post-test in an enduring program to claim credit; therefore, if they do not pass, they cannot claim credit.

**Enduring programs are those courses that endure over time such as print or online courses.*

System Requirements

DigitalScope is a Web-based whole slide image (WSI) retrieval and viewing system. DigitalScope is supported with Microsoft Internet Explorer 11.0 (limited support for IE 9 and 10) or later, Firefox 4.0 or later, Safari 3, and the latest Google Chrome version.

For the most up-to-date information on system requirements, go to cap.org and select CONTACT & SUPPORT. The download speed and the appearance of the activity will vary depending on the type and speed of your Internet connection, computer's power, and browser.

Clinical Pathology Improvement Programs (CPIP/CPIP1)

CPIP supports pathologists who principally practice clinical pathology as well as those who primarily practice anatomic pathology but cover clinical pathology. A diverse portfolio of real-life case scenarios, including images and clinical background, helps pathologists to stay abreast of issues and advances in the lab.

Designed for pathologists, by pathologists. Each case is developed and peer-reviewed ensuring what you learn is practical and easily applied to your work. Thought provoking questions with feedback and a multiple-choice post-test allow you to assess and confirm your diagnostic skills. Participants who earn a passing score on the post-test may apply their earned credits to the ABP's CC requirements.

Clinical Pathology Improvement Program CPIP/CPIP1

Program Name	Program Code	Cases/Year
	CPIP/CPIP1	
Online cases in clinical pathology	▮	12 (One per month. See below.)

Additional Information

Consider the CPIP program if you are a:

- Medical director seeking to continuously improve the clinical pathology knowledge and collective skills of your pathology team.
- Pathologist with clinical and/or laboratory management responsibilities.
- Pathologist seeking CME/SAM or CC credits in clinical pathology.
- Subspecialty clinical pathologist who needs to keep current.

To learn more visit www.cap.org and search CPIP.

Discipline	Case Schedule (subject to change)	Month 2020
Lab Management	How to retire a test	January
Toxicology	Non-cancer pain management	February
Hematology	Molecular approach to myeloid neoplasms	March
Chemistry	Growth hormone testing	April
Transfusion Medicine	Blood bank education for clinical staff	May
Hematology	Neutrophilia	June
Microbiology	Automation in clinical microbiology	July
Transfusion Medicine	Utilization of platelets and plasma	August
Hematology	Flow/lymphocytosis	September
Molecular Pathology	Cell-free and/or circulating tumor cell DNA testing for solid tumors	October
Chemistry	Adrenal function testing	November
Lab Management	Physician wellness	December

Program Information

- CPIP - One online clinical laboratory case per month
- CPIP1 - Reporting option with CME/SAM credit for each additional pathologist (within the same institution); must order in conjunction with CPIP
- Earn a maximum of 15 CME/SAM credits *(AMA PRA Category 1 Credits™)* per year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Twelve cases per year; your CAP shipping contact will be notified via email when the activity is available

Competency Assessment Program

About one of every four laboratories is cited for a deficiency related to its competency assessment records. You can avoid becoming a part of this statistic.

Competency Assessment Program

The CAP's Competency Assessment Program helps keep you in compliance by managing your personnel's competency assessment performance and records. Use the CAP's Competency Assessment Program to track compliance to all six of the elements of competency assessment as defined by CLIA. Customizable to fit your specific laboratory's procedures, Competency Assessment Program offers benefits that simplify your documentation process.

- **Be organized.** Stay on top of your documentation and records with easy-to-use management reports, employee progress tracking, and individual employee transcripts so your laboratory is inspection-ready at all times.
- **Obtain real-time results.** Generate management reports with just a few clicks.
- **Strengthen your learning.** The program comes ready with multiple relevant, applicable courses already loaded, and new courses are added every six months.
- **Customize training to your needs.** If the wide selection of ready-made training courses (Pro Courses) doesn't meet your needs, customize them. You can match courses to your laboratory's exact standard procedures.
- **Save time.** Tools like ChecklistBuilder, CourseBuilder, and Competency Profiles allow your administrators easy, convenient methods to document all six areas of competency as defined by CLIA and the CAP Laboratory Accreditation Program.
- **Access anywhere.** The Competency Assessment Program is cloud based, so it's available 24/7 from any PC, laptop, or tablet—wherever you have an Internet connection. Courses are available for users throughout the subscription period.
- **Stay focused.** Use instrument-specific checklists for assessing competency and training.
- **Remain in compliance.** Many of the ready-made educational courses provide your staff the opportunity to earn CE credits.

Add Safety & Compliance Courses Especially Developed for the Laboratory

As an add-on option, Competency Assessment Program offers a package of seven non-credit, complementary safety and compliance courses—appropriate for annual laboratory-specific compliance training and for clinical laboratory science students prior to clinical rotations. These courses include:

- OSHA Bloodborne Pathogens
- OSHA Hazard Communication and Chemical Hygiene
- OSHA Electrical Safety
- OSHA Fire Safety
- OSHA Formaldehyde
- Tuberculosis Awareness for Health Care Workers
- Medical Error Prevention: Patient Safety

The CAP updates these courses as necessary to reflect changes in regulations or best practices.

With the Competency Assessment Program, you can keep your laboratory organized and inspection-ready every day of the year. Choose the Competency Assessment Program subscription that fits your lab. Please refer to the ordering information and course descriptions on the following pages. For more information, visit cap.org and choose Laboratory Professionals Learning Programs via the Learning tab.

Number of Users	Competency Assessment Program	Competency Assessment Program with Optional Safety & Compliance Courses**
1	CA0001	CA0001 + XCA0001
2 to 50	CA0050	CA0050 + XCA0050
51 to 250*	CA0250	CA0250 + XCA0250

*For subscriptions for more than 250 users, please contact the CAP for more information.
**Safety & Compliance Course subscriptions require a standard Competency Assessment Program subscription.

Assessment Course Schedule

Discipline	January 2020 Release	July 2020 Release
Blood Banking/Transfusion Medicine—Generalist	Direct antiglobulin test	ABO typing discrepancies
Blood Banking/Transfusion Medicine—Specialist	Direct antiglobulin test	ABO typing discrepancies
Chemistry	Clinical toxicology	Electrolytes, acid base, and anion gap
Hematology and Coagulation	Erythrocyte morphology	White blood cell inclusions
Histology	Immunohistochemistry—part 2	Histology specimen handling
Immunology	Monitoring the testing process in immunology	Human chorionic gonadotropin and fetal fibronectin
Microbiology—Generalist	Genital tract pathogens	The microbiology of wounds
Microbiology—Specialist	Genital tract pathogens	The microbiology of wounds
Phlebotomy/Specimen Processing	Professionalism and ethics	Venipuncture
Point-of-Care Testing	Provider-performed microscopy and limited waived testing	Urine dipstick
Quality Programs/Management	Document control	New instrument method validation
Safety	Hazardous chemicals	Laboratory waste and spill management
Urinalysis/Body fluids	Microscopic urinalysis part 2—crystals and casts	Serous and synovial fluids

Pro Course Schedule

Discipline	January 2020 Release	July 2020 Release
Blood Banking/Transfusion Medicine	Blood components—storage, handling, and selection	Quality control in the blood bank laboratory
Chemistry	Cardiac biomarkers	Therapeutic drug monitoring
Hematology and Coagulation	Erythrocyte inclusions	White blood cells
Histology	Quality management in histology	Immunohistochemistry—part 1
Immunology	Hepatitis testing	Rapid serology kit tests
Microbiology	Blood cultures	Microbiology of the gastrointestinal tract
Phlebotomy/Specimen Processing	Common pitfalls in specimen processing	General specimen handling and transportation requirements
Point-of-Care Testing	Whole blood glucose testing	Blood gas testing
Quality Programs/Management	Investigating occurrences (occurrence reports, root cause analysis, corrective action)	Development and implementation of a quality management program
Safety	Bloodborne pathogens	General laboratory safety
Urinalysis/Body Fluids	Physical and chemical urinalysis	Microscopic urinalysis—part 1

Safety & Compliance Courses

OSHA Bloodborne Pathogens. Addresses the OSHA Bloodborne Pathogens standard as it applies to clinical and medical laboratories. Covers major bloodborne pathogens, including hepatitis B and HIV. Focuses on proper handling of sharps, personal protective equipment (PPE), engineering controls such as microbiological safety cabinets, and proper work practices like handwashing.

OSHA Hazard Communication and Chemical Hygiene. Describes the OSHA Chemical Hygiene Standard and helps satisfy OSHA requirements for annual training. Explains Haz-Com, the National Fire Protection Agency diamond, the Safety Data Sheet, and common-sense laboratory safety rules applied to clinical laboratory practice.

OSHA Electrical Safety. Addresses electrical safety and electrical hazards commonly found in the clinical laboratory. Covers prevention and safety measures, fighting electrical fires, and treatment of electrical injuries.

OSHA Fire Safety. Teaches the basics of fire safety in the clinical laboratory, including classes of fire and key acronyms, such as PASS and RACE. Addresses fire prevention, drills, and firefighting techniques.

OSHA Formaldehyde. Covers essentials for any laboratory that uses formaldehyde or formalin. Shares facts about formaldehyde, safety risks, proper handling procedure, monitoring, spill clean-up, and personal protective equipment.

Tuberculosis Awareness for Health Care Workers. Provides background information about spread of tuberculosis, purified protein derivative (PPD) testing procedures, CDC guidelines, and methods of control.

Medical Error Prevention: Patient Safety. Includes potential causes of medical errors in the clinical laboratory, important legislation and definitions, and steps laboratory professionals can take to reduce the impact of medical errors in their workplace. Serves as an ideal part of an effective medical error reduction program. Appropriate for both experienced and newer laboratory personnel.

Note: The Safety & Compliance courses are not available for purchase separately. The courses listed above do not offer CE credit.

Enhance the culture of patient safety in your laboratory.

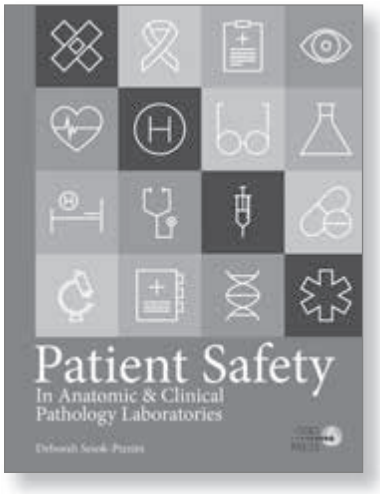
Connect the patient safety culture in your laboratory to the overall mission and goals of your health care enterprise.

- Prevent errors in communication, handoffs, and transitions
- Use technology to improve laboratory patient safety
- Learn how cognitive bias can contribute to patient safety errors
- Build high-reliability teams
- Engage the patient navigator to address safety issues through continuity and coordination of care
- Develop and implement a patient safety curriculum for the laboratory
- Understand how accreditation milestones advance patient safety initiatives

Add Patient Safety In Anatomic & Clinical Pathology Laboratories (PUB316) to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: PUB316
Softcover; 128 pages; 2017

QM*Ed*™ Online Educational Courses

Tailored education and quality tools developed with pathologist input

Quality Management Educational Resources (QM*Ed*) courses will help you:

- Build a quality management system (QMS) – one piece at a time – that sustains your continuous improvement and Lean efforts.
- Improve your processes and eliminate waste
- Self-assess your current QMS against international quality standards
- Interpret ISO 15189 requirements
- Improve your document control system
- Perform internal audits using tracer audit and process audit methods
- Implement and refine occurrence management with root cause analysis
- Measure, analyze, and set goals with senior management

Program information

- Courses are delivered online via a highly interactive user interface that allows you to learn at your own pace.
- Courses are licensed for one year, allow sharing of logins, and include continuing education (CE) credit.

About the Courses

Quality Culture
Order ISOEDCL

Designed for laboratory medical directors, administrative directors, quality managers, and other leaders who can affect the culture of their laboratory through their decisions and actions. The course provides an adaptable program for proactively shaping culture. It includes video commentary by CAP member pathologists. Includes a unique Culture Assessment Tool that helps laboratory leadership get a picture of where your organization needs to improve and where it is strong. This tool helps make culture change a reality.

4 CE credits available

Root Cause Analysis
Order ISOEDRC

Learn real-world methodology to conduct a root cause analysis, along with the tools necessary to implement it. Learn from actual examples of complete root cause analysis based on projects in laboratories like yours. You will even perform key steps based on a participant case study. Includes the RCA Performance and Feedback Toolkit, a set of tools an organization can use to guide and assess root cause analysis projects. The course is designed for laboratory quality managers and implementation team members.

6 CE credits available

Mistake Proofing
Order ISOEDMP

Increase your ability to design new processes, modify existing processes, minimize mistakes, and manage your risks. This course provides a methodology focused on five main categories of mistake-proofing tactics and shows examples of these tactics from the domain of laboratory medicine. It includes video commentary by CAP member pathologists with experience using Lean and other process improvement techniques.

4 CE credits available

Internal Auditing
Order ISOEDIA

Increase your capabilities for internal auditing with a proven methodology for process audits, tracer audits, and laser audits. Learn how to prepare for interviews, communicate findings to your quality management team, and use audits to drive process improvements. The course provides detailed, real-world examples you can use to build your own audit plans, plus multimedia presentations of key concepts.

3 CE credits available

Management Review
Order ISOEDMR

This course interprets the ISO 15189 requirements for management review. The CAP's ISO 15189 assessors discuss how to structure the review meeting, communicate results of quality assessments, and prompt strategic decisions from management—all in the context of the overall health of your organization.

2 CE credits available

Quality Manual Development
Order ISOEDQM

This course provides guidance on how to go beyond a quality plan to develop a manual that organizes and communicates your laboratory's quality management system. You will see an example of an effectively structured and written manual so you can organize and create your own. Plus, the CAP's ISO 15189 assessors show you approaches to link your quality policy to quality objectives and metrics.

2 CE credits available

Document Control
Order ISOEDDC

This "how-to" course on document control systems details how to control documents in a way that meets ISO 15189 requirements, how to accomplish document control even with minimal resources (such as spreadsheets), and how document control contributes to cost containment. Audio recordings of the CAP's ISO 15189 assessors provide examples and commentary on common pitfalls and issues.

2 CE credits available

QMS Implementation Roadmap
Order ISOEDRM

Outlines the practical steps necessary to build, implement, and maintain a quality management system that meets the ISO 15189 standard. Video recordings of the CAP's ISO 15189 assessors provide perspective on best practices and pitfalls. Designed for laboratory quality managers, plus your implementation team members.

2 CE credits available

15189 Walkthrough
Order ISOEDWT

Designed for laboratory quality managers (along with your medical and administrative decision makers) considering implementation of an ISO 15189 program. Summarizes each section of the standard, while clarifying its intent and key requirements. See video recordings of the CAP's ISO 15189 assessors who offer context and examples of how technical problems relate to more fundamental deficiencies in the quality management system.

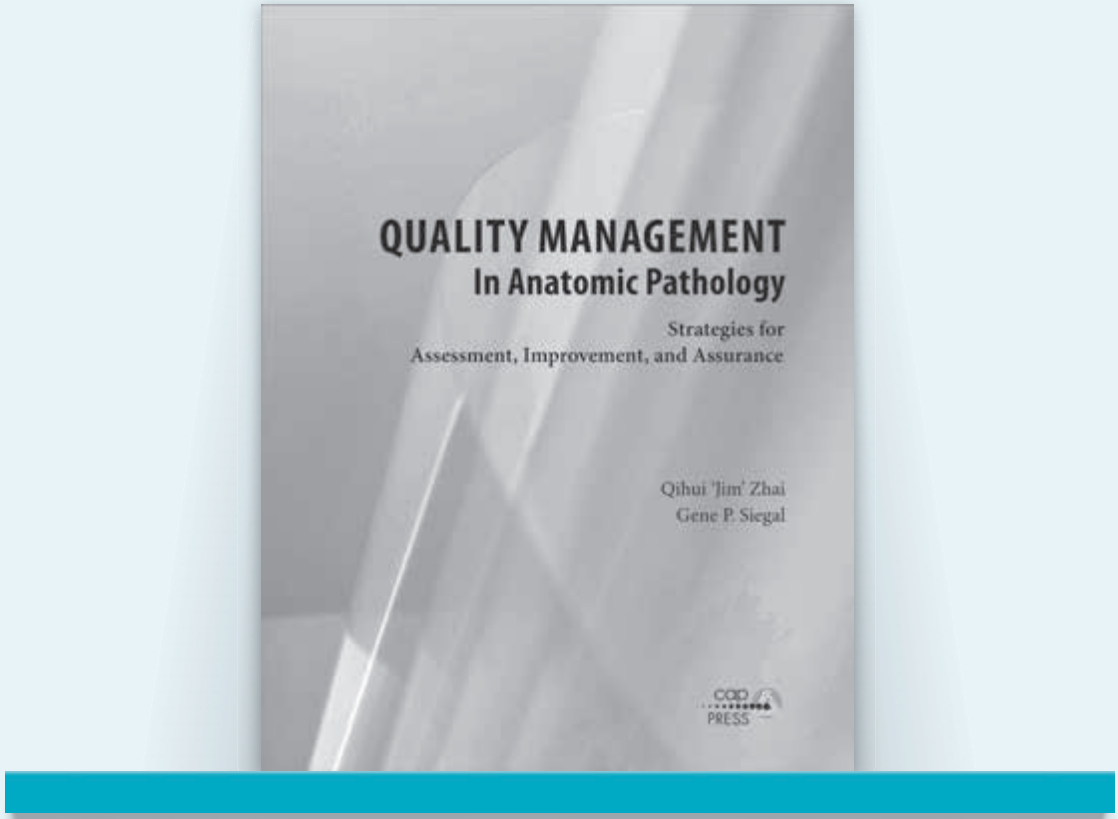
2 CE credits available

Make sure your laboratory team is ready to meet the challenges ahead. Add QM*Ed* courses to your order form.

Use code ISOEDAL to add the entire series for a 25% discount.

For more information, visit cap.org and search QM*Ed*.

How current is your laboratory quality management plan?



Created specifically for the needs of the anatomic pathology laboratory, this comprehensive manual can help you develop, implement, and maintain a comprehensive quality program. Learn valuable tips for designing your own laboratory quality plan that documents regulatory compliance. Text includes cross-references to the CAP's Laboratory Accreditation Program checklists, Joint Commission standards, and CLIA '88.

Quality Management In Anatomic Pathology

Item number: **PUB125**

Softcover; 228 pages; 135+ figures and tables; 2017

Ebooks at **ebooks.cap.org**

3 Quality Management Tools

Engage in quality measures with the latest Q-PROBES™ programs.

- Assess technologist's competency of peripheral blood smears using online whole slide images (QP201).
- Audit your transfusion practices for appropriate use of blood products by assessing single versus double RBC unit transfusions (QP202).
- Benchmark your core laboratory test volume to support your test utilization initiatives (QP203).
- Benchmark your turnaround time for image-guided breast needle biopsy specimens (QP204).

Quality Management Tools

Q-PROBES™ 24
Q-TRACKS® 29
Clinical Pathology Monitors 31
Anatomic Pathology Monitor 37

New Programs NEW

Technical Competency Assessment of Peripheral Blood Smears (QP201) 25
Red Blood Cell Utilization: Single and Double Unit Transfusions (QP202) 26
Inpatient Test Utilization and Volume Benchmarking (QP203) 27
Turnaround Time for Image–Guided Breast Needle Biopsy Specimens (QP204) 28

Discontinued Programs

Technical Staffing Ratios (QP191)
Opioid Drug Testing Stewardship (QP192)
Expression Rates in Invasive Breast Carcinoma (QP193)
The Impact of Pathologist Review of Peripheral Blood Smears (QP194)

Quality Management Tools

Use the CAP's Quality Management Tools (QMT) to **improve the Total Testing Process** by identifying quality improvement opportunities of selected key processes in the clinical and anatomic pathology laboratories, examining preanalytical, analytical, and postanalytical phases:

- **Establish realistic goals** by comparing performance against similar institutions with comparable demographics
- **Monitor progress** through unique and robust quality indicators on a periodical basis
- **Make effective quality management decisions** based on practical and in-depth individual reports provided to participants
- **Improve efficiencies** to allow time for more patient-centric activities
- **Easily integrate quality management into your daily work processes** with predesigned monitoring tools developed by laboratory professionals and scientists

Q-PROBES™ A One-Time Opportunity to Perform In-Depth Quality Assessment

Q-TRACKS® A Program for Continuous Quality Monitoring

Q-PROBES and Q-TRACKS activities meet the American Board of Pathology Continuing Certification (CC), formerly known as Maintenance of Certification (MOC), requirements.

Purchase Q-PROBES or Q-TRACKS combination packages and save.

Module/Package	Program Code
Four Q-PROBES studies (includes all four studies)	**PRO**
CP/AP Q-TRACKS Monitors (combined CP/AP module includes all 11 QT monitors)	**QTP**
Clinical Pathology Monitors (includes all 10 CP monitors)	**QTC**

Q-PROBES and Q-TRACKS

offer a comprehensive collection of tools to complement your quality management program needs.*

*The CAP requires accredited laboratories to have a quality management plan that covers all areas of the laboratory and includes benchmarking key measures of laboratory performance (GEN.13806, GEN.20316, COM.04000). The Joint Commission requires accredited hospitals to regularly collect and analyze performance data (PI.01.01.01, PI.02.01.01). CLIA requires laboratories to monitor, assess, and correct problems identified in preanalytic, analytic, and postanalytic systems (§493.1249, §493.1289, §493.1299).

Q-PROBES

A One-Time Opportunity to Perform In-Depth Quality Assessment

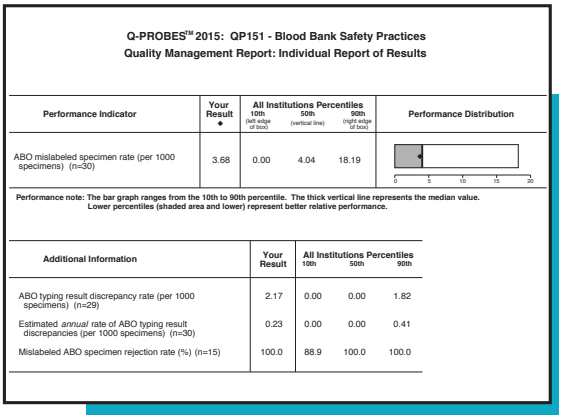
Implement quality monitoring—Use Q-PROBES short-term comprehensive quality studies[1] to learn how to start monitoring and measuring key processes that you may not have followed in the past or that are not commonly monitored in most laboratories. Q-PROBES studies analyze hot topics and industry trends to keep the laboratory current.

Gain experience in data collection and analysis—Participants will collect data during predetermined dates. Based on submitted data, the CAP provides personalized reports with the individual participant's performance compared against other participants.

Strengthen your quality assessment expertise—The CAP's pathologist experts provide in-depth discussion and identify best practices for laboratories to strive for. In addition, consolidated results of the studies are carefully reviewed and analyzed to be published in the form of scientific articles. Such articles give participants an extra layer of information to be utilized for further analysis.

Participants in the Q-PROBES program receive:

- User guide
- Templates and instructions for data collection
- Individual report, how to interpret the results guide, overall aggregated data
- Data Analysis and Critique that includes data distributions and initial analysis of laboratory practices and commentaries from pathologist experts on improvement opportunities
- Notification of the scientific articles that are published with the results of the studies



Q-PROBES℠ 2015: QP151 - Blood Bank Safety Practices
Quality Management Report: Individual Report of Results

Performance Indicator	Your Result	All Institutions Percentiles 10th (left edge of box)	50th (vertical line)	90th (right edge of box)	Performance Distribution
ABO mislabeled specimen rate (per 1000 specimens) (n=30)	3.68	0.00	4.04	18.19	0 5 10 15 20

Performance note: The bar graph ranges from the 10th to 90th percentile. The thick vertical line represents the median value. Lower percentiles (shaded area and lower) represent better relative performance.

Additional Information	Your Result	All Institutions Percentiles 10th	50th	90th
ABO typing result discrepancy rate (per 1000 specimens) (n=29)	2.17	0.00	0.00	1.82
Estimated *annual* rate of ABO typing result discrepancies (per 1000 specimens) (n=30)	0.23	0.00	0.00	0.41
Mislabeled ABO specimen rejection rate (%) (n=15)	100.0	88.9	100.0	100.0

Q-PROBES activities meet the American Board of Pathology Continuing Certification (CC), formerly known as Maintenance of Certification (MOC), requirements.

[1] Q-PROBES studies are available only one time annually and may not be repeated in the future.

NEW

Technical Competency Assessment of Peripheral Blood Smears QP201

Introduction

The widespread use of automated white blood cell (WBC) differential counts and computer generated whole slide imaging has decreased the time that the technical staff dedicates to morphological assessment of blood cells. However, technologists must maintain their morphological skills and laboratories are required to provide education and assess competency in this area on a regular basis.

Participation in this Q-PROBES study helps laboratories meet CLIA personnel requirements (Subpart M, 42 CFR §493.1); CAP Laboratory Accreditation Program Checklist statements GEN.55500, Competency Assessment of Testing Personnel; and The Joint Commission Standards HR. 01.05.03, 01.06.01, and 01.07.01 for training and education, competency, and evaluation of hospital personnel.

Objectives

This study will help assess the effectiveness of educational and practical experience policies and procedures dedicated to the laboratory's efforts in maintaining technologist skills in the performance of accurate WBC differential counts and other peripheral blood smear morphological assessment. The evaluation provided will assist in the construction of individual educational programs for the technical staff and will highlight areas of improvement to focus on.

Data Collection

Information will be collected from each site regarding their institution's minimum qualification and experience requirements of their technologists, their ongoing educational programs in peripheral blood smear evaluation, as well as relevant procedures and policies.

A series of online, whole slide images of Wright-Giemsa stained peripheral blood smears using DigitalScope® technology will be available to each participating institution to assess technologists' performance on WBC differential counts and morphology assessment. Participants will also provide information about their competency assessment programs, continuing education, and professional background. Each program ordered provides input forms for use by up to 10 technologists. Laboratories that need forms for more than 10 individuals should order additional programs (available in multiples of 10).

Performance Indicators

- Individual technologist score (%) based on a standardized competency assessment method to determine a technologist's ability to identify various WBC types, red blood cell morphology, and platelet morphology in normal and abnormal cases
- Overall laboratory score based on the facility's individual technologist performance(s)

A summary of responses to the general questions will be provided to participants.

This is a one-time study conducted in the first quarter.

Red Blood Cell Utilization: Single and Double Unit Transfusions QP202

NEW

Introduction

The use of lower thresholds for transfusing red blood cells (RBC) has effectively reduced the number of RBC transfusions performed. When healthcare providers order a blood transfusion, they request the number of RBC units that should be transfused. Most orders are for either 1 (single) unit or 2 (double) units of RBC in non-emergent scenarios. This includes inpatient transfusions provided to acute and chronically ill patients, post-operative patients, and patients in intensive care unit settings. However, the need to transfuse 2 RBC units during a transfusion episode has been questioned because a single unit transfusion may sufficiently increase oxygen carrying capacity for most patients.

Enrollment in this study will assist laboratories in meeting the CAP Laboratory Accreditation Program Transfusion Checklist statement TRM.40875, Transfusion Service Medical Director Responsibility, regarding monitoring and auditing transfusion practices, and establishing criteria for transfusion. Use of this study assists laboratories in meeting and applying The Joint Commission Standards QSA.05.01.01 and 05.02.01 requirements for policies and procedures for blood transfusion services.

Objectives

This Q-PROBES study will allow participants to assess how frequently single RBC units are ordered and subsequently transfused to hospitalized patients requiring non-emergent transfusions compared to all transfusion events with either single or double RBC units ordered. Additionally, this study will allow participants to evaluate conformance of RBC transfusion practice with their own institutional guidelines.

Data Collection

Participants will identify up to 50 transfusion events from patients treated and received either 1 or 2 RBC unit(s). This study will be limited to hospital inpatients. Preoperative and intraoperative orders for surgical patients and emergency orders for RBC transfusion will be excluded. Orders for 3 or more RBC units will be excluded as these are often unstable patients requiring urgent transfusion.

For each of the eligible transfusion episodes, participants will record the pre-transfusion and post-transfusion hemoglobin levels and the type of ordering service.

Performance Indicators

- Percentage of single RBC transfusion events out of all transfusion events administering single or double RBC units during the study period
- Percentage of RBC transfusions in compliance with institutional guidelines during the study period

Additional Measure

- Average pre-RBC transfusion hemoglobin value

This is a one-time study conducted in the second quarter.

Inpatient Test Utilization and Volume Benchmarking QP203

NEW

Introduction

It is well established that test ordering practices vary widely between healthcare providers even when adjusted for similar patient populations and conditions. Similarly, ordering practices vary between healthcare facilities which depend, in part, on certain operational practices and policies. This may involve test menu configuration, ordering protocols, or restriction policies such as use of laboratory formularies. Another method to evaluate potential gaps in utilization practices is to evaluate adjusted volume of specific tests between facilities. This information can be useful to laboratories for prompting evaluation of potential factors associated with differences in the quantity of specific tests performed when compared to peers.

Objectives

The purpose of this study is to provide participants with comparative benchmarks involving annual volumes of various inpatient tests and number of inpatient days. The amount of testing performed per inpatient day will be used to adjust for ordering practice variability between facilities.

In addition, associations between standardized test volumes and ordering practices in use by participants, such as test menu design, reflex testing, decision support, standing orders, and order restriction policies, will be evaluated.

Data Collection

Participants will report the 2019 annual volume for specific inpatient tests including both common high volume tests as well as less commonly ordered low volume tests. Annual inpatient days will also be collected.

Other information such as whether the test is included on a panel will be collected in addition to information about general laboratory stewardship policies and procedures.

Performance Indicators

For each inpatient test:

- Annual inpatient test volume standardized by inpatient days
- Index score of standardized inpatient test volume

This is a one-time study conducted in the third quarter.

NEW

Turnaround Time for Image–Guided Breast Needle Biopsy Specimens QP204

Introduction

Needle biopsies are performed increasingly for the primary diagnosis of breast disease, particularly in patients with mammographic or ultrasound abnormalities suspicious for malignancy. In a typical workflow the radiologist incorporates the pathologic findings into the radiology report with correlation, requiring a rapid turnaround time for the pathology report in order to expedite patient care. As the goal of these procedures is to expedite surgical intervention in those patients requiring it, often with the assistance of a nurse navigator, many institutions track the turnaround times for biopsy submission, pathologist and radiologist verification of their respective reports, and time to surgery. Notably, there are no established pathology benchmarks for breast needle biopsy turnaround time.

Objectives

The aims of this study are to:

- Determine the average turnaround time for image-guided breast needle biopsy specimens, defined as the time from specimen accessioning in the laboratory to verification and release of the final report by the pathologist
- Identify key elements of processing and reporting that influence the turnaround time, including the American Society of Clinical Oncology/College of American Pathologists guideline for at least six hours of formalin fixation, the relative complexity of establishing benign, atypical/borderline, and malignant diagnoses, and the frequent need for additional studies, including additional deeper sections, immunohistochemistry, and intradepartmental consultation

Data Collection

Participants will submit data from up to 50 image-guided breast needle biopsy specimens received during the study period, including the time of biopsy (when available), the time the specimen was accessioned in the laboratory, the duration of formalin fixation, and all non-routine studies obtained on the case, as outlined in the objectives above. The final pathologic diagnosis will also be recorded in order to stratify turnaround times with regard to benign, atypical/borderline, and malignant diagnoses, if sufficient data is provided.

Performance Indicator

- Time from specimen accessioning in the laboratory to final pathologist report

This is a one-time study conducted in the fourth quarter.

Q-TRACKS

A Program for Continuous Quality Monitoring

Identify and monitor opportunities for quality improvement over time

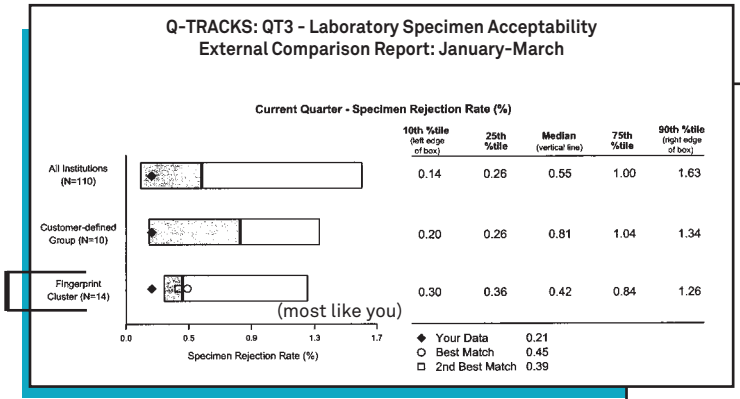
Use established Q-TRACKS programs to identify opportunities to quantitate your quality improvement measures.

Evaluate quality improvements

Measure the effectiveness and impact of implemented changes in key processes. The individual reports include performance of quality indicators over time, benchmarking information, trends, and suggested areas for improvement.

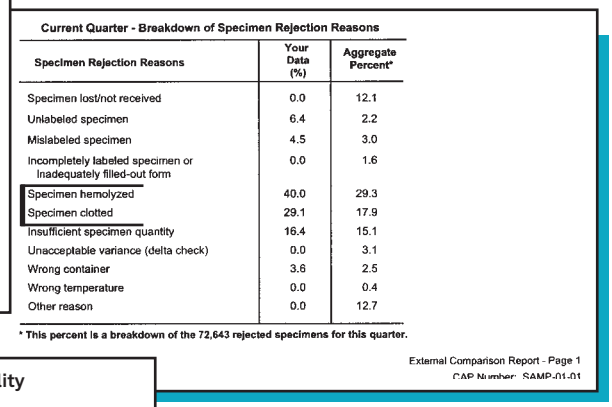
Step 1:

Establish realistic benchmarks by comparing your laboratory to others like yours.



Step 2:

Identify improvement opportunities.

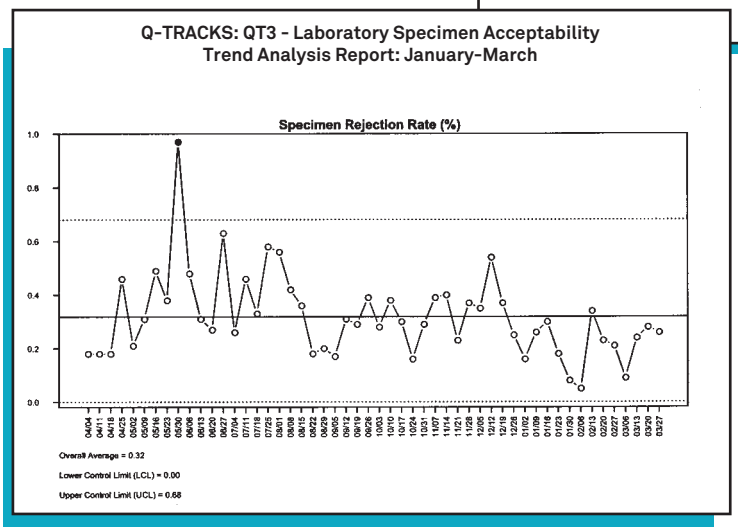


Current Quarter - Breakdown of Specimen Rejection Reasons

Specimen Rejection Reasons	Your Data (%)	Aggregate Percent*
Specimen lost/not received	0.0	12.1
Unlabeled specimen	6.4	2.2
Mislabeled specimen	4.5	3.0
Incompletely labeled specimen or inadequately filled-out form	0.0	1.6
Specimen hemolyzed	40.0	29.3
Specimen clotted	29.1	17.9
Insufficient specimen quantity	16.4	15.1
Unacceptable variance (delta check)	0.0	3.1
Wrong container	3.6	2.5
Wrong temperature	0.0	0.4
Other reason	0.0	12.7

* This percent is a breakdown of the 72,643 rejected specimens for this quarter.

External Comparison Report - Page 1
CAP Number: SAMP-01-01



Step 3:

Monitor improvement over time to ensure accurate results, patient safety, and quality patient care.

Participants in Q-TRACKS programs receive:

- User Guide
- Templates and instructions for data collection
- Quarterly reports that include fingerprint clusters, customer-defined groups, and all institution comparisons
- Peer directory

Q-TRACKS activities meet the American Board of Pathology Continuing Certification (CC), formerly known as Maintenance of Certification (MOC), requirements.

Laboratory Administration for Pathologists, Second Edition (PUB312)

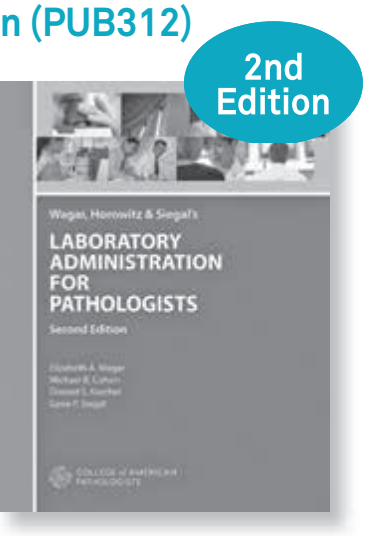
Laboratory Administration for Pathologists is designed to provide pathologists with an overview of the fundamentals of management and leadership, addressing the specific role and responsibility of the pathologist in directing the laboratory.

- Provides information for both clinical and anatomic pathology practice
- Includes an overview of patient safety not available in the first edition
- Covers financial management of the laboratory and the pathology practice
- Geared for trainees and those entering practice while appropriate for all pathologists

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: PUB312
Hardcover; 296 pages; 2019

Q-TRACKS Clinical Pathology Monitors

Patient Identification Accuracy QT1

In order to report accurate laboratory results and meet The Joint Commission National Patient Safety Goal #1: "Identify patients correctly," institutions must properly identify patients. Since most laboratories perform testing away from the patient, patient identification, labeling of specimens, and coordination with test requisitions must be performed accurately and completely. By continuously monitoring for wristband errors, participants can promptly identify and correct problems that may interfere with patient care services. Use this monitor to help meet CAP Laboratory Accreditation Program General Checklist statements GEN.20316, GEN 40490, and GEN.40825.

Objectives

Assess the incidence of wristband errors within individual institutions, compare performance between participating institutions, and identify improvement opportunities.

Data Collection

On six predetermined days per month, participants will monitor patient wristband identification for all phlebotomies performed at their institution. Phlebotomists will tally the total number of wristbands checked, the number of errors found, and the types of wristband errors. This monitor includes all routinely wristbanded patients. Include emergency department patients only if the emergency department routinely applies wristbands to these patients.

Performance Indicator

- Wristband error rate (%)

Performance Breakdown

- Breakdown of wristband error types (%)

Blood Culture Contamination QT2

Despite advances in blood culture practices and technology, false-positive blood culture results due to contaminants continue to be a critical problem. Blood culture contamination rate, the primary indicator of preanalytic performance in microbiology, is associated with increased length of hospital stay, additional expense, and the administration of unnecessary antibiotics.

The CAP and other accrediting organizations require you to monitor and evaluate key indicators of quality for improvement opportunities. Use this monitor to help meet CAP Laboratory Accreditation Checklist statement note MIC.22630: "It is recommended that blood culture statistics, including number of contaminated cultures, be maintained and reviewed regularly by the laboratory director. The laboratory should establish a threshold for an acceptable rate of contamination. Tracking the contamination rate and providing feedback to phlebotomists or other persons drawing cultures has been shown to reduce contamination rates." This will also help laboratories meet The Joint Commission Standard QSA 04.07.01 EP3.

Objective

Determine the rate of blood culture contamination using standardized criteria for classifying contaminants.

Data Collection

On a monthly basis, participants will tabulate the total number of blood cultures processed and the total number of contaminated blood cultures. Blood cultures from neonatal patients are tabulated separately. For the purposes of this study, participants will consider a blood culture to be contaminated if they find one or more of the following organisms in only one of a series of blood culture specimens: Coagulase-negative *Staphylococcus; Micrococcus;* Alpha-hemolytic viridans group streptococci; *Propionibacterium acnes*; *Corynebacterium* sp. (diptheroids); or *Bacillus* sp. Participants have the option to monitor institution-specific subgroups, for example, a specific department or patient population.

Performance Indicators

- Neonatal contamination rate (%)
- Other contamination rate (%)
- Overall contamination rate (%)

Look for your input forms approximately three weeks prior to the quarter.

Laboratory Specimen Acceptability QT3

A substantial amount of rework, diagnostic and therapeutic delay, and patient inconvenience can result from specimen rejection. Patient redraws may result from unlabeled, mislabeled, and incompletely labeled specimens; clotted and/or hemolyzed specimens; or insufficient specimen quantity. By continuously monitoring specimen acceptability, collection, and transport, laboratories can promptly identify and correct problems. Enrollment in this Q-TRACK may assist the laboratory in monitoring compliance with CAP Laboratory Accreditation Program General Checklist statement GEN.40825: "There is a system to positively identify all patient specimens, specimen types, and aliquots at all times."

Objective

Identify and characterize unacceptable blood specimens that are submitted to the chemistry and hematology/coagulation sections of the clinical laboratory for testing.

Data Collection

This monitor includes all blood specimens submitted for testing to the chemistry and hematology departments of the clinical laboratory. On a weekly basis, participants will record the total number of specimens received, the number of rejected specimens, and the primary reason each specimen was rejected.

Performance Indicator

- Specimen rejection rate (%)

Performance Breakdown

- Breakdown of reasons for rejection (%)

In-Date Blood Product Wastage QT4

Blood for transfusion is a precious resource. At a minimum, wastage of blood that is not out-of-date represents a financial loss to the healthcare system. More ominously, systemic wastage of blood may reflect an environment of care that is out of control and may pose risks to patient safety.

Enrollment in this program assists laboratories in meeting regulatory requirements as follows:

- CAP Laboratory Accreditation Program Checklist statements: TRM.40875 that requires the transfusion service medical director to monitor and audit transfusion practices to ensure the appropriate use of blood; TRM.30800, Disposition Records; and TRM.32275, Component Records, regarding recording the use of each blood or component product from receipt to final disposition.
- The Joint Commission Standards QSA.05.02.01, adequate blood and blood components; QSA.05.03.03, requirements for policies and procedures for returning unused blood products to blood transfusion services; and QSA.05.22.01, records of blood product disposition.
- AABB Standards for Blood Banks and Transfusion Services assessment 8.2 that requires transfusing facilities to have a peer-review program that monitors transfusion practices for blood components.

Objective

Compare the rates of blood product wastage (ie, units discarded in-date) in participating hospitals and track rates of improvement over time.

Data Collection

On a monthly basis, participants will use blood bank records to obtain information on the total number of units transfused for each type of blood component. Participants will track the number and type of blood units that are wasted in-date and the circumstances of wastage. This monitor includes the following types of blood components: whole blood (allogeneic), red blood cells (allogeneic), frozen plasma, platelet concentrates, single donor platelets, and cryoprecipitate.

Performance Indicators

- Overall blood wastage rate (%)
- Wastage rates by blood component type (%)

Performance Breakdown

- Breakdown of circumstances of wastage (%)

Look for your input forms approximately three weeks prior to the quarter.

Satisfaction with Outpatient Specimen Collection QT7

Specimen collection is one of the few areas of laboratory medicine that involves direct outpatient contact. As a result, patient satisfaction with this service is a vital indicator of quality laboratory performance. The CAP's Laboratory Accreditation Program requires measurement of patient satisfaction with laboratory services (Checklist statement GEN.20335). Use this monitor to help meet this requirement.

Objective

Assess patient satisfaction with outpatient phlebotomy services by measuring patients' assessments of laboratory service hours, waiting time, comfort level, professionalism and courtesy, and privacy.

Data Collection

On a monthly basis, participants will provide copies of a standardized questionnaire in English and Spanish to a minimum of 25 outpatients (maximum of 99 outpatients) using predetermined data collection criteria. This monitor includes any outpatient undergoing venipuncture. This monitor excludes patients seen in the emergency department, ambulatory surgery area, urgent care facility, chest pain center, 23-hour short-stay facility, employee health department, outpatient health screening fair/promotion, dialysis center, nursing home, or extended care facility.

Performance Indicators

- Satisfaction scores and satisfaction rates (% of patients rating 4 or 5) for the following categories:
  - o Overall experience
  - o Waiting time
  - o Patient comfort
  - o Professionalism and courtesy
  - o Patient privacy
  - o Laboratory hours of operation

Stat Test Turnaround Time Outliers QT8

The stat test turnaround time (TAT) outlier rate, expressed as a percentage of tests missing target reporting times, is a measure of outcomes that evaluates how well the laboratory meets patient and clinician needs. This monitor helps meet CAP Laboratory Accreditation Program Checklist statement GEN.20316: "The QM program includes monitoring key indicators of quality in the preanalytic, analytic, and postanalytic phases."

Objective

Monitor the frequency that stat test TAT intervals exceed institutional stat test TAT expectations.

Data Collection

Before beginning data collection, participants will establish a specimen receipt-to-report deadline for emergency department (ED) stat potassium tests. On six predetermined days per month, participants will monitor the TAT of up to 10 randomly selected ED stat potassium tests on each of three, eight-hour shifts (up to 180 tests per month) and track the number of ED stat potassium results reported later than the established reporting deadline. This monitor includes stat potassium tests ordered as part of a panel and excludes stat potassium levels that are requested on body fluids other than blood, as part of timed or protocol studies, or after the specimen arrives in the laboratory.

Performance Indicator

- Stat test TAT outlier rate (%)

Performance Breakdowns

- Breakdown of outliers by shift (%)
- Breakdown of outliers by day of week (%)

Look for your input forms approximately three weeks prior to the quarter.

Critical Values Reporting QT10

Laboratories commonly refer to critical values as results requiring immediate notification to the physician or caregiver for necessary patient evaluation or treatment. Regulations from agencies and accreditors such as the CMS, The Joint Commission (National Patient Safety Goal NPSG.02.03.01), and the CAP Laboratory Accreditation Program (Checklist statement GEN.20316, COM.30000, COM.30100) mandate that laboratories develop and implement an alert system for critical values. Use this monitor to document compliance with your laboratory's alert plan.

Objective

Evaluate the documentation of successful critical values reporting in the general laboratory for inpatients and outpatients.

Data Collection

On a monthly basis, participants will evaluate 120 inpatient and 120 outpatient critical values. Data collection will include general chemistry, hematology, and coagulation analytes on the critical values list. Retrospectively, participants will record the total number of critical values monitored and the number with documentation of successful notification. In addition, participants will provide the number of critical values that were not communicated within three hours, the number of failed notifications due to laboratory oversight, and the number of successful notifications to licensed caregivers. This monitor will exclude critical values for cardiac markers, drugs of abuse, therapeutic drug levels, urinalysis, blood gases, point-of-care tests, and tests performed at reference laboratories.

Performance Indicators

- Total critical values reporting rate (%)
- Inpatient critical values reporting rate (%)
- Outpatient critical values reporting rate (%)
- Failed notification (<3 hours) rate (%)

Look for your input forms approximately three weeks prior to the quarter.

Troponin Turnaround Times QT15

Patients presenting to the emergency department (ED) with chest pain must be evaluated quickly. Rapid serum troponin measurement is an important part of ED practice that can provide decisive information for patient management. Reducing delays in troponin testing has been reported to result in shorter length of stay in the ED and more rapid initiation of anti-ischemic treatment. EDs and chest pain centers should, therefore, have effective procedures for ensuring optimal turnaround time (TAT) for troponin testing and a process for ongoing monitoring to ensure that performance meets expectations.

QT15 was enhanced for 2019 with additional time intervals to help pinpoint process time challenges. Laboratories may use this monitor to help meet CAP Laboratory Accreditation Program Checklist statement GEN.20316 QM Indicators of Quality. The American College of Cardiology and the American Heart Association recommend troponin as the preferred diagnostic biomarker in their Acute Coronary Syndromes guideline.

Objectives

This study will assist participating laboratories to determine and monitor:

- The median TATs for processes from order time through result availability, with up to five time intervals within the total testing process
- The percent compliance for troponin results with their institution's established deadline

Data Collection

Six days per month, collect data from nine patients presenting to the ED with chest pain and tested for troponin level. Data includes time of troponin test order, specimen collection, laboratory receipt, and result availability. Participants are not required to provide data from each TAT component. Participants will select TAT metrics that they wish to monitor, with the option to monitor all metrics.

Participants will also complete a questionnaire about clinical and laboratory practices related to troponin testing.

Performance Indicators

Median TATs for the following time intervals:

- Test order to specimen collection
- Specimen collection to laboratory receipt
- Laboratory receipt to result availability
- Specimen collection to result availability
- Test order to result availability

Compliance (%) with insitutional threshold for the following time intervals:

- Specimen collection to result availability
- Test order to result availability

Look for your input forms approximately three weeks prior to the quarter.

Corrected Results QT16

The CAP developed this Q-TRACKS monitor in recognition of the importance of timely detection and correction of erroneous laboratory results. Accuracy in laboratory results is critical to the effectiveness of a physician's plan of care for a patient. An erroneous result can delay or alter patient treatment; therefore, detection of erroneous results should be a priority in every laboratory and should be monitored as a key quality indicator. Help measure your compliance with CLIA 493.1299, Postanalytic Systems Quality Assessment, and help meet CAP Laboratory Accreditation Program Checklist statement GEN.20316 with this monitor.

Objective

Monitor the number of corrected test results within individual institutions and compare performance with that of all institutions and those institutions similar to yours.

Data Collection

On a monthly basis, participants will monitor the number of corrected test results and the total number of billable tests for that month. Include test results for all patients in all care settings with the following exclusions: anatomic pathology tests, narrative physician-interpreted tests (eg, bone marrow biopsies and peripheral smear reports), and point-of-care tests.

Performance Indicator

- Test result correction rate (per 10,000 billable tests)

Outpatient Order Entry Errors QT17

Order accuracy bears an obvious relationship to the quality of laboratory testing. When the laboratory fails to complete a requested test, it delays the diagnostic evaluation, consumes resources, causes patient inconvenience, and may prolong therapy. When the laboratory completes a test that was not requested, the cost of care increases, patients may be subjected to unnecessary phlebotomy, and laboratory efficiency declines. Use this monitor to help meet CAP Laboratory Accreditation Program Checklist statement GEN.20316 for test order accuracy and meet The Joint Commission Standard DC.01.02.01: The laboratory performs testing based on written laboratory test orders.

Objective

Measure the incidence of incorrectly interpreted and entered outpatient physician test orders into the laboratory information system, compare performance across institutions, and track performance over time.

Data Collection

On six preselected weekdays per month, participants will compare eight outpatient requisitions or order sheets to the orders entered into the laboratory's information system to determine if any order entry errors occurred.

This monitor includes test order review from ambulatory outpatients seen in offices and clinics operated by your laboratory services, private physician offices, nursing homes, extended care facilities, and free-standing phlebotomy areas. Also included are send-out tests, chemistry, hematology, microbiology, immunology, toxicology, and urinalysis tests on outpatients. Order entry error categories include requesting physician errors, incorrect and extra test orders, missing test orders and diagnosis codes, test priority errors, and copy or fax result errors.

This monitor excludes tests performed in transfusion medicine or anatomic pathology and also excludes tests from the following patient care settings: inpatient, emergency department, ambulatory surgery, urgent care, chest pain center, 23-hour short-stay facility, employee health department, outpatient screening fair/promotion, and dialysis center.

Performance Indicators

- Overall outpatient order entry error rate (%)
- Order entry error rates by type (%)

Performance Breakdown

- Breakdown of error types (%)

Look for your input forms approximately three weeks prior to the quarter.

Q-TRACKS Anatomic Pathology Monitor

Gynecologic Cytology Outcomes: Biopsy Correlation Performance QT5

The correlation of cervicovaginal cytology (Pap test) findings with cervical biopsy results is a significant part of the cytopathology laboratory's quality assurance program. By monitoring this correlation, the laboratory can identify and address potential problems requiring improvement, thereby ensuring better patient results. This Q-TRACKS study helps laboratories meet CAP Laboratory Accreditation Program Cytopathology Checklist statements CYP.07543 and CYP.07600 on cytologic/histologic correlation, and The Joint Commission Standard QSA.08.06.03: The cytology laboratory has a process to correlate cytologic interpretations with the corresponding histologic finding.

Objective

Quantify the correlation between the findings of cervicovaginal cytology and corresponding histologic material.

Data Collection

On a monthly basis, participants will record the number of true-positive, false-positive, and false-negative cytology-biopsy correlations. The false-negative correlations will be classified into four error categories: screening errors, interpretive errors, screening and interpretive errors, and adequacy determination errors. Participants will also record the biopsy diagnoses for Pap tests with an interpretation of atypical squamous cells (ASC-US and ASC-H) or atypical glandular cells (AGC). This monitor includes cervical biopsy specimens submitted to the laboratory that have a corresponding satisfactory or satisfactory but limited Pap test within three months of the biopsy.

Performance Indicators

- Predictive value of positive cytology (%)
- Sensitivity (%)
- Screening/interpretation sensitivity (%)
- Sampling sensitivity (%)
- Percent positive for ASC-US interpretations
- Percent positive for ASC-H interpretations
- Percent positive for AGC interpretations

Look for your input forms approximately three weeks prior to the quarter.

Unbind your competency assessment efforts.

Traditionally, documenting competency assessment meant shelves of three-ring binders. No more. With the Competency Assessment Program from the College of American Pathologists, all your documentation is right on your computer, instantly available at any time.

2020 Competency Assessment Program subscription includes:

- Updated assessment and training courses in 11 laboratory disciplines
- Customizable courses and checklists
- Online tools including assignments by team and shift, progress dashboards, and automated reminders

Improve your laboratory's readiness for inspection. Add the appropriate Competency Assessment Program subscription to your order form.

4 Quality Cross Check

Simplify biannual instrument comparability studies with Quality Cross Check.

- Receive custom reports with peer group evaluations and instrument comparability statistics.
- Monitor transfusion medicine performance and assess comparability across multiple automated and manual methods with the Quality Cross Check—Transfusion Medicine program (JATQ).

New Programs NEW

Quality Cross Check—Cardiac Markers (CRTQ).....42

Perform instrument comparability and stay in compliance

Quality Cross Check is a convenient solution to monitor instrument performance and assess comparability across multiple instruments in your laboratory and to identify potential issues before they affect patient results.

How It Works

- Receive three challenges in each of two mailings a year.
- Report up to three instruments for each challenge (and report up to 30 instruments for Quality Cross Check—Whole Blood Glucose).
- Receive a custom report package that includes peer group comparison and instrument comparability statistics for each reported analyte.

Stay in Compliance

In August 2015, the Centers for Medicare & Medicaid Services (CMS) reiterated that laboratories are not permitted to test proficiency testing samples on multiple instruments unless that is how the laboratory tests patient specimens.

The CMS interpretation was expanded beyond regulated analytes to include analytes not listed in Subpart I of the Clinical Laboratory Improvement Amendments regulations, including waived methods.

Quality Cross Check complements your existing CAP Surveys to monitor multiple instrument performance and is compliant with the CMS directive.

Monitoring Performance of Glucose Meters

Beginning in 2017, PT for waived whole blood glucose on glucose meters was no longer required for laboratories accredited by the CAP. Laboratories are required to perform alternative performance assessment.

In response to this change, the CAP introduced the Quality Cross Check—Whole Blood Glucose program (WBGQ). Participants in this program will enjoy the benefits of Quality Cross Check and have the ability to report up to 30 instruments for each challenge.

General Chemistry and Therapeutic Drug Monitoring

Quality Cross Check—Chemistry and Therapeutic Drug Monitoring CZQ

Analyte	Program Code	Challenges per Shipment
	CZQ	
See Survey CZ analytes on pages 56-58	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey CZ on pages 56-58. For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 5.0-mL liquid serum specimens in duplicate
- Report up to three instruments
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Quality Cross Check—BNP BNPQ

Make critical transfusion decisions with confidence.

Transfusion Medicine in the Hot Seat is a valuable educational resource for pathology trainees and pathologists practicing transfusion medicine. The text presents a total of 26 realistic transfusion scenarios divided into three sections:

- Antibodies
- Blood Components
- Complications

The short-case format makes the information easily accessible and can serve as the basis for a transfusion medicine curriculum in clinical pathology.

Add it to your order.

Insight at a glance.

In just seconds, the CAP's Performance Analytics Dashboard provides valuable insights into your laboratory's performance, letting you proactively focus energy on areas that need immediate attention while filtering out distractions. Updated daily, this complimentary proficiency testing and CAP accreditation performance monitoring tool reduces the stress of managing today's laboratory by giving you fast access to a single laboratory's or an expansive network's performance.

To view a demo, search Performance Analytics Dashboard at cap.org.

5 Point-of-Care Programs

Keep your point-of-care (POC) instruments and staff operating at peak performance.

- Improve waived test results with POC Competency Challenges that evaluate instrument and method performance, troubleshoot issues, assess staff competency, and provide training information.
- Gain insights with the Point-of-Care Testing Toolkit, an ebook resource for all members of the team.

Point-of-Care Programs

POC Competency Challenges are designed to improve waived test results. These programs evaluate instrument and method performance, troubleshoot, assess staff competency, and provide information to train staff. Expected results will be provided. These programs are not proficiency testing programs and participants will not return results to the CAP.

POC Competency Challenges may have limited availability and stability.

Blood Gases, i-STAT® Competency		▮		10
Plasma Cardiac Markers Competency			▮	10

Program Information

- POC10 - One abnormal 2.5-mL aqueous blood gas specimen (10 vials) and one 2.5-mL hematocrit/hemoglobin specimen (10 vials)
- POC11 - One abnormal 2.5-mL aqueous specimen (10 vials) for blood gas and hematocrit/hemoglobin testing
- POC12 - One 1.5-mL plasma specimen (two vials); compatible with plasma-based tests, such as Alere Triage® and i-STAT instruments
- Each program provides material to test up to 10 staff
- Shipments available upon request

Guide your point-of-care testing with confidence.

Point-of-Care Testing (POCT) Toolkit

POCT implementation requires a systematic approach that involves all stakeholders. This toolkit serves as a resource for any member of the POCT team who wants to learn about POCT or who has responsibility to guide or direct POCT. Pathologists may also use the toolkit to guide other members of their POCT teams, including POCT coordinators and medical technologists who are involved in POCT.

The toolkit covers:

- POCT advantages and disadvantages
- Current and projected technology
- Pathologist, laboratory director, and POCT coordinator roles in POCT
- Selection of appropriate test methods
- Validation and verification protocols
- Quality control and data management
- Patient safety
- POCT training and competency

Purchase the ebook at ebooks.cap.org.

*General Chemistry and Therapeutic Drugs Surveys do not fulfill the CAP accreditation requirements for neonatal bilirubin proficiency testing. See Surveys NB, NB2 on page 65.

Program Information

- C1, C3, C4, CZ, Z - Five 5.0-mL liquid serum specimens
- C3X, CZX - Five 5.0-mL liquid serum specimens in duplicate
- CZ2X - Five 5.0-mL liquid serum specimens in triplicate
- Conventional and International System of Units (SI) reporting offered
- Three shipments per year
- For second instrument reporting options, see the Quality Cross Check program, CZQ, on page 58

Quality Cross Check—Chemistry and Therapeutic Drug Monitoring CZQ

Analyte	Program Code	Challenges per Shipment
	CZQ	
See Survey CZ analytes on pages 56-58	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey CZ on pages 56-58. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 5.0-mL liquid serum specimens in duplicate
- Report up to three instruments
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Harmonized Thyroid ABTH

Triiodothyronine (T3), total	▮	3
Thyroxine (T4), free	▮	3
Thyroxine (T4), total	▮	3
Thyroid-stimulating hormone (TSH)	▮	3

Additional Information

- Analytes will be evaluated using harmonization.
- Specimens are collected by a modified application of Clinical Laboratory and Standards Institute Guideline CLSI C37-A, *Preparation and Validation of Commutable Frozen Human Serum Pools as Secondary Reference Materials for Cholesterol Measurement Procedures; Approved Guideline.*

Program Information

- Three 1.0-mL frozen human serum specimens
- Two shipments per year

CAP/AACC Immunosuppressive Drugs CS

Analyte	Program Code	Challenges per Shipment
	CS	
Cyclosporine	▮	3
Sirolimus (rapamycin)	▮	3
Tacrolimus	▮	3

Program Information

- Three 5.0-mL whole blood specimens
- For laboratories monitoring cyclosporine, sirolimus, and tacrolimus in transplant patients
- Two shipments per year

AACC

Antifungal Drugs Monitoring AFD

Procedure	Program Code	Challenges per Shipment
	AFD	
Fluconazole	▮	3
Itraconazole	▮	3
Posaconazole	▮	3
Voriconazole	▮	3

Program Information

- Three 2.0-mL serum specimens
- For laboratories performing quantitative analysis of anti-fungal agents
- Two shipments per year

Everolimus EV

Analyte	Program Code	Challenges per Shipment
	EV	
Everolimus	▮	3

Program Information
- Three 4.0-mL whole blood specimens
- Two shipments per year

Mycophenolic Acid MPA

Analyte	Program Code	Challenges per Shipment
	MPA	
Mycophenolic acid	▮	3

Program Information
- Three 5.0-mL lyophilized serum specimens
- Two shipments per year

Therapeutic Drug Monitoring—Extended ZE

*This analyte will be evaluated against the reference method.

Program Information

- Three 1.0-mL human serum specimens
- Two shipments per year

B-Type Natriuretic Peptides BNP, BNP5

Analyte	Challenges per Shipment	
	Program Code	
	BNP	BNP5
BNP	2	5
NT-proBNP	2	5

Additional Information

- The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for BNP and NT-proBNP to complete 15 PT challenges per year.
- For i-STAT®, use Plasma Cardiac Markers programs PCARM or PCARMX.
- For second instrument reporting options, see the Quality Cross Check program, BNPQ, below.

Program Information

- BNP - Two 1.0-mL liquid plasma specimens
- Conventional and International System of Units (SI) reporting offered; two shipments per year
- BNP5 - Five 1.0-mL liquid plasma specimens
- Conventional and International System of Units (SI) reporting offered; three shipments per year

Quality Cross Check—BNP BNPQ

Analyte	Program Code	Challenges per Shipment
	BNPQ	
BNP	▮	3
NT-proBNP	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey BNP or BNP5 above. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 1.5-mL liquid specimens
- Report up to three instruments
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Cardiac Markers CRT, CRTI, TNT, TNT5

Analyte	Program Code				Challenges per Shipment
	CRT	CRTI	TNT	TNT5	
CK-MB, immunochemical	▮	▮			5
CK isoenzymes (CK-BB, **CK-MB**, CK-MM), electrophoretic		▮			5

Myoglobin	▮	▮			2
Troponin I	▮	▮			5
Troponin T, two challenges			▮		2
Troponin T, five challenges				▮	5

The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for Troponin I and Troponin T to complete 15 PT challenges per year.

Program Information

- CRT - Five 2.0-mL liquid serum specimens
- CRTI - Ten 2.0-mL liquid serum specimens
- TNT - Two 2.0-mL liquid serum specimens
- TNT5 - Five 2.0-mL liquid serum specimens
- Three shipments per year

Quality Cross Check—Cardiac Markers CRTQ

NEW

Analyte	Program Code	Challenges per Shipment
	CRTQ	
CK-MB, immunochemical	▮	3
Myoglobin	▮	3
Troponin I	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey CRT above. For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 2.0-mL liquid serum specimens
- Report up to three instruments
- Two shipments per year

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Hemoglobin A_{1c} GH2, GH5

Analyte	Challenges per Shipment	
	Program Code	
	GH2	GH5
Hemoglobin A_{1c}	3	5

Additional Information

- These Surveys will be evaluated against the National Glycohemoglobin Standardization Program (NGSP) reference method.
- The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for Hemoglobin A_{1c} to complete 15 PT challenges per year.
- For second instrument reporting options, see the Quality Cross Check program, GHQ, below.

Program Information

- GH2 - Three 0.8-mL liquid human whole blood specimens; two shipments per year
- GH5 - Five 0.8-mL liquid human whole blood specimens; three shipments per year

Quality Cross Check—Hemoglobin A_{1c} GHQ

Analyte	Program Code	Challenges per Shipment
	GHQ	
Hemoglobin A_{1c}	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey GH5, above. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 0.8-mL previously frozen liquid specimens in triplicate
- Report up to three instruments
- Two shipments per year

Hemoglobin A_{1c} GH5I

Analyte	Program Code	Challenges per Shipment
	GH5I	
Hemoglobin A_{1c}	▮	5

Additional Information

- This program meets the CAP's Accreditation Program requirements for proficiency testing.
- This Survey will not be evaluated against the National Glycohemoglobin Standardization Program (NGSP) reference method. See Survey GH5 to be evaluated against the NGSP reference method.

Program Information

- Five 0.5-mL lyophilized specimens with a 3.0-mL dropper-tipped vial of diluent
- Designed for international laboratories that have experienced significant shipping and receiving issues and require longer specimen stability
- Three shipments per year

Glycated Serum Albumin GSA

Analyte	Program Code	Challenges per Shipment
	GSA	
Glycated serum albumin	▮	3

Program Information
- Three 1.0-mL liquid serum specimens
- Two shipments per year

High-Sensitivity C-Reactive Protein HSCRP

Analyte	Program Code	Challenges per Shipment
	HSCRP	
High-sensitivity C-reactive protein	▮	3

Program Information
- Three 0.5-mL liquid serum specimens
- Two shipments per year

Homocysteine HMS

Analyte	Program Code	Challenges per Shipment
	HMS	
Homocysteine	▮	3

Program Information
- Three 1.0-mL serum specimens
- Two shipments per year

Ketones KET

Analyte	Program Code	Challenges per Shipment
	KET	
Beta-hydroxybutyrate	▮	2
Total ketones	▮	2

Program Information
- Two 2.0-mL serum specimens
- For semi-quantitative methods using the nitroprusside reaction for total ketones testing
- Two shipments per year

Chemistry—Limited, Waived LCW

Analyte	Program Code	Challenges per Shipment
	LCW	
Cholesterol	▮	3
Glucose	▮	3
HDL cholesterol	▮	3
LDL cholesterol	▮	3
Triglycerides	▮	3

Program Information
- Three 3.0-mL liquid serum specimens
- For use with waived methods such as the Cholestech LDX® and Roche ACCU-CHEK® Instant Plus
- The glucose specimens are not appropriate for use on other whole blood glucose meters
- Two shipments per year

Neonatal Bilirubin NB, NB2

Analyte	Challenges per Shipment	
	Program Code	
	NB	NB2
Bilirubin, direct	2	2
Bilirubin, total	5	2

One human-based serum specimen will offer the value assigned using the reference method procedure (*Clin Chem.* 1985;31:1779-1789).

Program Information

- NB - Five 1.0-mL human serum specimens; three shipments per year
- NB2 - Two 1.0-mL human serum specimens; must order in conjunction with a five-challenge total bilirubin proficiency testing program to meet regulatory requirements; two shipments per year
- Conventional and International System of Units (SI) reporting offered

Plasma Cardiac Markers PCARM, PCARMX, PCARI

Analyte	Program Code			Challenges per Shipment
	PCARM	PCARMX	PCARI	
BNP	▮	▮	▮	5
CK-MB	▮	▮	▮	5
D-dimer	▮	▮		2
Myoglobin	▮	▮		2
Troponin I	▮	▮	▮	5

The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for BNP and Troponin I to complete 15 PT challenges per year.

Program Information

- PCARM - Five 1.5-mL liquid EDTA plasma specimens for point-of-care instruments such as Quidel Triage Cardiac (CardiacHS, D-dimer, BNP, and SOB) and i-STAT
- PCARMX - All Survey PCARM specimens in duplicate
- PCARI - Five 0.29-mL liquid plasma specimens for use with Quidel Triage Cardio 2, Cardio 3, and Troponin I panels
- Three shipments per year

Whole Blood Chemistry Compatibility Matrix

Whole Blood Analyzer/Method	Analyte	Compatible Survey Programs	Page
Hemocue®	Glucose	HCC	66
Roche Reflotron®	Cholesterol	C1, C4	56-57

	HCC	HCC2	
Hematocrit		▮	2
Hemoglobin	▮	▮	2
Urinalysis/urine hCG		▮	2
Whole blood glucose	▮	▮	2 (HCC)/3 (HCC2)

Program Information

- HCC - Two 1.0-mL whole blood specimens; two shipments per year
- HCC2 - Total of four shipments per year
- Hematocrit, hemoglobin, and urinalysis/urine hCG testing - Two 3.0-mL whole blood specimens and two 10.0-mL urine specimens; two shipments per year: A and C
- Whole blood glucose testing - Three 2.5-mL whole blood specimens; two shipments per year: B and D
- To verify instrument compatibility, refer to the instrument matrix on this page

Whole Blood Creatinine WBCR

Analyte	Program Code	Challenges per Shipment
	WBCR	
Creatinine	▮	5

Program Information

- Five 4.0-mL whole blood specimens
- For use with the Nova StatSensor/StatSensor Xpress
- Three shipments per year

Quality Cross Check—Whole Blood Glucose WBGQ

Analyte	Program Code	Challenges per Shipment
	WBGQ	
Glucose	▮	3

The CAP Accreditation Program requires all accredited laboratories performing waived whole blood glucose testing using glucose meters to perform alternative performance assessment. This program can be used to meet alternative performance assessment requirements.

Program Information

- Three 2.0-mL whole blood specimens
- Report up to 30 instruments
- Two shipments per year

CE credit

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Chemistry/TDM, Validated Material

Validated Material	Program Code	Corresponding Survey	Pages
Chemistry/TDM	CZVM	CZ	56-58

Program Information

- Five 5.0-mL liquid serum specimens

Urine Chemistry

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Urine Chemistry—General U

Analyte	Program Code	Challenges per Shipment
	U

Fecal calprotectin	▮	3

Program Information
- Three 1.0-g simulated fecal specimens
- Two shipments per year

Fecal Fat FCFS

Analyte	Program Code	Challenges per Shipment
	FCFS	
Fecal fat, qualitative	▮	2

Program Information
- Two 10.0-g simulated fecal fat specimens
- For microscopic detection of neutral fats (triglycerides) and/or split fats (total free fatty acids)
- Two shipments per year

Fructosamine FT

Analyte	Program Code	Challenges per Shipment
	FT	
Fructosamine	▮	2

Program Information
- Two 1.0-mL liquid serum specimens
- Two shipments per year

Glucose-6-Phosphate Dehydrogenase G6PDS

Analyte	Program Code	Challenges per Shipment
	G6PDS	
G6PD, qualitative and quantitative	▮	2

Program Information
- Two 0.5-mL lyophilized hemolysate specimens
- Two shipments per year

Lipoprotein-Associated Phospholipase A_2 PLA

Analyte	Program Code	Challenges per Shipment
	PLA	
Lipoprotein-associated phospholipase (Lp-PLA_2) activity	▮	2

Program Information
- Two 1.0-mL liquid specimens
- Two shipments per year

Lipoprotein and Protein Electrophoresis LPE, SPE, UBJP

Analyte	Program Code			Challenges per Shipment
	LPE	SPE	UBJP	
Lipoprotein electrophoresis	▮			2
IgA, quantitation		▮		2
IgG, quantitation		▮		2
IgM, quantitation		▮		2
M-protein (Paraprotein) identification		▮		2
Protein, total		▮		2
Protein electrophoresis		▮		2
Protein electrophoresis pattern interpretation		▮		2
Urine Bence Jones protein			▮	2

Program Information

- LPE - Two 1.0-mL liquid serum specimens
- SPE - Two 1.0-mL lyophilized serum specimens; two educational protein electrophoresis dry challenges per year
- UBJP - Two 10.0-mL urine specimens
- Two shipments per year

CE credit

Lamellar Body Count LBC

Procedure	Program Code	Challenges per Shipment
	LBC	
Lamellar body count	▮	3

Program Information

- Three 2.0-mL simulated liquid amniotic fluid specimens
- For use with LBC methods performed on all hematology analyzers
- Two shipments per year

Plasma Hemoglobin PHG

Analyte	Program Code	Challenges per Shipment
	PHG	
Plasma hemoglobin	▮	2

Program Information

- Two 2.0-mL liquid specimens
- Two shipments per year

Procalcitonin PCT

Analyte	Program Code	Challenges per Shipment
	PCT	
Procalcitonin	▮	3

Program Information
- Three 1.0-mL lyophilized serum specimens
- Two shipments per year

Pseudocholinesterase C7

Analyte	Program Code	Challenges per Shipment
	C7	
Pseudocholinesterase	▮	1

Program Information
- One 2.0-mL lyophilized serum specimen
- Three shipments per year

CE credit

Salivary Cortisol SALC

Analyte	Program Code	Challenges per Shipment
	SALC	
Salivary cortisol	▮	3

Program Information
- Three 1.0-mL synthetic oral fluid specimens
- Two shipments per year

Accuracy-Based Testosterone, Estradiol ABS

Analyte	Program Code	Challenges per Shipment
	ABS	
Albumin	▮	3
Cortisol	▮	3
Estradiol	▮	3
Follicle-stimulating hormone (FSH)	▮	3
Luteinizing hormone (LH)	▮	3
Sex hormone-binding globulin (SHBG)	▮	3
Testosterone	▮	3
Thyroid-stimulating hormone (TSH)	▮	3

Program Information
- Three 1.0-mL human serum specimens
- Two shipments per year

Additional Information

The Centers for Disease Control and Prevention (CDC) will set target values for testosterone and estradiol using the established reference methods.

Total Bile Acids TBLA

Analyte	Program Code	Challenges per Shipment
	TBLA	
Total bile acids	▮	3

Program Information

- Three 5.0-mL liquid serum specimens
- Two shipments per year

Trace Metals R

Analyte	Program Code	Challenges per Shipment
	R	
Aluminum	▮	3
Chromium	▮	3
Copper	▮	3
Manganese	▮	3
Selenium	▮	3
Zinc	▮	3

Program Information

- Three 5.0-mL liquid serum specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Trace Metals, Urine TMU

Analyte	Program Code	Challenges per Shipment
	TMU	
Aluminum	▮	2
Arsenic	▮	2
Chromium	▮	2
Cobalt	▮	2
Copper	▮	2
Lead	▮	2
Manganese	▮	2
Mercury	▮	2
Selenium	▮	2
Thallium	▮	2
Zinc	▮	2

Program Information

- Two 25.0-mL urine specimens
- Conventional and International System of Units (SI) reporting offered
- For laboratories that monitor trace metals at normal and toxic levels
- Two shipments per year

Trace Metals, Whole Blood TMWB

Analyte	Program Code	Challenges per Shipment
	TMWB	
Aluminum	▮	3
Arsenic, total	▮	3
Chromium	▮	3
Cobalt	▮	3
Copper	▮	3
Manganese	▮	3
Mercury	▮	3
Selenium	▮	3
Thallium	▮	3
Zinc	▮	3

Program Information

- Three 6.0-mL whole blood specimens
- Conventional and International System of Units (SI) reporting offered
- For laboratories that monitor trace metals at normal and toxic levels
- Two shipments per year

Sweat Analysis Series SW1, SW2, SW4

Analyte	Program Code	Challenges per Shipment
	SW1, SW2, SW4	
Chloride	▮	3
Conductivity	▮	3

For method compatibility, see chart below.

Program Information

- SW1, SW2, SW4 - Three 5.0-mL simulated liquid human sweat specimens
- Two shipments per year

Sweat Analysis Series Compatibility Matrix

Method/Procedure	Program Code			Materials Included
	SW1	SW2	SW4	
Orion direct electrode	▮			Precut 2-cm diameter Whatman filter papers
Wescor Macroduct™ and Nanoduct® Systems		▮		22-gauge blunt-tipped needles
All other methodologies			▮	No additional materials provided

Viscosity V

Analyte	Program Code	Challenges per Shipment
	V	
Viscosity	▮	2

Program Information
- Two 10.0-mL serum specimens
- Two shipments per year

Soluble Transferrin Receptor STFR

Analyte	Program Code	Challenges per Shipment
	STFR	
Soluble transferrin receptor (sTfR)	▮	3

Program Information
- Three 2.5-mL liquid human serum specimens
- Two shipments per year

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Cerebrospinal Fluid, Validated Material

Validated Material	Program Code	Corresponding Survey	Page
Cerebrospinal Fluid	MVM	M	74

Program Information
- Three 5.0-mL simulated liquid spinal fluid specimens

Help pathologists stay current with rapidly changing issues in clinical pathology.

The **Clinical Pathology Improvement Program (CPIP)** provides peer-reviewed, interactive, case-based learning activities that cover a diverse portfolio of real-life clinical scenarios. Every month, you receive a new online module with images and clinical details that unfold as you solve the case in real time. Earn CME/SAM credits upon successful completion of the posttest.

Add CPIP/CPIP1 to your Surveys order.

7 Endocrinology

Be confident in the accuracy of your C-peptide and insulin testing.

- Test your results against reference method targets with the Accuracy-Based Glucose, Insulin, and C-Peptide (ABGIC) program.
- Identify instrument issues *before* they impact patient results with the C-Peptide/Insulin Calibration Verification/Linearity (LN46) program.

New Analyte Additions NEW

Accuracy-Based Vitamin D (ABVD) 85

Endocrinology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Ligand—General K, KK, K2

Program Information

- K - Five 5.0-mL liquid serum specimens; three shipments per year
- KK - Five 5.0-mL liquid serum specimens in duplicate; three shipments per year
- K2 - Three 5.0-mL liquid serum specimens; two shipments per year

MMA and Active B_{12} MMA

Analyte/Procedure	Program Code	Challenges per Shipment
	MMA	
Active vitamin B_{12}	▮	3
Methylmalonic acid	▮	3

Program Information

- Three 1.0-mL lyophilized serum specimens
- Two shipments per year

B-Type Natriuretic Peptides BNP, BNP5

Analyte	Challenges per Shipment	
	Program Code	
	BNP	BNP5
BNP	2	5
NT-proBNP	2	5

Additional Information

- The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for BNP and NT-proBNP to complete 15 PT challenges per year.
- For i-STAT®, use Plasma Cardiac Markers programs PCARM or PCARMX.
- For second instrument reporting options, see the Quality Cross Check program, BNPQ, below.

Program Information

- BNP - Two 1.0-mL liquid plasma specimens
- Conventional and International System of Units (SI) reporting offered; two shipments per year
- BNP5 - Five 1.0-mL liquid plasma specimens
- Conventional and International System of Units (SI) reporting offered; three shipments per year

Quality Cross Check—BNP BNPQ

Analyte	Program Code	Challenges per Shipment
	BNPQ	
BNP	▮	3
NT-proBNP	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey BNP or BNP5 above. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 1.5-mL liquid specimens
- Report up to three instruments
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Ligand—Special Y, YY, DY

Analyte	Program Code		Challenges per Shipment
	Y, YY	DY	
11-deoxycortisol	▮		3

Program Information

- Y - Three 5.0-mL liquid serum specimens in duplicate
- YY - Three 5.0-mL liquid serum specimens in triplicate
- DY - Must order in conjunction with Survey Y or YY
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Antimüllerian Hormone AMH

Analyte	Program Code	Challenges per Shipment
	AMH	
Antimüllerian hormone	▮	3

Program Information

- Three 1.0-mL lyophilized serum specimens
- Two shipments per year

25-OH Vitamin D, Total VITD

Analyte	Program Code	Challenges per Shipment
	VITD	
25-OH vitamin D, total	▮	3

Program Information

- Three 1.0-mL liquid serum specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Bone and Growth BGS

Analyte	Program Code	Challenges per Shipment
	BGS	
IGF-1 (somatomedin C)	▮	3
Osteocalcin	▮	3

Program Information

- Three 1.0-mL liquid serum specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Accuracy-Based Vitamin D ABVD

Analyte	Program Code	Challenges per Shipment
	ABVD	
25-OH vitamin D (D2 and D3)	▮	3
Calcium NEW	▮	3

Additional Information

- The Centers for Disease Control and Prevention (CDC) will establish reference targets using isotope-dilution LC-MS/MS method.
- Specimens are collected by a modified application of Clinical Laboratory and Standards Institute Guideline CLSI C37-A, *Preparation and Validation of Commutable Frozen Human Serum Pools as Secondary Reference Materials for Cholesterol Measurement Procedures; Approved Guideline.*

Program Information

- Three 1.0-mL liquid human serum specimens
- Serum is from multi-donor endogenous pools
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Bone and Mineral Metabolism, Urine BU

Analyte	Program Code	Challenges per Shipment
	BU	
C-telopeptide (CTx)	▮	2
Creatinine	▮	2
Deoxypyridinoline (DPD)	▮	2
N-telopeptide (NTx)	▮	2
Pyridinoline (PYD)	▮	2

- Two 2.0-mL lyophilized human urine specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Bone Markers and Vitamins BMV1, BMV2, BMV3, BMV4, BMV5, BMV6

Analyte	Program Code						Challenges per Shipment
	BMV1	BMV2	BMV3	BMV4	BMV5	BMV6	
1,25 dihydroxy vitamin D	▮						3
Bone-specific alkaline phosphatase		▮					3
Vitamin A			▮				3
Vitamin E (alpha tocopherol, gamma tocopherol)				▮			3
C-telopeptide					▮		3
N-telopeptide						▮	3

Program Information

- BMV1 through BMV4 - Three 5.0-mL liquid serum specimens for each program
- BMV5 and BMV6 - Three 1.0-mL liquid serum specimens for each program
- Two shipments per year

Insulin, Gastrin, C-Peptide, and PTH ING

Analyte	Program Code	Challenges per Shipment
	ING	
C-peptide	▮	3
Gastrin	▮	3
Insulin	▮	3
Parathyroid hormone (PTH)	▮	3

Program Information

- Three 5.0-mL lyophilized serum specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Accuracy-Based Glucose, Insulin, and C-Peptide ABGIC

Analyte	Program Code	Challenges per Shipment
	ABGIC	
C-peptide	▮	3
Glucose	▮	3
Insulin	▮	3

Program Information

- Three 1.0-mL serum specimens
- Two shipments per year

Additional Information

- Target values are based upon the isotope-dilution gas chromatography-mass spectrometry reference measurement procedure for glucose performed by the CDC Reference Laboratory, Division of Laboratory Sciences, Centers for Disease Control and Prevention (Atlanta, GA).
- Target values for C-peptide are established by isotope-dilution mass spectrometry, performed at the University of Missouri, Diabetes Diagnostic Laboratory.

Quality Cross Check—Parathyroid Hormone PTHQ

Analyte	Program Code	Challenges per Shipment
	PTHQ	
Parathyroid hormone (PTH)	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey ING on page 86. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 5.0-mL lyophilized serum specimens in duplicate
- Report up to three instruments
- Two shipments per year

Second Trimester Maternal Screening FP, FPX

Analyte	Program Code	Challenges per Shipment
	FP, FPX	
Alpha-fetoprotein (AFP), amniotic fluid	▮	2
Alpha-fetoprotein (AFP), serum	▮	5
Dimeric inhibin A (DIA)	▮	5
Estriol, unconjugated (uE3)	▮	5
Human chorionic gonadotropin (hCG), quantitative	▮	5

The CAP designed these Surveys for laboratories using AFP and hCG for prenatal screening purposes only. For all other applications, see Survey K or KK on page 82.

Program Information

- FP - Five 1.0-mL liquid serum specimens; two 1.0-mL simulated amniotic fluid specimens
- FPX - All Survey FP serum specimens in duplicate; two 1.0-mL simulated amniotic fluid specimens
- Three shipments per year

First Trimester Maternal Screening FP1T, FP1B

Analyte	Program Code		Challenges per Shipment
	FP1T	FP1B	
Total hCG	▮		5
Free beta hCG		▮	5
PAPP-A	▮	▮	5

The CAP designed these Surveys for laboratories using hCG for prenatal screening purposes only. For all other applications, see Survey K or KK on page 82.

Program Information

- FP1T - Five 1.0-mL serum specimens
- FP1B - Five 1.0-mL serum specimens
- Three shipments per year

Noninvasive Prenatal Testing NIPT

Analyte	Program Code	Challenges per Shipment
	NIPT	
Cell-free DNA screening for fetal aneuploidy	▮	3

Noninvasive prenatal testing is an exercise and is not considered proficiency testing. This exercise may be used to meet the requirements for alternative assessment.

Program Information
- Three maternal plasma samples
- Two shipments per year

Erythropoietin EPO

Analyte	Program Code	Challenges per Shipment
	EPO	
Erythropoietin	▮	2

Program Information
- Two 1.5-mL serum specimens
- Two shipments per year

CE credit

Fetal Fibronectin FF

Analyte	Program Code	Challenges per Shipment
	FF	
Fetal fibronectin	▮	2

Program Information
- Two 1.2-mL liquid specimens
- Two shipments per year

RBC Folate FOL

Analyte	Program Code	Challenges per Shipment
	FOL	
RBC folate	▮	2

Program Information
- Two 2.0-mL lyophilized whole blood specimens
- Conventional and International System of Units (SI) reporting offered
- Three shipments per year

Renin and Aldosterone RAP

Analyte	Program Code	Challenges per Shipment
	RAP	
Aldosterone	▮	3
Renin	▮	3

Program Information

- Three 2.0-mL lyophilized plasma specimens
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Tumor Markers TM, TMX

Analyte	Program Code	Challenges per Shipment
	TM, TMX	
Adrenocorticotropic hormone (ACTH)	▮	3
Beta-2 microglobulin	▮	3
CA 15-3	▮	3
CA 19-9	▮	3
CA 27.29	▮	3
CA 72-4	▮	3
CA 125	▮	3
Calcitonin	▮	3
Thyroglobulin	▮	3

Program Information

- TM - Three 2.0-mL liquid serum specimens
- TMX - All Survey TM specimens in duplicate
- Two shipments per year

Human Epididymis Protein 4 HUEP

Analyte	Program Code	Challenges per Shipment
	HUEP	
Human epididymis protein 4	▮	3

Program Information

- Three 1.0-mL lyophilized serum specimens
- Two shipments per year

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Endocrinology, Validated Materials

Validated Material	Program Code	Corresponding Survey	Page
Ligand—General	KVM	K	82
Ligand—Special	YVM	Y	84

- KVM - Five 5.0-mL liquid serum specimens; three shipments per year
- YVM - Three 5.0-mL liquid serum specimens in duplicate; two shipments per year

We are here to help. Fast Focus on Compliance—the inspector's quick guide.

A resource for laboratories and inspectors alike, our Fast Focus on Compliance mini-training vignettes help you prepare for future laboratory inspections by gaining a clear understanding of the requirements and receiving insight into areas that need improvement:

- What Did You REALLY Mean...How to Write a "Good" Deficiency
- Identifying Systemic Issues—Critical Role of the Inspection Team Leader
- Inspecting Method Validation/Verification Studies
- Inspecting Personnel Records
- 12 Inspector Tools to Make Your Inspection Go More Smoothly
- Proficiency Testing Referral and Communications

Access these concentrated topics online by searching *Fast Focus on Compliance* at cap.org

8 Blood Gas, Critical Care, and Oximetry

Our programs closely mimic patient testing to ensure accuracy.

- Test specimen levels that reflect clinical decision points.
- Keep current with the latest laboratory best practices with educational content supplied in our participant summary reports.
- Gain confidence in your results by comparing performance against the largest peer groups.

Blood Gas, Critical Care, and Oximetry

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 1.2-mL liquid specimens in triplicate
- Report up to three instruments
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

9 Toxicology

Toxicology testing is changing at a rapid pace—so is our proficiency testing.

Introducing new programs for forensic toxicology and toxicology laboratories that perform:

- Qualitative and/or quantitative analysis of synthetic opioids and benzodiazepines in whole blood (NOB)
- Qualitative and/or quantitative analysis of cannabinoids in whole blood (THCB)

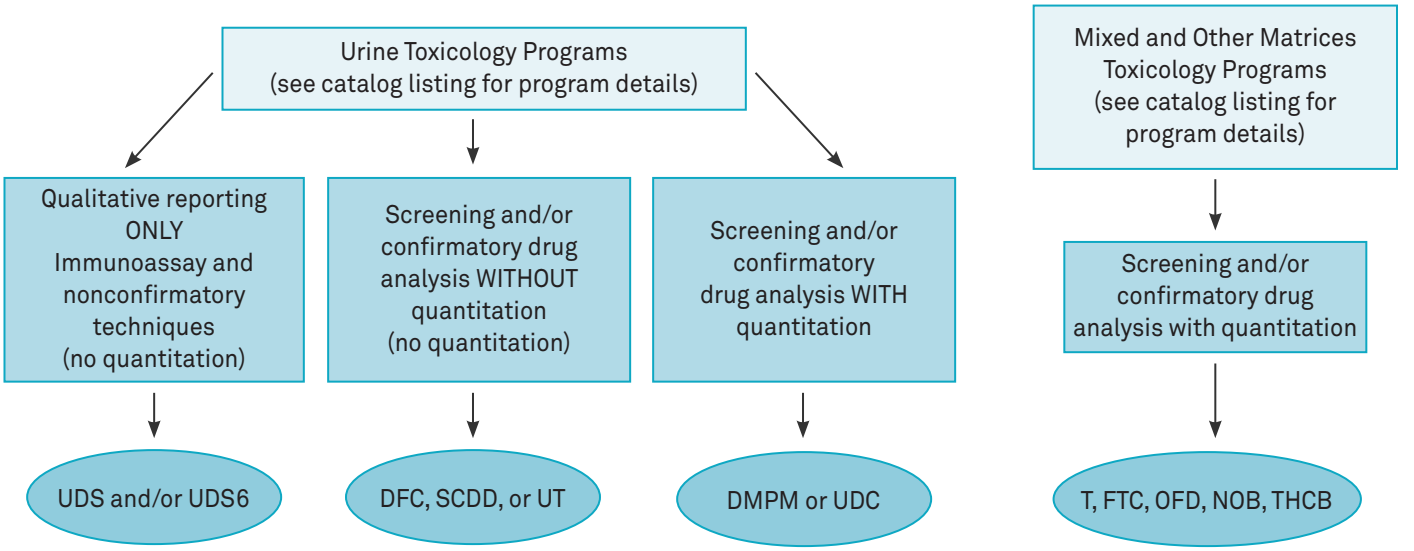
New Analyte/Drug Additions NEW

Toxicology (T) 96
Urine Toxicology (UT) 96
CAP/AACC Urine Drug Testing, Screening (UDS) 98
CAP/AACC Urine Drug Testing, Screening, Limited (UDS6) 98
CAP/AACC Forensic Urine Drug Testing, Confirmatory (UDC) 99
Oral Fluid for Drugs of Abuse (OFD) 100
Forensic Toxicology, Criminalistics (FTC) 104
Drug Monitoring for Pain Management (DMPM) 107
Drug-Facilitated Crime (DFC) 108

Toxicology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Use this flowchart as a guide for ordering appropriate toxicology Surveys for your laboratory's testing menu.



Toxicology T

Analyte	Program Code	Challenges per Shipment
	T	
See drug listing on next page	▮	5

Program Information

- A total of five specimens consisting of 20.0-mL liquid serum and 50.0-mL liquid urine specimens
- For laboratories performing qualitative and quantitative drug analysis on serum and qualitative analysis on urine specimens
- Three shipments per year

CE credit

Urine Toxicology UT

Analyte	Program Code	Challenges per Shipment
	UT	
See drug listing on next page	▮	5

Program Information

- Five 50.0-mL liquid urine specimens
- For laboratories performing qualitative drug analysis with qualitative confirmatory testing
- Three shipments per year

T and UT Programs Drug Listing

Challenges will include a mix of drugs from the list below.

6-acetylmorphine (6-AM)
7-aminoclonazepam
7-aminoflunitrazepam
Acetaminophen
Alpha-hydroxyalprazolam
Alprazolam
Amitriptyline
Amphetamine
Amphetamine group
Aripiprazole
Atenolol
Atropine
Barbiturate group
Benzodiazepine group
Benzoylecgonine
Brompheniramine
Buprenorphine
Bupropion
Butalbital
Cannabinoids
Carbamazepine
Carbamazepine-10, 11-epoxide
Carisoprodol
Chlordiazepoxide
Chlorpheniramine
Citalopram
Clomipramine
Clonazepam
Clozapine
Cocaethylene
Cocaine
Codeine
Cotinine
Cyclobenzaprine
Delta-9-THC (serum only)
Delta-9-THC-COOH
Demoxepam NEW
Desipramine
Desmethylclomipramine
Desmethylcyclobenzaprine*
Desmethylsertraline
Dextromethorphan
Diazepam
Dihydrocodeine
Diltiazem
Diphenhydramine
Doxepin
Doxylamine
Duloxetine
Ecgonine ethyl ester
Ecgonine methyl ester

Synthetic Cannabinoid/Designer Drugs SCDD

Analyte	Program Code	Challenges per Shipment
	SCDD	
Synthetic cannabinoid/designer drugs	▮	3

Additional Information

Synthetic cannabinoids and designer drug stimulants are widespread and constantly changing in respect to the available chemical moieties. In order to stay contemporary, the CAP has decided to modify the compounds in this program in accordance with the appearance and prevalence of new compounds.

Program Information

- Three 10.0-mL urine specimens
- For laboratories that perform screening and confirmatory testing for the compounds found in this program
- Two shipments per year

CE credit

SCDD Program Drug Listing

Challenges will include a mix of drugs.

For the most current list of drugs, please go to cap.org. Under the Laboratory Improvement tab, click on Catalog and Ordering Information. The list is located under the PT Order Supplements header.

Novel Opioids and Benzodiazepines NOB

Analyte	Program Code	Challenges per Shipment
	NOB	
Novel opioids and benzodiazepines	▮	3

Program Information

- Three 15.0-mL whole blood specimens
- For forensic and toxicology laboratories that perform qualitative and/or quantitative analysis of synthetic opioids and benzodiazepines
- Two shipments per year

CE credit

NOB Program Drug Listing

Challenges will include a mix of drugs.

For the most current list of drugs, please go to cap.org. Under the Laboratory Improvement tab, click on Catalog and Ordering Information. The list is located under the PT Order Supplements header.

Blood Cannabinoids THCB

Analyte	Program Code	Challenges per Shipment
	THCB	
Delta-9-THC	▮	3
Delta-9-THC-COOH	▮	3
11-hydroxy-THC	▮	3

Program Information

- Three 10.0-mL whole blood specimens
- For toxicology laboratories that perform qualitative and/or quantitative analysis of cannabinoids in blood
- Two shipments per year

Antifungal Drugs Monitoring AFD

Analyte	Program Code	Challenges per Shipment
	AFD	
Fluconazole	▮	3
Itraconazole	▮	3
Posaconazole	▮	3
Voriconazole	▮	3

Program Information

- Three 2.0-mL serum specimens
- For laboratories performing quantitative analysis of antifungal agents
- Two shipments per year

Urinalysis Benchtop Reference Guide (UABRG)

- Thirty-four different cell identifications, including common and rare cells
- Detailed descriptions for each cell morphology
- Eight tabbed sections for easy reference
  - Urinary Cells
  - Urinary Casts
  - Urinary Crystals
    - At Acid pH
    - At Neutral or Acid pH
    - At Neutral or Alkaline pH
  - Organisms
  - Miscellaneous/Exogenous
- A durable and water-resistant format to withstand years of benchtop use—5” x 6½”

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Toxicology, Validated Material

Validated Material	Program Code	Corresponding Survey	Page

Program Information

- Five 10.0-mL liquid urine specimens
- Three shipments per year

Clinical Toxicology Testing: A Guide for Laboratory Professionals, Second Edition (PUB227)

This book is a practical guide, written for pathologists, to directing hospital toxicology laboratory operations. This new edition features expanded sections on testing in the clinical setting, methodologies, and more user-friendly information on specific analytes. It provides the reader with a comprehensive view of what is needed—and expected—when offering a clinical toxicology service.

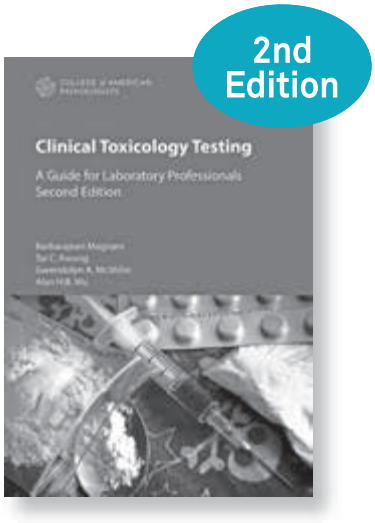
Contents include:

- Toxicology testing in the clinical setting, including new chapters on pediatric testing and chronic opioid therapy
- Toxicokinetics and methodologies, with new and expanded information on laboratory-developed tests, screening assays, targeted tests, and oral fluids and alternative matrices
- Specific analytes, including novel psychoactive substances and the use of medical cannabis
- Appendices on such useful topics as urine and serum screens, therapeutic drug monitoring, and proficiency testing

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: PUB227
Softcover; 2019

Are you ready for your CAP inspection?

The CAP Accreditation Readiness Assessment (CARA®) is an on-site evaluation and education program for laboratories just beginning their pursuit of CAP accreditation.

CARA focuses on:

- Facilitating an in-depth understanding of CAP requirements as they apply to your laboratory
- Helping you manage the time and resources necessary for compliance with CAP accreditation requirements and preparation for your initial inspection
- Delivering on-site education when you're ready for it

Leverage the expertise of the world's most respected pathology organization.

"The Readiness Assessment [CARA] helped our lab immediately spot potential problems before our inspection. Our CAP inspection went like clockwork."

– Laboratory Director

Email us at readiness-assessment@cap.org to accelerate your quality journey.

10 Accuracy-Based Programs

Gain more value from your accreditation program.

CAP accreditation is more than "something to check off your list." It is an opportunity to help keep your laboratory operating at peak performance.

- The CAP offers educational material and support, including highly-trained medical technologists who are available to answer questions.
- The peer inspection model helps participants develop meaningful connections, learn from each other, and share best practices.

Thyroid-stimulating hormone (TSH)	▮	3

Program Information

- Three 1.0-mL human serum specimens
- Two shipments per year

Additional Information

The Centers for Disease Control and Prevention (CDC) will set target values for testosterone and estradiol using the established reference methods.

Accuracy-Based Urine ABU

Analyte	Program Code	Challenges per Shipment
	ABU	
Calcium	▮	3
Creatinine	▮	3
Protein, total	▮	3
Urine albumin, quantitative	▮	3
Urine albumin: creatinine ratio	▮	3

Target values for albumin are obtained by LC-MS/MS after trypsin digestion, performed by the Renal Testing Laboratory, Mayo Clinic, Rochester, MN, using calibration materials prepared from human serum albumin (>99% pure).

Other analytes will be compared by peer group for harmonization purposes.

Program Information

- Three 5.0-mL human urine specimens
- Two shipments per year

Creatinine Accuracy Calibration Verification/Linearity LN24

Analyte	Program Code	
	LN24	LN24 Target Range
Creatinine	▮	0.6–4.0 mg/dL
Estimated glomerular filtration rate (eGFR)	▮	

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL human serum specimens
- Two shipments per year

Additional Information

The College of American Pathologists (CAP) and the National Kidney Disease Education Program (NKDEP) have an initiative to harmonize clinically reported creatinine values. This initiative is analogous to what the federal health agencies and the clinical laboratory community did to improve the accuracy of cholesterol and glycohemoglobin testing.

Harmonized Thyroid ABTH

Analyte	Program Code	Challenges per Shipment
	ABTH	
Triiodothyronine (T3), free	▮	3
Triiodothyronine (T3), total	▮	3
Thyroxine (T4), free	▮	3
Thyroxine (T4), total	▮	3
Thyroid-stimulating hormone (TSH)	▮	3

Program Information
- Three 1.0-mL frozen human serum specimens
- Two shipments per year

Additional Information
- Analytes will be evaluated using harmonization.
- Specimens are collected by a modified application of Clinical Laboratory and Standards Institute Guideline CLSI C37-A, *Preparation and Validation of Commutable Frozen Human Serum Pools as Secondary Reference Materials for Cholesterol Measurement Procedures; Approved Guideline.*

Hemoglobin A_{1c} Accuracy Calibration Verification/Linearity LN15

Analyte	Program Code	
	LN15	LN15 Target Range
Hemoglobin A_{1c}	▮	5%–12%

CAP-assigned target values derived from Hemoglobin A_{1c} measurements assayed by National Glycohemoglobin Standardization Program (NGSP) secondary reference laboratories.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 0.8-mL liquid human whole blood specimens
- Two shipments per year

Hemoglobin A_{1c} GH2, GH5

Analyte	Challenges per Shipment	
	Program Code	
	GH2	GH5
Hemoglobin A_{1c}	3	5

Additional Information

- These Surveys will be evaluated against the National Glycohemoglobin Standardization Program (NGSP) reference method.
- The College of American Pathologists Accreditation Program requires all accredited laboratories performing non-waived testing for Hemoglobin A_{1c} to complete 15 PT challenges per year.
- For second instrument reporting options, see the Quality Cross Check program, GHQ, on page 63.

Program Information

- GH2 - Three 0.8-mL liquid human whole blood specimens; two shipments per year
- GH5 - Five 0.8-mL liquid human whole blood specimens; three shipments per year

Accuracy-Based Glucose, Insulin, and C-Peptide ABGIC

Analyte	Program Code	Challenges per Shipment
	ABGIC	
C-peptide	▮	3
Glucose	▮	3
Insulin	▮	3

Additional Information

- Target values are based upon the isotope-dilution gas chromatography-mass spectrometry reference measurement procedure for glucose performed by the CDC Reference Laboratory, Division of Laboratory Sciences, Centers for Disease Control and Prevention (Atlanta, GA).
- Target values for C-peptide are established by isotope-dilution mass spectrometry, performed at the University of Missouri, Diabetes Diagnostic Laboratory.

Program Information

- Three 1.0-mL serum specimens
- Two shipments per year

The CAP is your trusted calibration verification and linearity partner, providing you with the most comprehensive menu of programs.

- **Large peer groups**—Maximize confidence in instrument calibration by using peer group data for a broader view beyond your laboratory.
- **Customized report package**—Let our team of biostatisticians perform the statistical analysis of your results so you do not have to.
- **Expedited results**—View your linearity evaluation for most CVL programs within two business days of data submission.

See the Instrumentation Verification Tools section of this catalog to determine programs that best fit your laboratory's CVL needs.

Validated Materials

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Chemistry, Validated Materials

Calibration Verification/Linearity

The CAP CVL program

The CAP is your trusted calibration verification and linearity partner. Our CVL program will help you meet both CLIA regulations and CAP Laboratory Accreditation Program requirements for calibration and analytical measurement range verification under 42 CFR493.1255(bX3). Do not let instrument problems impact your patient results; use the calibration verification and linearity studies to ensure your instrument and method are performing to their optimal levels.

With your enrollment in the CAP CVL program you will receive:

- **Testing Kit**
  - Kit instructions—Contain important information to help you complete testing and accurately report your results
  - Result form
  - Specimens—The majority of CAP CVL programs offer human-based materials to closely mimic your patient results
- **Customized Report Package**
  - Executive Summary—A quick overview of both your calibration verification and linearity results for all reported analytes
  - Calibration Verification Evaluation
  - Linearity Evaluation
    - Rapid result turnaround is complimentary for most CVL programs. View your linearity evaluations within two business days of submission by logging into e-LAB Solutions Suite.
  - Linearity Troubleshooting Report
  - Participant Summary—A summary of laboratory performance that includes peer group statistics and enhanced diagnostic information for early insight into potential problems
- **Additional Tools**
  - Calibration Verification/Linearity Program User's Guide—Get assistance in interpreting your evaluations and reports as well as helpful troubleshooting information with suggested actions. Also available online by logging into e-LAB Solutions Suite
  - Calibration Verification Troubleshooting Guide—The guide provides suggested actions if you receive a calibration verification result of Different, or if your evaluation result is Verified over a range that does not include all of your reported results
  - Calibration Verification/Linearity Surveys Investigation Checklist for Problematic Results—Interpretative checklists are included to help with troubleshooting and documentation

LN46 - C-Peptide/Insulin CVL	131	ING	86

All CVL Surveys provide individual evaluation reports by analytes, an executive summary, and graphical plots for linearity and calibration verification.

Chemistry, Lipid, Enzyme Calibration Verification/Linearity LN2, LN2BV

Analyte	Program Code	LN2	LN2BV		Units
	LN2, LN2BV	(All Instruments)	All Beckman (except AU)	Vitros	
Albumin	▮	1.5–9.0			g/dL
Calcium	▮	4.0–18.0			mg/dL
Chloride	▮	60–180			mmol/L
CO_2	▮	7–42			mmol/L
Creatinine	▮	0.8–34.0			mg/dL
Glucose	▮	20–750			mg/dL
Iron	▮	10–950			µg/dL
Magnesium	▮	0.3–9.0			mg/dL
Osmolality	▮	200–600			mOsm/kg H_2O
Phosphorus	▮	0.5–22.0			mg/dL
Potassium	▮	1.5–13.0			mmol/L
Protein	▮	1.5–12.0			g/dL
Sodium	▮	65–195			mmol/L
Urea nitrogen/Urea	▮	5–170			mg/dL
Uric acid	▮	1–25			mg/dL
Alkaline phosphatase	▮	25–1,800	25–1,000	25–1,100	U/L
ALT (SGPT)	▮	10–900	10–650	30–700	U/L
Amylase	▮	30–1,800	30–900	30–800	U/L
AST (SGOT)	▮	10–900	10–500	10–700	U/L
Creatine kinase	▮	25–2,000	25–1,200	25–700	U/L
CK-2 (MB) Mass	▮	1–250	1–300	1–200	ng/mL
Gamma glutamyl transferase	▮	10–1,400	10–900	10–1,100	U/L
Lactate dehydrogenase	▮	50–1,800	50–700	185–3,000	U/L
Lipase	▮	20–1,400	20–190	150–2,500	U/L
Bilirubin, direct	▮	0.1–10.0			mg/dL
Bilirubin, total	▮	0.2–25.0			mg/dL
Cholesterol	▮	35–625			mg/dL
HDL	▮	7–120			mg/dL
Triglycerides	▮	20–700			mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Seven 5.0-mL liquid serum specimens for basic chemistry, six 3.0-mL liquid serum specimens for direct and total bilirubin, seven 2.0-mL liquid serum specimens for lipids, and seven 5.0-mL liquid serum specimens for enzymes
- LN2 – Appropriate for most major instruments
- LN2BV – Appropriate for Beckman (except AU) and Vitros instruments only
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Therapeutic Drug Monitoring Calibration Verification/Linearity LN3

Analyte	Program Code	
	LN3	LN3 Target Ranges
Acetaminophen	▮	20–450 µg/mL
Amikacin	▮	2–45 µg/mL
Carbamazepine	▮	2–18 µg/mL
Digoxin	▮	0.5–4.4 ng/mL
Gentamicin	▮	1–11 µg/mL
Lidocaine	▮	1–10 µg/mL
Lithium	▮	0.3–4.0 mmol/L
N-acetylprocainamide (NAPA)	▮	2–25 µg/mL
Phenobarbital	▮	8–70 µg/mL
Phenytoin	▮	5–35 µg/mL
Primidone	▮	1–22 µg/mL
Procainamide	▮	2–18 µg/mL
Quinidine	▮	0.4–7.0 µg/mL
Salicylate	▮	7–90 mg/dL
Theophylline	▮	5–35 µg/mL
Tobramycin	▮	1–12 µg/mL
Valproic acid	▮	15–140 µg/mL
Vancomycin	▮	7–90 µg/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Six 4.0-mL liquid serum specimens
- A seventh 4.0-mL liquid serum specimen for acetaminophen and vancomycin
- Two shipments per year

Ligand Calibration Verification/Linearity LN5, LN5S

Analyte	Program Code	Target Ranges	
	LN5, LN5S*	LN5 Target Ranges	LN5S Target Ranges
AFP	▮	1.0–900.0 ng/mL	
CEA	▮	0.5–750.0 ng/mL	0.6–90.0 ng/mL
Cortisol	▮	1–65 µg/dL	
Ferritin	▮	2–1,100 ng/mL	
Folate	▮	1.3–20 ng/mL	
Human chorionic gonadotropin (hCG)	▮	5–14,000 mIU/mL	
Triiodothyronine (T3), total	▮	0.5–7.0 ng/mL	
Thyroxine (T4), total	▮	1–80 µg/dL	

Continued on the next page

Program Information

- LN5 - Eight 4.0-mL liquid serum specimens; appropriate for most major instruments except Siemens ADVIA Centaur, XP, and CP users
- LN5S - Thirteen 4.0-mL liquid serum specimens; appropriate for Siemens ADVIA Centaur, XP, and CP users
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Ligand Calibration Verification/Linearity
LN5, LN5S continued

Analyte	Program Code	Target Ranges	
	LN5, LN5S*	LN5 Target Ranges	LN5S Target Ranges
Thyroid-stimulating hormone (TSH)	▮	0.01–100 µIU/mL	
Vitamin B_{12}	▮	100–2,200 pg/mL	

*The LN5S CVL will allow Siemens ADVIA Centaur users to report other major instruments for analytes other than CEA, if needed.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- LN5 - Eight 4.0-mL liquid serum specimens; appropriate for most major instruments except Siemens ADVIA Centaur, XP, and CP users
- LN5S - Thirteen 4.0-mL liquid serum specimens; appropriate for Siemens ADVIA Centaur, XP, and CP users
- Two shipments per year

Urine Chemistry Calibration Verification/Linearity LN6

Analyte	Program Code	
	LN6	LN6 Target Ranges
Amylase	▮	40–1,500 U/L
Calcium	▮	5–30 mg/dL
Chloride	▮	20–330 mmol/L
Creatinine	▮	20–460 mg/dL
Glucose	▮	25–640 mg/dL
Osmolality	▮	30–1,800 mOsm/kg H_20
Phosphorus	▮	15–200 mg/dL
Potassium	▮	7–225 mmol/L
Protein, total	▮	10–235 mg/dL
Sodium	▮	20–340 mmol/L
Urea nitrogen/Urea	▮	20–2,000 mg/dL
Uric acid	▮	6–150 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Eighteen 4.0-mL liquid simulated urine specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Immunology Calibration Verification/Linearity LN7

Analyte	Program Code	
	LN7	LN7 Target Ranges
Alpha-1 antitrypsin	▮	25–616 mg/dL
Complement C3	▮	21–420 mg/dL
Complement C4	▮	5–100 mg/dL
IgA	▮	32–650 mg/dL
IgG	▮	150–3,000 mg/dL
IgM	▮	25–450 mg/dL
Transferrin	▮	38–950 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 2.0-mL liquid serum specimens
- Two shipments per year

Reproductive Endocrinology Calibration Verification/Linearity LN8

Analyte	Program Code	
	LN8	LN8 Target Ranges
Estradiol	▮	25–4,500 pg/mL
Follicle-stimulating hormone (FSH)	▮	3–190 mIU/mL
Human chorionic gonadotropin (hCG)	▮	5–8,000 mIU/mL
Luteinizing hormone (LH)	▮	2–190 mIU/mL
Progesterone	▮	1–50 ng/mL
Prolactin	▮	3–315 ng/mL
Testosterone	▮	20–1,500 ng/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 4.0-mL liquid serum specimens
- Two shipments per year

Hematology Calibration Verification/Linearity LN9

Analyte	Program Code	
	LN9	LN9 Target Ranges
Hemoglobin	▮	1.0–22.5 g/dL
Platelet count	▮	10–4,200 x 10^9/L
RBC count	▮	0.3–7.5 x 10^{12}/L
WBC count	▮	0.5–350.0 x 10^9/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Twenty 3.0-mL liquid specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Serum Ethanol Calibration Verification/Linearity LN11

Analyte	Program Code	
	LN11	LN11 Target Range
Serum ethanol	▮	15–550 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Seven 3.0-mL liquid serum specimens
- Two shipments per year

C-Reactive Protein; C-Reactive Protein, Extended Calibration Verification/Linearity LN12, LN12E

Analyte	Program Code		Program Code	
	LN12	LN12 Target Range	LN12E	LN12E Target Range
C-reactive protein	▮	5–110 mg/L	▮	6–320 mg/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Not appropriate for reporting high-sensitivity C-reactive protein (hsCRP). For reporting hsCRP, use LN21 on page 126.

Program Information

- LN12 - Five 1.0-mL liquid serum specimens; appropriate for Beckman Immage, Siemens Dimension, and Vitros instruments
- LN12E - Six 1.0-mL liquid serum specimens; appropriate for Abbott Architect, Beckman (except Immage), Roche, and Siemens (except Dimension) instruments
- Select program based on appropriate target range for assay used
- Two shipments per year

Blood Gas/Critical Care Calibration Verification/Linearity LN13, LN13C

Analyte	Program Code		Program Code	
	LN13	LN13 Target Ranges	LN13C	LN13C Target Ranges
pCO_2	▮	12–91 mm Hg	▮	12–91 mm Hg
pH	▮	6.83–7.82	▮	6.83–7.82
pO_2	▮	18–490 mm Hg	▮	18–490 mm Hg
Calcium, ionized			▮	0.15–3.3 mmol/L
Chloride			▮	62–148 mmol/L
Glucose			▮	10–465 mg/dL
Lactate			▮	0.2–18 mmol/L

Continued on the next page

Program Information

- LN13, LN13C - Ten 2.5-mL ampules of aqueous specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Blood Gas/Critical Care Calibration Verification/Linearity LN13, LN13C continued

Analyte	Program Code		Program Code	
	LN13	LN13 Target Ranges	LN13C	LN13C Target Ranges
Potassium			▮	0.5–10.7 mmol/L
Sodium			▮	83–172 mmol/L

Program Information
- LN13, LN13C - Ten 2.5-mL ampules of aqueous specimens
- Two shipments per year

Hemoglobin A_{1c} Accuracy Calibration Verification/Linearity LN15

Analyte	Program Code	
	LN15	LN15 Target Range
Hemoglobin A_{1c}	▮	5%–12%

CAP-assigned target values derived from Hemoglobin A_{1c} measurements assayed by National Glycohemoglobin Standardization Program (NGSP) secondary reference laboratories.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 0.8-mL liquid human whole blood specimens
- Two shipments per year

Homocysteine Calibration Verification/Linearity LN16

Analyte	Program Code	
	LN16	LN16 Target Range
Homocysteine	▮	5–65 µmol/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL liquid serum specimens
- Two shipments per year

Whole Blood Glucose Calibration Verification/Linearity LN17

Analyte	Program Code	
	LN17	LN17 Target Range
Whole blood glucose	▮	50–400 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Five 2.0-mL liquid whole blood specimens
- Report up to 10 different ancillary testing sites or instruments
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Reticulocyte Calibration Verification/Linearity LN18, LN19

Instrument/Method	Program Code		Program Code	
	LN18	LN18 Target Range	LN19	LN19 Target Range
Coulter Gen•S™, LH 500, LH 700 series, and UniCel DxH			▮	0.3%–27.0%
All other instruments	▮	0.3%–24.0%		

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- LN18 - Five 2.5-mL liquid whole blood specimens with pierceable caps
- LN19 - Five 3.0-mL liquid whole blood cell specimens with pierceable caps
- Two shipments per year

Urine Albumin Calibration Verification/Linearity LN20

Analyte	Program Code	
	LN20	LN20 Target Ranges
Urine albumin	▮	10–350 mg/L
Urine creatinine	▮	20–500 mg/dL

Program Information
- Six 5.0-mL urine specimens
- Two shipments per year

High-Sensitivity C-Reactive Protein Calibration Verification/Linearity LN21

Analyte	Program Code	
	LN21	LN21 Target Range
High-sensitivity C-reactive protein	▮	0.5–18.0 mg/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL liquid serum specimens
- For high-sensitivity methods only
- Two shipments per year

Flow Cytometry Calibration Verification/Linearity LN22

Analyte	Program Code	
	LN22	LN22 Target Ranges
CD3+	▮	50%–70% positive
CD3+ T lymphocytes absolute	▮	350–4,000 cells/µL
CD3+/CD4+	▮	1%–40% positive
CD3+/CD4+ T lymphocytes absolute	▮	6–2,000 cells/µL
CD3+/CD8+	▮	25%–40% positive
CD3+/CD8+ T lymphocytes absolute	▮	250–1,600 cells/µL

Program Information
- Seven 1.0-mL liquid whole blood specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Prostate-Specific Antigen Calibration Verification/Linearity LN23

Analyte	Program Code	
	LN23	LN23 Target Range
Prostate-specific antigen	▮	0.1–90.0 ng/mL

Program Information
- Twelve 1.0-mL liquid serum specimens
- Two shipments per year

Creatinine Accuracy Calibration Verification/Linearity LN24

Analyte	Program Code	
	LN24	LN24 Target Range
Creatinine	▮	0.6–4.0 mg/dL
Estimated glomerular filtration rate (eGFR)	▮	

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL human serum specimens
- Two shipments per year

Additional Information

The College of American Pathologists (CAP) and the National Kidney Disease Education Program (NKDEP) have an initiative to harmonize clinically reported creatinine values. This initiative is analogous to what the federal health agencies and the clinical laboratory community did to improve the accuracy of cholesterol and glycohemoglobin testing.

Troponin Calibration Verification/Linearity LN25, LN27

Analyte	Program Code		Program Code	
	LN25	LN25 Target Range	LN27	LN27 Target Range
Troponin I	▮	0.05–60.00 ng/mL		
Troponin T			▮	0.1–27.00 ng/mL

For LN27, view your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- LN25 - Seven 2.0-mL liquid serum specimens
- LN27 - Six 2.0-mL liquid serum specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

B-Type Natriuretic Peptides Calibration Verification/Linearity LN30

Analyte	Program Code	
	LN30	LN30 Target Ranges
BNP	▮	30–6,500 pg/mL
NT-proBNP	▮	50–50,000 pg/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 1.0-mL liquid plasma specimens
- Two shipments per year

Immunosuppressive Drugs Calibration Verification/Linearity LN31

Analyte	Program Code	
	LN31	LN31 Target Ranges
Cyclosporine	▮	60–1,200 ng/mL
Tacrolimus	▮	1.5–30.0 ng/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 2.0-mL liquid whole blood hemolysate specimens
- Two shipments per year

Ammonia Calibration Verification/Linearity LN32

Analyte	Program Code	
	LN32	LN32 Target Range
Ammonia	▮	13–900 µmol/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 2.0-mL aqueous specimens
- Two shipments per year

Serum Myoglobin Calibration Verification/Linearity LN33

Analyte	Program Code	
	LN33	LN33 Target Range
Myoglobin	▮	25–900 ng/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 1.0-mL liquid serum specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Tumor Markers Calibration Verification/Linearity LN34

Analyte	Program Code	
	LN34	LN34 Target Ranges
CA 125	▮	1–1,000 U/mL
CA 15-3	▮	2–190 U/mL
CA 19-9	▮	10–900 U/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Seven 3.0-mL liquid serum specimens
- Two shipments per year

Coagulation Calibration Verification/Linearity LN35, LN36, LN37

Analyte	Program Code			
	LN35	LN36	LN37	Target Ranges
Antithrombin activity	▮			10%–130%
Protein C activity	▮			10%–100%
Heparin, low molecular weight		▮		0.1–2.0 U/mL
Heparin, unfractionated		▮		0.1–1.3 U/mL
von Willebrand factor antigen			▮	5%–140%

The LN35, LN36, and LN37 CVL programs meet the CAP Accreditation requirements HEM.38009, 38010, and 38011.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- LN35, LN37 - Six 1.0-mL frozen plasma specimens per mailing
- LN36 - Twelve 1.0-mL frozen plasma specimens per mailing, which include six for low molecular weight heparin and six for unfractionated heparin
- Two shipments per year; ships on dry ice

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Viral Load Calibration Verification/Linearity LN38, LN39, LN45

Analyte	Program Code			
	LN38*	LN39	LN45	Target Ranges
CMV viral load	▮			316–1.0M IU/mL
HIV viral load		▮		50–5.0M IU/mL
HCV viral load			▮	50–280M IU/mL

*The biohazard warning applies to Survey LN38.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- LN38 - Six 1.5-mL frozen plasma specimens
- Two shipments per year; ships on dry ice

- LN39 - Six 2.5-mL plasma specimens
- LN45 - Seven 2.5-mL frozen DNA specimens
- Two shipments per year; ships on dry ice (dry ice does not apply to LN39)

Vitamin D Calibration Verification/Linearity LN40

Analyte	Program Code	
	LN40	LN40 Target Range
25-OH vitamin D, total	▮	4–140 ng/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Six 1.0-mL serum specimens
- Two shipments per year

Procalcitonin Calibration Verification/Linearity LN41

Analyte	Program Code	
	LN41	LN41 Target Range
Procalcitonin	▮	0.3–190 ng/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Six 1.0-mL frozen serum specimens
- Two shipments per year; ships on dry ice

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

D-Dimer Calibration Verification/Linearity LN42

Analyte	Program Code	
	LN42	LN42 Target Range
D-dimer	▮	220–5,500 ng/mL FEU

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL plasma specimens
- Two shipments per year

Lamellar Body Count Calibration Verification/Linearity LN43

Analyte	Program Code	
	LN43	LN43 Target Range
Lamellar body count	▮	5–200 particles x 10^9/L

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 2.0-mL simulated liquid amniotic fluid specimens
- For use with lamellar body count methods performed on hematology analyzers
- Two shipments per year

Fibrinogen Calibration Verification/Linearity LN44

Analyte	Program Code	
	LN44	LN44 Target Range
Fibrinogen	▮	80–900 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Six 1.0-mL frozen plasma specimens
- Two shipments per year; ships on dry ice

C-Peptide/Insulin Calibration Verification/Linearity LN46

Analyte	Program Code	
	LN46	LN46 Target Ranges
C-Peptide	▮	0.1–35.0 ng/mL
Insulin	▮	0.8–800 µIU/mL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information
- Seven 2.0-mL frozen serum specimens
- Two shipments per year

Please note that the ranges listed are an estimate of the values recovered. Some instruments may recover lower or higher values than the ranges listed.

Instrumentation Quality Management Programs

Instrumentation I			
Challenges	**Program Code**		
	I		
	A Shipment	**B Shipment**	**C Shipment**
Adjustable micropipette calibration verification/linearity	▮		▮
Analytical balance check	▮		▮
Gravimetric pipette calibration	▮		▮
Microtiter plate linearity	▮		▮
Refractometer calibration	▮		▮
Spectrophotometer (stray light check)	▮		▮
Absorbance check – UV wavelength		▮	
Fluorescent intensity check – fluorescent microscopes		▮	
Ocular micrometer calibration		▮	
Osmometer study		▮	
Peak absorbance measurement		▮	
pH meter check		▮	
Photometric calibration – visible wavelength		▮	

WARNING: The Instrumentation (I) Survey specimens may contain corrosive or toxic substances, environmental hazards, or irritants.

Program Information

- Designed to assess instruments not routinely challenged during the proficiency testing process
- Includes appropriate materials to assess important functional parameters, including accuracy and linearity
- Three shipments per year

Interfering Substance IFS

Analyte	Program Code		
	IFS		
	Bilirubin Interferent	Hemoglobin Interferent	Lipid Interferent
Alanine aminotransferase (ALT/SGPT)	▮	▮	▮
Albumin	▮	▮	▮
Alkaline phosphatase	▮	▮	▮
Amylase	▮	▮	▮
Aspartate aminotransferase (AST/SGOT)	▮	▮	▮
Calcium	▮	▮	▮
Chloride	▮	▮	▮
CK2 (MB) mass	▮	▮	▮
Creatine kinase (CK)	▮	▮	▮
Creatinine	▮	▮	▮
Gamma glutamyl transferase (GGT)	▮	▮	▮
Glucose	▮	▮	▮
Iron	▮	▮	▮
Lactate dehydrogenase (LD)	▮	▮	▮
Lipase	▮	▮	▮
Magnesium	▮	▮	▮
Osmolality	▮	▮	▮
Phosphorus	▮	▮	▮
Potassium	▮	▮	▮
Protein, total	▮	▮	▮
Sodium	▮	▮	▮
Urea nitrogen (BUN)	▮	▮	▮
Uric acid	▮	▮	▮

The material expires December 1, 2020.

Program Information

- Eighteen 10.0-mL liquid serum specimens
- Designed for verifiying manufacturing interference specifications and investigating discrepant results caused by interfering substances
- Submit results any time prior to the material's expiration date
- One shipment per year

Serum Carryover SCO

Analyte	Program Code
	SCO
Creatinine	▮
hCG	▮
Lactate dehydrogenase (LD)	▮
Phenytoin	▮

Program Information

- One 10.0-mL liquid serum specimen (low level) and one 5.0-mL liquid serum specimen (high level)
- Designed to screen for instrument sample probe carryover
- One shipment per year

Urine Toxicology Carryover UTCO

Analyte	Program Code
	UTCO
Benzoylecgonine	▮
Delta-9-THC-COOH	▮
Opiates	▮
Amphetamine	▮

Program Information

- Two 40.0-mL urine specimens (low and high levels)
- Designed to screen for instrument sample probe carryover
- One shipment per year

Color Atlas of Hematology, Second Edition (PUB222)

The second edition of *Color Atlas of Hematology* goes far beyond other reference texts, delivering keen insight into peripheral blood pathology.

Explore 480 highly visual pages for the latest details on a range of issues including molecular and cytogenetics, flow cytometry, pediatric hematology, and leukemia. Link to 18 engaging videos prepared by the authors. View 100+ peripheral blood smears online with DigitalScope® technology, just like they were under the microscope—only better.

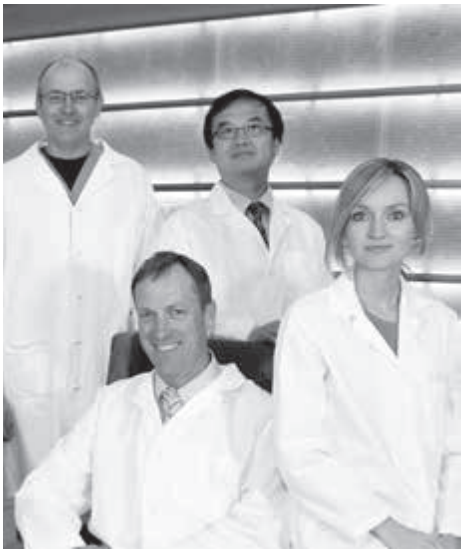
Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB222
Hardcover; 480 pages; 2019

12 Hematology and Clinical Microscopy



Benefit from the support of 600 experts in laboratory medicine.

These experts spend countless hours monitoring testing trends to:

- Determine specimen specifications to challenge participants.
- Keep our offerings contemporary with new analytes and programs.
- Provide peer-reviewed continuing medical education, continuing education, and self-assessment modules.

Hematology and Clinical Microscopy

Hematology 136
Clinical Microscopy 146

Discontinued Programs

Hematology Automated Differential (FH14, FH14P)

Hematology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

These programs do not meet regulatory requirements for proficiency testing; see the FH Series on page 136. For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 2.5-mL whole blood specimens with pierceable caps
- Report up to three instruments
- For method compatibility, see instrument matrix on page 138
- Two shipments per year

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Procedure	Program Code		Challenges per Shipment
	BCP	BCP2	
Blood cell identification	▮	▮	5
Educational challenge(s)	▮	▮	5 (BCP)/1 (BCP2)

Program Information

- BCP - Ten images, each available as photographs and online images
- BCP2 - Six images, each available as photographs and online images
- Three shipments per year

CE credit

Blood Parasite BP

Procedure	Program Code	Challenges per Shipment
	BP	
Thin/thick blood film sets*	▮	5

*This Survey will include corresponding thick films when available.

Program Information

- Five Giemsa-stained blood film sets, photographs, and/or online images
- A variety of blood parasites, including *Plasmodium, Babesia, Trypanosoma,* and filarial worms
- Three shipments per year

Bone Marrow Cell Differential BMD

Procedure	Program Code	Challenges per Shipment
	BMD	
Bone marrow differential	▮	1
Bone marrow cell identification	▮	5

Additional Information

- Examine an online, whole slide image that includes a manual 500 bone marrow differential count and annotated cells for identification.
- Recognize and integrate problem-solving skills through the use of interpretive questions found throughout the discussion.
- Evaluate cell morphology and identify specific cells in bone marrow.
- See system requirements on page 13.

Program Information

- One online bone marrow aspirate whole slide image that includes five annotated cells for identification
- Powered by DigitalScope® technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

CE credit

Erythrocyte Sedimentation Rate ESR, ESR1, ESR2, ESR3

Procedure	Program Code				Challenges per Shipment
	ESR	ESR1	ESR2	ESR3	
All methods except the ALCOR, Alifax®, Sedimat 15®, and Sedimat 15 Plus	▮				3
Sedimat 15, Sedimat 15 Plus		▮			3
Alifax			▮		3
ALCOR iSED				▮	3

Program Information

- ESR, ESR1 - Three 6.0-mL whole blood specimens
- ESR2 - Three 3.0-mL simulated whole blood specimens
- ESR3 - Three 3.5-mL whole blood specimens
- Two shipments per year

Fetal Red Cell Detection HBF

Procedure	Program Code	Challenges per Shipment
	HBF	
Kleihauer-Betke and flow cytometry	▮	2
Rosette fetal screen	▮	2
Acid elution whole slide image	▮	1

Program Information

- Two 1.2-mL liquid whole blood specimens
- Not designed for F cell quantitation
- Two online, whole slide images per year with optional grids for cell counting
- Powered by DigitalScope® technology
- Two shipments per year

Hemoglobinopathy HG

Procedure	Program Code	Challenges per Shipment
	HG	
Hemoglobin identification and quantification	▮	4
"Dry lab" educational challenges	▮	2
Hemoglobin A_2 quantitation	▮	4
Hemoglobin F quantitation	▮	1
Sickling test, qualitative	▮	4

Program Information

- Four 0.5-mL stabilized red blood cell specimens
- Two "dry lab" educational challenges (case histories, electrophoresis patterns, and clinical interpretation questions)
- Two shipments per year

Rapid Total White Blood Cell Count RWBC

Procedure	Program Code	Challenges per Shipment
	RWBC	
Rapid total white blood cell count	▮	5

Program Information

- Five 2.0-mL whole blood specimens
- For use with the HemoCue WBC instrument
- Three shipments per year

Reticulocyte Series RT, RT2, RT3, RT4

Instrument/Method	Program Code				Challenges per Shipment
	RT	RT2	RT3	RT4	
Abbott Cell-Dyn 4000, Sapphire, Siemens ADVIA 120/2120, and all other automated and manual methods	▮				3
Abbott Cell-Dyn 3200, 3500, 3700, Ruby		▮			3
Coulter GenS, HmX, LH500, LH700 series, MAXM, STKS, Unicel DxH series			▮		3
Sysmex XE-2100, XE-2100C, XE-2100D, XE-2100DC, XE-2100L, XE-5000, XN-series, XT-2000i, XT-4000i				▮	3
Pierceable caps			▮	▮	3

Program Information

- RT, RT2 - Three 1.0-mL stabilized red blood cell specimens
- RT3 - Three 3.0-mL stabilized red blood cell specimens
- RT4 - Three 2.0-mL stabilized red blood cell specimens
- Two shipments per year

Quality Cross Check—Reticulocyte RTQ, RT3Q, RT4Q

Instrument/Method	Program Code			Challenges per Shipment
	RTQ	RT3Q	RT4Q	
Abbott Cell-Dyn 4000, Sapphire, Siemens ADVIA 120/2120, and all other automated and manual methods	▮			3
Coulter GenS, HmX, LH500, LH700, MAXM, STKS, Unicel DxH series		▮		3
Sysmex XE-2100, XE-2100C, XE-2100D, XE-2100L, XE-5000, XN-series, XT-2000i, XT-4000i			▮	3

These programs do not meet regulatory requirements for proficiency testing; see the RT Series above. For additional information about the Quality Cross Check program, see page 40.

Program Information

- RTQ - Three 1.0-mL stabilized red blood cell specimens
- RT3Q - Three 3.0-mL stabilized red blood cell specimens
- RT4Q - Three 2.0-mL stabilized red blood cell specimens
- Includes percentage and absolute result reporting
- Report up to three instruments
- Two shipments per year

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Reticulocyte, Matrix

Sickle Cell Screening SCS

Procedure	Program Code	Challenges per Shipment
	SCS	
Sickling test, qualitative	▮	3

Program Information

- Three 1.0-mL stabilized human erythrocyte specimens
- Two shipments per year

Transfusion-Related Cell Count TRC

Procedure	Program Code	Challenges per Shipment
	TRC	
Platelet count (platelet-rich plasma)	▮	5
WBC count	▮	4
Dry challenge	▮	2

WBC counts must be performed using a Nageotte chamber, fluorescence microscopy, or by flow cytometry.

Program Information

- Five 1.2-mL suspensions of platelet-rich plasma
- Two 1.0-mL vials leukocyte-reduced platelet material
- Two 1.0-mL vials leukocyte-reduced red blood cells
- Three shipments per year

Bone Marrow Benchtop Reference Guide (BMBRG)

Bone Marrow Benchtop Reference Guide is an illustrated guide to common and rare cells. With more than 60 different identifications and a detailed description for each cell morphology, it's an affordable, convenient way to identify various cell types quickly and confidently. Its rugged construction is well suited for heavy use at the workbench.

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Spiral bound; 2018

Waived Combination HCC, HCC2

Analyte	Program Code		Challenges per Shipment
	HCC	HCC2	
Hematocrit		▮	2
Hemoglobin	▮	▮	2
Urinalysis/Urine hCG		▮	2
Whole blood glucose	▮	▮	2 (HCC)/3 (HCC2)

Program Information

- HCC - Two 1.0-mL whole blood specimens; two shipments per year
- HCC2 - Total of four shipments per year
- Hematocrit, hemoglobin, and urinalysis/urine hCG testing - Two 3.0-mL whole blood specimens and two 10.0-mL urine specimens; two shipments per year: A and C
- Whole blood glucose testing - Three 2.5-mL whole blood specimens; two shipments per year: B and D
- To verify instrument compatibility, refer to the instrument matrix on page 66

Virtual Peripheral Blood Smear VPBS

Procedure	Program Code	Challenges per Shipment
	VPBS	
WBC differential	▮	3
Platelet estimate	▮	3
RBC morphology	▮	3
Blood cell identification	▮	15

Additional Information

- Examine online, whole slide images that include a manual 100 WBC differential count and annotated cells for identification.
- Evaluate and identify red blood cell (RBC) morphology and identify specific white blood cells (WBC) in peripheral blood.
- Recognize and integrate problem-solving skills through the use of interpretive questions found throughout the discussion.
- See system requirements on page 13.

Program Information

- Three online, peripheral blood whole slide images that include 15 annotated cells for identification
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

CE credit

Expanded Virtual Peripheral Blood Smear EHE1

Procedure	Program Code	Challenges per Shipment
	EHE1	
WBC differential	▮	2
Platelet estimate	▮	2
RBC morphology	▮	2
WBC morphology	▮	2
Blood cell identification	▮	10

Additional Information

- More challenging and/or complex testing.
- Examine online, whole slide images that include a manual 100 WBC/differential count and annotated cells for identification.
- Comprehensive case studies.
- Ability to recognize and integrate problem-solving skills through the use of interpretive questions found throughout discussion.
- Evaluate and identifiy red blood cell (RBC) morphology and identify specific white blood cells (WBC) in peripheral blood.
- See system requirements on page 13.

Program Information

- Two online, peripheral blood whole slide images that include 10 annotated cells for identification
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Hematology Benchtop Reference Guide (HBRG)

- More than 50 different cell identifications, including common and rare cells
- Detailed descriptions for each cell morphology
- Six tabbed sections for easy reference
  - Erythrocytes
  - Erythrocyte Inclusions
  - Granulocytic (Myeloid) and Monocytic Cells
  - Lymphocytic Cells
  - Platelets and Megakaryocytic Cells
  - Microorganisms and Artifacts
- A durable and water-resistant format to withstand years of benchtop use—5” x 6½”

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Spiral bound; 60 pages;
50+ images; 2012

Hematopathology Online Education HPATH/HPATH1

Program	Program Code	Challenges per Shipment
	HPATH/HPATH1	
Hematopathology online case review	▮	5

Additional Information

HPATH educates pathologists, hematolopathologists, and hematologists with an interest in hematopathology to assess and improve their diagnostic skills in hematopathology.

- Clinical history and relevant laboratory data.
- At least one online, whole slide image of peripheral blood, bone marrow, spleen, lymph node, or other tissue.
- Results of ancillary studies such as immunohistochemistry, flow cytometry, FISH, karyotyping, and molecular studies, where appropriate.
- Case discussion and discussion of differential diagnoses.
- Five SAM questions per case.
- See system requirements on page 13.

Program Information

- HPATH - Five diagnostic challenges/online, whole slide images with clinical history; reporting with CME/SAM credit is available for one pathologist/ hematologist; for additional pathologist/hematologist, order HPATH1
- HPATH1 - Reporting option with CME/SAM credit for each additional pathologist and hematologist (within the same institution); must order in conjunction with Survey HPATH
- Earn a maximum of 12.5 CME/SAM credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 12.5 CE credits per hematologist for completion of an entire year
- This activity meets the ABP MOC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Clinical Microscopy

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

- Evaluate cell morphology and identify specific cells in a body fluid.
- See system requirements on page 13.

Program Information

- Two online, whole slide body fluid images that include 10 annotated cells for identification
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Automated Urine Microscopy UAA, UAA1

Analyte	Program Code		Challenges per Shipment
	UAA	UAA1	
Casts, semiquantitative	▮	▮	2
Crystals, semiquantitative	▮		2
Epithelial cells, semiquantitative		▮	2
Red blood cells, quantitative	▮	▮	2
White blood cells, quantitative	▮	▮	2

Program Information

- UAA - Two 10.0-mL liquid urine specimens for use with IRIS and Roche instruments
- UAA1 - Two 12.0-mL liquid urine specimens for use with Sysmex instruments
- Two shipments per year

Automated Urine Microscopy, Instrument Matrix

Instrument	UAA, UAA1	
	UAA	UAA1
DIRUI FUS	X	
IRIS Iq200	X	
Roche cobas u701	X	
ARKRAY Auction Hybrid		X
77 Elektronika		X
Siemens Atellica UA5800		X
Sysmex UF 50, 100, 500i, 1000i, 5000		X
Sysmex UX 2000		X

Crystals BCR, BFC, URC

Procedure	Program Code			Challenges per Shipment
	BCR	BFC	URC	
Bile crystal identification	▮			2
Body fluid crystal identification		▮		2
Urine crystal identification			▮	2

Program Information

- BFC - Two 1.5-mL simulated body fluid specimens (eg, synovial fluid)
- URC - Two 1.5-mL urine specimens
- BCR - Two photographs
- Two shipments per year

Dipstick Confirmatory DSC

Analyte	Program Code	Challenges per Shipment
	DSC	
Bilirubin	▮	2
Sulfosalicylic acid (SSA)	▮	2

Program Information

- Two 12.0-mL liquid urine specimens
- For use with methods to confirm positive bilirubin and protein dipstick results
- Two shipments per year

Fecal Fat FCFS

Analyte	Program Code	Challenges per Shipment
	FCFS	
Fecal fat, qualitative	▮	2

Program Information
- Two 10.0-g simulated fecal fat specimens
- For microscopic detection of neutral fats (triglycerides) and/or split fats (total free fatty acids)
- Two shipments per year

Fetal Hemoglobin APT

Analyte	Program Code	Challenges per Shipment
	APT	
Fetal hemoglobin (gastric fluid)	▮	2

Program Information
- Two 1.2-mL simulated gastric fluid specimens
- Two shipments per year

Gastric Occult Blood GOCB

Analyte	Program Code	Challenges per Shipment
	GOCB	
Gastric occult blood	▮	3
Gastric pH	▮	3

Program Information
- Three 2.0-mL simulated gastric specimens
- Two shipments per year

Glucose-6-Phosphate Dehydrogenase G6PDS

Analyte	Program Code	Challenges per Shipment
	G6PDS	
G6PD, qualitative and quantitative	▮	2

Program Information
- Two 0.5-mL lyophilized hemolysate specimens
- Two shipments per year

Hemocytometer Fluid Count HFC

Procedure	Program Code	Challenges per Shipment
	HFC	
Cytopreparation differential	▮	3
Red blood cell fluid count	▮	3
White blood cell fluid count	▮	3

Program Information
- Three 1.0-mL simulated body fluid specimens
- Two shipments per year

Hemocytometer Fluid Count, International HFCI

Procedure	Program Code	Challenges per Shipment
	HFCI	
Red blood cell fluid count	▮	3
White blood cell fluid count	▮	3
Body fluid differential	▮	2

This program meets the CAP's Accreditation Program requirements.

Additional Information

- Examine online, whole slide images that include a manual differential count.
- See system requirements on page 13.

Program Information

- Three 2.0-mL simulated body fluid specimens; two online, whole slide images for 2- and 5-part differential
- Designed for international laboratories that have experienced significant shipping and receiving issues and need longer program stability
- Powered by DigitalScope technology
- Two shipments per year

Lamellar Body Count LBC

Procedure	Program Code	Challenges per Shipment
	LBC	
Lamellar body count	▮	3

Program Information

- Three 2.0-mL simulated liquid amniotic fluid specimens
- For use with LBC methods performed on all hematology analyzers
- Two shipments per year

Occult Blood OCB

Analyte	Program Code	Challenges per Shipment
	OCB	
Occult blood	▮	3

Additional Information

For second instrument reporting options, see the Quality Cross Check program, OCBQ, on page 152.

Program Information

- Three 2.0-mL simulated fecal specimens
- Two shipments per year

Quality Cross Check—Occult Blood OCBQ

Analyte	Program Code	Challenges per Shipment
	OCBQ	
Occult blood	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey OCB on page 151. For additional information about the Quality Cross Check program, see page 40.

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Program Information

- Three 2.0-mL simulated fecal specimens
- Report up to three instruments
- Two shipments per year

Placental Alpha Microglobulin 1 (PAMG-1) ROM1

Procedure	Program Code	Challenges per Shipment
	ROM1	
Placental Alpha Microglobulin 1 (PAMG-1)	▮	3

Program Information

- Three 0.5-mL simulated vaginal specimens for methods such as Actim PROM, Amnisure, Clinical Innovations, and PartoSure
- Two shipments per year

Special Clinical Microscopy SCM1, SCM2

Analyte/Procedure	Program Code		Challenges per Shipment
	SCM1	SCM2	
Urine hemosiderin, Prussian blue	▮		3
Urine eosinophils, Wright stain		▮	3

Program Information

- Three images, each available as photographs and online images
- Two shipments per year

Ticks, Mites, and Other Arthropods TMO

Procedure	Program Code	Challenges per Shipment
	TMO	
Tick, mite, and arthropod identification	▮	3

Program Information

- Three images, each available as photographs and online images
- Two shipments per year

Urine hCG UHCG

Procedure	Program Code	Challenges per Shipment
	UHCG	
Urine hCG, qualitative	▮	5

Program Information

- Five 1.0-mL urine specimens
- Three shipments per year

Urine Albumin and Creatinine, Semiquant UMC

Analyte/Procedure	Program Code	Challenges per Shipment
	UMC	
Creatinine	▮	2
Urine albumin (microalbumin): creatinine ratio	▮	2
Urine albumin (microalbumin), semiquantitative	▮	2

For quantitative reporting, refer to Survey U, page 68.

Program Information

- Two 3.0-mL liquid urine specimens
- For use with dipstick and semiquantitative methods only
- Two shipments per year

Worm Identification WID

Procedure	Program Code	Challenges per Shipment
	WID	
Worm identification	▮	3

Program Information

- Three images, each available as photographs and online images
- Two shipments per year

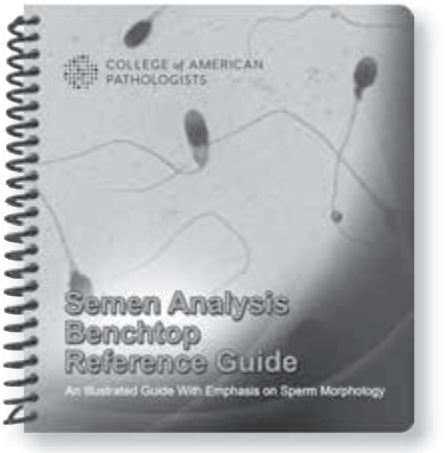
Semen Analysis Benchtop Reference Guide (SABRG)

Semen Analysis Benchtop Reference Guide is an illustrated guide to sperm morphology. The content includes specimen collection and macroscopic assessment, sperm count, and morphology assessment and classification systems. Also included are 50 images representing normal morphology, head defects, neck/midpiece defects, tail defects, and residual cytoplasm defects, as well as images of nonsperm cells, Pap-stained sperm, and equipment. The sturdy laminated guide features tabbed sections for easy reference.

Add Semen Analysis Benchtop Reference Guide (SABRG) to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: SABRG
Spiral bound; 6½" x 7"; 2018

13 Reproductive Medicine

New PV1 program is designed for laboratories using automated analyzers for postvasectomy sperm count.

- Employs the same stabilized sperm specimens as the Postvasectomy for Manual Methods (PV) program, but with an increased volume.
- Allows you to test PV1 specimens using automated analyzers in the same mode used for patient samples, eliminating the need to run PT in manual mode.

Reproductive Medicine

Andrology and Embryology..... 156

Andrology and Embryology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Semen Analysis SC, SC1, PV, PV1, SM, SV, ASA

Procedure	Program Code							Challenges per Shipment
	SC	SC1	PV	PV1	SM	SV	ASA	
Sperm count and presence/absence (manual methods and CASA systems)	▮							2
Sperm count and presence/absence (automated methods)		▮						2
Postvasectomy sperm count and presence/absence			▮					2
Postvasectomy sperm count and presence/absence (automated methods)				▮				2
Sperm morphology					▮			2
Sperm viability						▮		2
Antisperm antibody IgG							▮	2

Program Information

- SC - Two 0.3-mL stabilized sperm specimens
- SC1 - Two 1.0-mL stabilized sperm specimens
- PV - Two 0.3-mL stabilized sperm specimens with counts appropriate for postvasectomy testing
- PV1 - Two 1.0-mL stabilized sperm specimens with counts appropriate for postvasectomy testing
- SM - Two prepared slides for staining
- SV - Two eosin-nigrosin-stained slides
- ASA - Two 0.3-mL serum specimens
- Two shipments per year

CE credit

Sperm Motility, Morphology, and Viability SMCD, SM1CD, SM2CD

Procedure	Program Code			Challenges per Shipment
	SMCD	SM1CD	SM2CD	
Sperm count	▮			2
Sperm motility/forward progression	▮			2
Sperm morphology		▮		2
Sperm viability			▮	2

Program Information

- SMCD - Online video clips of sperm available for hemocytometer, Makler, and disposable chambers
- SM1CD, SM2CD - Two online challenges that may be viewed as whole slide images by DigitalScope® technology or as static images
- Two online activites per year; your CAP shipping contact will be notified via email when the activity is available

CE credit

Embryology EMB

Procedure	Program Code	Challenges per Shipment
	EMB	
Embryo transfer and quality assessment (three- and five-day-old embryos)	▮	4

Program Information

- Two online sets of five video clips
- Two online activites per year; your CAP shipping contact will be notified via email when the activity is available

Ligand—Special Y, YY, DY

Analyte	Program Code		Challenges per Shipment
	Y, YY	DY	
11-deoxycortisol	▮		3
17-hydroxyprogesterone	▮		3
Androstenedione	▮		3
DHEA sulfate	▮		3
Estradiol	▮		3
Estriol, unconjugated (uE3)	▮		3
Follicle-stimulating hormone (FSH)	▮		3
Growth hormone (GH)	▮		3
IGF-1 (somatomedin C)	▮		3
Luteinizing hormone (LH)	▮		3
Progesterone	▮		3
Prolactin	▮		3
Testosterone	▮		3
Testosterone, bioavailable (measured)		▮	3
Testosterone, free (measured)		▮	3
Sex hormone-binding globulin (SHBG)		▮	3

Program Information

- Y - Three 5.0-mL liquid serum specimens in duplicate
- YY - Three 5.0-mL liquid serum specimens in triplicate
- DY - Must order in conjunction with Survey Y or YY
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

CE credit

Antimüllerian Hormone AMH

Analyte	Program Code	Challenges per Shipment
	AMH	
Antimüllerian hormone	▮	3

Program Information

- Three 1.0-mL lyophilized serum specimens
- Two shipments per year

Go ahead. Double check.

14 Coagulation

Meet requirements for calibration verification and linearity for coagulation testing.

- Hemostasis test methods that are calibrated and directly measure the concentration of an analyte require calibration verification/linearity (CVL).
- Coagulation programs available include Heparin CVL (LN36), von Willebrand Factor Antigen CVL (LN37), D-Dimer CVL (LN42), Thrombophilia CVL (LN35), and Fibrinogen CVL (LN44).

Program Changes

Coagulation—Limited (CGL, CGDF) Additional analyte 160
Viscoelastometry (TEG) is now Viscoelastic Studies (VES) 166
Coagulation—Limited, Validated Material (CGM) Additional analyte 169

Discontinued Programs

Coagulation Special Testing Series (CGS6, CGS8)

Coagulation

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Coagulation—Limited CGB, CGL, CGDF

Analyte	Program Code			Challenges per Shipment
	CGB	CGL	CGDF	
Activated partial thromboplastin time	▮	▮		5
Fibrinogen		▮		5
International normalized ratio (INR)*	▮	▮		5
Prothrombin time	▮	▮		5
D-dimer		▮	▮	2
Fibrin(ogen) degradation products, plasma		▮	▮	1
Fibrin(ogen) degradation products, serum		▮	▮	1

*Participants reporting INR results will receive a special evaluation to assess the INR calculation.

Additional Information

For second instrument reporting options, see the Quality Cross Check program, CGLQ, below.

Program Information

- CGB - Five 1.0-mL lyophilized plasma specimens; three shipments per year
- CGL - Five 1.0-mL lyophilized plasma specimens; three shipments per year; two 1.0-mL plasma specimens and one 1.0-mL serum specimen; three shipments per year
- CGDF - One 1.0-mL serum specimen; two 1.0-mL lyophilized plasma specimens; three shipments per year

CE credit

Quality Cross Check—Coagulation CGLQ

Analyte	Program Code	Challenges per Shipment
	CGLQ	
Activated partial thromboplastin time	▮	3
Fibrinogen	▮	3
International normalized ratio (INR)	▮	3
Prothrombin time	▮	3
D-dimer	▮	2
Fibrin(ogen) degradation products, plasma	▮	1
Fibrin(ogen) degradation products, serum	▮	1

This program does not meet regulatory requirements for proficiency testing; see Survey CGL above. For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 1.0-mL lyophilized plasma specimens in triplicate, two 1.0-mL plasma specimens, and one 2.0-mL serum specimen
- Report up to three instruments
- Two shipments per year

The Quality Cross Check Program:

- Provides a solution for monitoring performance across multiple instruments and is in compliance with the CMS directive regarding proficiency testing on multiple instruments.
- Simplifies instrument comparability efforts by providing custom reports with both peer group comparison and instrument comparability statistics.

Coagulation—Extended CGE, CGEX		
Analyte	**Program Code**	**Challenges per Shipment**
	CGE, CGEX	
See analyte listing below	▮	2

Program Information

- CGE - Two 1.0-mL lyophilized plasma specimens (three vials each)
- CGEX - Two 1.0-mL lyophilized plasma specimens (five vials each)
- Two shipments per year

Coagulation Analyte Listing (Quantitative Results)

50:50 mixing study, PT and aPTT
Activated partial thromboplastin time
Activated protein C resistance
Alpha-2-antiplasmin
Antithrombin activity/antigen
Dilute prothrombin time
Factors II, V, VII, VIII, IX, X, XI, XII, and XIII
Fibrinogen antigen
Heparin-induced thrombocytopenia (HIT)
Plasminogen activator inhibitor
Plasminogen activity/antigen
Prekallikrein
Protein C
Protein S
Prothrombin time
Reptilase time
Thrombin time
von Willebrand factor activity:
- Collagen binding
- Glycoprotein I_b binding
- Ristocetin cofactor

von Willebrand factor antigen

Have you created or updated your own CAP Profile?

Each laboratory staff member should have their own profile. Your profile is transferable when you leave your current position. Use it to maintain information about yourself, including:

- Business affiliations
- Certifications
- Contact preferences
- Inspector-related information
- Personal contact information
- Specialties and skills
- Addresses

To create or update your profile, visit cap.org, log in, and click on UPDATE MY PROFILE.

Coagulation Special Testing Series CGS1, CGS2, CGS3, CGS4, CGS5, CGS7

Module/Analyte	Challenges per Shipment					
	Program Code					
	CGS1	CGS2	CGS3	CGS4	CGS5	CGS7
Activated partial thromboplastin time*	2		2	3		
International normalized ratio (INR)	2			3		
Prothrombin time*	2			3		
Lupus Anticoagulant and Mixing Studies Module						
Dilute Russell's viper venom time	2					
Lupus anticoagulant (confirmation and screen)	2					
50:50 mixing studies, PT and aPTT	2					
Thrombophilia Module						
Activated protein C resistance		2				
Antithrombin (activity, antigen)		2				
Protein C (activity, antigen)		2				
Protein S (activity, free antigen, total antigen)		2				
von Willebrand Factor Antigen Module						
Factor VIII assay			2			
von Willebrand factor (antigen, activity, multimers)			2			
Factor VIII inhibitor			2			
Fibrin monomer			2			
Heparin Module						
Heparin activities using methodologies including Anti-Xa (unfractionated, low molecular weight, and hybrid curve)				3		
Thrombin time				3		
Heparin-Induced Thrombocytopenia Module						
Appropriate with methods such as Gen-Probe Lifecodes PF4 IgG and Gen-Probe Lifecodes PF4 Enhanced® assays					2	
ADAMTS13 Module						
ADAMTS13 (activity, inhibitor screen, titer, and anti ADAMTS13 IgG)						3

*Not appropriate for meeting regulatory requirements, see page 160.

Program Information

- CGS1, CGS2, CGS3 - A total of two 2.0-mL of lyophilized plasma specimens
- CGS4 - Three 1.0-mL lyophilized plasma specimens
- CGS5 - Two 60.0-µL serum specimens
- CGS7 - Three 1.0-mL lyophilized plasma specimens in duplicate
- Two shipments per year

Apixaban, Dabigatran, Fondaparinux, Rivaroxaban Anticoagulant Monitoring APXBN, DBGN, FNPX, RVBN

- Two shipments per year

Coagulation Calibration Verification/Linearity LN35, LN36, LN37

Analyte	Program Code			
	LN35	LN36	LN37	Target Ranges
Antithrombin activity	▮			10%–130%
Protein C activity	▮			10%–100%
Heparin, low molecular weight		▮		0.1–2.0 U/mL
Heparin, unfractionated		▮		0.1–1.3 U/mL
von Willebrand factor antigen			▮	5%–140%

The LN35, LN36, and LN37 CVL programs meet the CAP Accreditation requirements HEM.38009, 38010, and 38011.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- LN35, LN37 - Six 1.0-mL frozen plasma specimens per mailing
- LN36 - Twelve 1.0-mL frozen plasma specimens per mailing, which include six for low molecular weight heparin and six for unfractionated heparin
- Two shipments per year; ships on dry ice

D-Dimer Calibration Verification/Linearity LN42

Analyte	Program Code	
	LN42	LN42 Target Range
D-dimer	▮	220–5,500 ng/mL FEU

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Six 1.0-mL plasma specimens
- Two shipments per year

Fibrinogen Calibration Verification/Linearity LN44

Analyte	Program Code	
	LN44	LN 44 Target Range
Fibrinogen	▮	80–900 mg/dL

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- Six 1.0-mL frozen plasma specimens
- Two shipments per year; ships on dry ice

Drug-Specific Platelet Aggregation PIA, PIAX

Procedure	Program Code		Challenges per Shipment
	PIA	PIAX	
Aspirin assay	▮	▮	3
PRU test	▮	▮	3

Program Information

- PIA - Three lyophilized specimens with diluents
- PIAX - All Survey PIA specimens in duplicate
- For use with the Accumetrics VerifyNow® System
- Kit includes sufficient material to perform one assay; multiple assay reporting requires the purchase of PIAX
- Two shipments per year

Whole Blood Coagulation
WP3, WP4, WP6, WP9, WP10

Analyte	Challenges per Shipment				
	Program Code				
	WP3	WP4	WP6	WP9	WP10

*This Survey requires the draw of a normal donor sample.

Program Information

- One 3.2% sodium citrate and two heparin vacuum tubes; two 3.5-mL plastic tubes; one vial of 0.2M $CaCl_2$
- For use with the Haemonetics Platelet Mapping® assay
- Two shipments per year

Improve the reliability of your patient results with CAP Survey Validated Materials

Use the same material that is sent in the Surveys program to:

- Identify and troubleshoot instrument/method problems
- Correlate results with other laboratories or instruments
- Document correction of problems identified in Surveys
- Utilize material with confirmed results as an alternative external quality control
- Identify potential proficiency testing failures

Each laboratory receives a Survey Participant Summary, which includes readily available results.

Coagulation—Limited, Validated Material

Validated Material	Program Code	Corresponding Survey	Page
Coagulation	CGM	CGL	160

Program Information

- Five 1.0-mL lyophilized plasma specimens, two 1.0-mL lyophilized plasma specimens, and one 1.0-mL serum specimen; three shipments per year

Can you spot them?

Accurately identify fungi, bugs, parasites, bacteria, and other microorganisms quickly. Ruggedly constructed, these fully illustrated guides are built to withstand heavy use at the workbench. Spiral-bound and laminated, they are conveniently sized at 6 1/2" x 7".

Rely on these Benchtop Reference Guides in your laboratory.

- Arthropod Benchtop Reference Guide (ABRG)
- Gram Stain Benchtop Reference Guide (GSBRG)
- Mycology Benchtop Reference Guide (MBRG)
- Parasitology Benchtop Reference Guide (PBRG)

Throat & Urine Culture/Rapid Strep A Antigen Detection (MC5)

Microbiology

Guide to Molecular Microbiology Testing

Use this flowchart as a guide for ordering the appropriate Molecular Microbiology Surveys for your laboratory's testing menu. Participants must report five specimens for each mailing to meet CLIA requirements for the subspecialties of microbiology. See the following pages for more detailed information about each Survey.

Do you perform molecular testing on Chlamydia or GC only?	Do you perform nucleic acid amplification other than GC?	Do you perform viral load testing only?	Do you perform molecular multiplexing?
↓ YES	↓ YES	↓ YES	↓ YES
Select from the following: ▪ **HC6, HC6X,HC7** *Chlamydia*/GC Nucleic Acid Amplification (page 186)	Select from the following: ▪ **IDO, ID1, ID1T, ID2, ID5 , IDN** Nucleic Acid Amplification (pages 197, 198, 201) ▪ **D1** Throat Culture (page 175) ▪ **MRS2M/MRS5M** MRSA Screen, Molecular (page 182) ▪ **BOR** *Bordetella pertussis/ parapertussis* (page 180) ▪ **CDF5** *C. difficile* Detection (page 181) ▪ **MGEN** *Mycoplasma genitalium* (page 185) ▪ **TVAG** *Trichomonas vaginalis* (page 186) ▪ **VBDM** Zika (page 200)	Select from the following: ▪ **HV2** HIV Viral Load (page 199) ▪ **HCV2, HBVL, HBVL5** Hepatitis Viral Load (page 198) ▪ **VLS, VLS2** Viral Load (page 199)	Select from the following: ▪ **ID3** Influenza A, Influenza B, RSV by NAA (page 198) ▪ **IDME** Meningitis/Encephalitis Panel (page 202) ▪ **IDPN** Infectious Disease Pneumonia Panel (page 203) ▪ **IDR** Infectious Disease Respiratory Panel (page 202) ▪ **GIP, GIP5** Gastrointestinal Panel (page 204) ▪ **GNBC, GPBC** Blood Culture Panels (page 179) ▪ **MVP** Molecular Vaginal Panel (page 185)

Bacteriology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Guide for Ordering Regulated Bacteriology Surveys

Procedure	Program Code					
	D	D2	RMC	D3	MC4	D1
Bacterial identification	▮	▮	▮	▮	▮	▮
Gram stain	▮	▮	▮	▮		
Antimicrobial susceptibility testing	▮	▮	▮			
Bacterial antigen detection	▮		▮		▮	

Participants must report five specimens for each mailing to meet CLIA requirements for the subspecialty of bacteriology. See the following pages for more detailed information about each Survey.

Bacteriology D

Procedure	Program Code	Challenges per Shipment
	D	
Antimicrobial susceptibility testing	▮	1 graded, 1 ungraded
Bacterial antigen detection	▮	2
Bacterial identification	▮	5
Gram stain	▮	1

Additional Information

Antigen detection challenges will be included in the following shipments:

- Shipment A: *C. difficile* antigen/toxin* and spinal fluid meningitis panel
- Shipment B: Spinal fluid meningitis panel and Group A *Streptococcus*
- Shipment C: *C. difficile* antigen/toxin* and Group A *Streptococcus*

*CMS has clarified that the *C. difficile* toxin test is not subject to CLIA regulations; therefore, toxin results will not be sent to CMS. Only *C. difficile* antigen results will be sent.

Program Information

- Five swab specimens with diluents in duplicate for culture
- Culture sources may include wounds, blood, respiratory, urines, stools, and anaerobes on a rotational basis
- Two specimens for bacterial antigen detection from the following:
  - One swab for Group A *Streptococcus*
  - One 1.0-mL lyophilized specimen for spinal fluid meningitis testing
  - One 0.5-mL lyophilized specimen for *Clostridium difficile*, for use with rapid or molecular testing methods
- Three shipments per year

CE credit

BIOHAZARD

BIOHAZARD Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Expanded Bacteriology DEX

Analyte	Program Code	Challenges per Shipment
	DEX	
Live organisms	▮	2

Additional Information

Expanded Bacteriology (DEX) is an educational opportunity that provides:

- Culture and susceptibility testing challenges for microbiology laboratories that perform complete identification and susceptibility of bacterial isolates including less common or problematic bacteria
- More exposure to emerging bacterial pathogens and novel resistance mechanisms
- Ability to recognize and identify organisms that exhibit multiple drug-resistance patterns
- Recovery and identification of mixed pathogens such as yeast, aerobic, and anaerobic bacteria in cultures containing multiple organisms

Program Information

- Two swab specimens in duplicate with diluents to perform bacterial identification and susceptibility (when directed)
- Three shipments per year

Microbiology Bench Tools Competency MBT

Procedure	Program Code	Challenges per Shipment
	MBT	
Bacterial identification	▮	6
Antimicrobial susceptibility testing	▮	2

Additional Information

Microbiology Bench Tools Competency (MBT) is a supplemental module for competency assessment and an educational resource for microbiology laboratories. The module:

- Provides organisms that challenge the basic elements of testing at the microbiology bench, including direct observation, monitoring, recording, and reporting of test results
- Can be used for both competency and educational purposes, including teaching and training pathology residents, new employees, and medical and MT/MLT students
- Provides identification and susceptibility results for supervisor use

This is not a proficiency testing program and participants will not return results to the CAP.

Program Information

- Six swab specimens with diluents for bacterial identification and susceptibility
- Culture sources will vary with each shipment
- Results will be provided with the kit to assess personnel competency
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

GC, Throat, and Urine Cultures D1, D2, D3

Procedure	Program Code			Challenges per Shipment
	D1	D2	D3	
Antimicrobial susceptibility testing		▮		1
Bacterial identification	▮	▮	▮	5
Gram stain		▮	▮	1
Culture source:	Throat	Urine	Cervical	
Microbiologic level:	Presence or absence of Group A *Streptococcus* determination	Organisms identified to the extent of your laboratory's protocol	Presence or absence of *Neisseria gonorrhoeae* determination	

Program Information

- D1- Five swab specimens with diluents in duplicate
- D2 - Five loop specimens with diluents in duplicate, with one susceptibility challenge, and one Gram stain challenge
- D3 - Five loop specimens with diluents in duplicate, and one Gram stain challenge
- Throat swabs compatible with molecular- and culture-based methods
- Three shipments per year

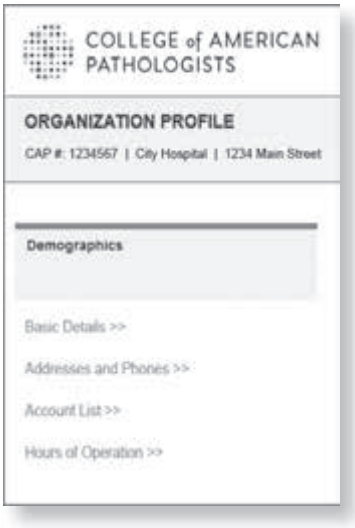
CE credit

BIOHAZARD

Ensure your laboratory's information is up-to-date.

The CAP's online Organizational Profile tool ensures your laboratory's information is current to alleviate any issues with your proficiency testing and accreditation procedures. No more mailing forms or experiencing delays in processing—information is recorded in real time.

Log into e-LAB Solutions Suite to review and update your laboratory's information.



BIOHAZARD Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Routine Microbiology Combination RMC

NEW

Procedure	Program Code	Challenges per Shipment
	RMC	
Antimicrobial susceptibility testing	▮	1
GC culture	▮	2
Gram stain	▮	2
Group A *Streptococcus* antigen detection*	▮	1
Throat culture	▮	3
Urine culture	▮	3

*If your laboratory uses a waived method for Group A *Streptococcus*, these results will not count toward the required five challenges for the subspecialty of bacteriology.

Program Information

- Five loop specimens with diluents in duplicate, three swab specimens with diluents in duplicate, and one swab specimen for bacterial antigen detection
- Urine culture will have one susceptibility challenge
- Throat swabs compatible with molecular- and culture-based methods
- Three shipments per year

CE credit BIOHAZARD

Urine Colony Count MC3, MC4

Procedure	Challenges per Shipment	
	Program Code	
	MC3	MC4
Urine colony count/**urine culture identification**	2	5
Group A *Streptococcus* antigen detection*		3
Throat culture		3

*If your laboratory uses a waived method for Group A *Streptococcus*, these results will not count toward the required five challenges for the subspecialty of bacteriology.

Program Information

- MC3 - Two urine specimens with diluents
- MC4 - Five urine specimens with diluents, three swab specimens with diluents in duplicate, and three swab specimens for bacterial antigen detection
- Throat swabs compatible with molecular- and culture-based methods
- Three shipments per year

CE credit BIOHAZARD

Gram Stain D5

Procedure	Program Code	Challenges per Shipment
	D5	
Gram stain	▮	5

Program Information

- Five air-dried, methanol-fixed unstained glass slides
- Three shipments per year

CE credit

BIOHAZARD Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Virtual Gram Stain Competency VGS1, VGS2

Procedure	Program Code		Challenges per Shipment
	VGS1	VGS2	
Virtual gram stain basic	▮		3
Virtual gram stain advanced		▮	3

Additional Information

- Virtual Gram Stain Basic Competency (VGS1) is for general and new laboratory technologists/technicians. Participants will assess the quality of specimens and stains and will report artifacts and detailed gram-positive and gram-negative morphology. Challenges will include specimens such as CSF, body fluids, and positive blood cultures.
- Virtual Gram Stain Advanced Competency (VGS2) is for experienced laboratory technologists/technicians and microbiologists. Participants will receive challenging images of sputum, body fluids, and other specimens to assess the quality, quantity, and typical morphology of both gram-positive and gram-negative organisms appropriate for the site.
- See system requirements on page 13.

Program Information

- Three online, whole slide images
- Results included in the kit to assess personnel competency
- Powered by DigitalScope® technology
- Two shipments per year

Rapid Group A Strep Antigen Detection D6

Procedure	Program Code	Challenges per Shipment
	D6	
Group A *Streptococcus* antigen detection*	▮	5

*If your laboratory uses a waived method for Group A *Streptococcus*, these results will not count toward the required five challenges for the subspecialty of bacteriology.

Program Information

- Five swab specimens
- Not compatible with molecular- and culture-based methods
- Three shipments per year

CE credit

Rapid Group A Strep Antigen Detection, Waived D9

Procedure	Program Code	Challenges per Shipment
	D9	
Group A *Streptococcus* antigen detection	▮	2

Program Information

- Two swab specimens
- Not compatible with molecular- and culture-based methods
- Two shipments per year

BIOHAZARD Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Group B Strep Detection D8

Analyte	Program Code	Challenges per Shipment
	D8	
Group B *Streptococcus*	▮	5

Program Information

- Five swab specimens with diluents
- Compatible with molecular- and culture-based methods
- Three shipments per year

Bacterial Antigen Detection LBAS, SBAS

Procedure	Program Code		Challenges per Shipment
	LBAS	SBAS	
Legionella pneumophila antigen detection	▮		2
Streptococcus pneumoniae antigen detection		▮	2

Program Information

- Two 0.5-mL liquid simulated clinical specimens
- Two shipments per year

Bacterial Strain Typing, *Staphylococcus* BSTS

Analyte	Program Code	Challenges per Shipment
	BSTS	
Staphylococcus	▮	2

Program Information

- Two sets of loops with diluents
- Two shipments per year

Blood Culture BCS

Procedure	Program Code	Challenges per Shipment
	BCS	
Blood culture bacterial detection and identification	▮	2

Program Information

- Two specimens with diluents for inoculation of blood culture bottles
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Blood Culture, *Staphylococcus aureus* BCS1

Analyte	Program Code	Challenges per Shipment
	BCS1	
Staphylococcus aureus/MRSA	▮	3

Program Information

- Three specimens with diluents for inoculation of blood culture bottles
- Compatible with molecular methods for detection of *S. aureus*/MRSA from positive blood culture bottles
- Two shipments per year

Blood Culture Panel GNBC, GPBC

Procedure	Program Code		Challenges per Shipment
	GNBC	GPBC	
Identification of gram-negative organisms such as *Acinetobacter, Citrobacter, Enterobacter, Proteus, Haemophilus, Klebsiella, Neisseria, Pseudomonas, Serratia, E. coli,* and common resistance mechanisms isolated from positive blood culture bottles	▮		3
Identification of gram-positive organisms such as *Staphylococcus, Streptococcus, Enterococcus, Listeria,* and common resistance mechanisms isolated from positive blood culture bottles		▮	3

These Surveys are not for the inoculation of blood culture bottles.

Program Information

- Three 1.0-mL liquid simulated blood culture fluid specimens
- For laboratories using molecular multiplex panels
- Two shipments per year

PNA FISH PNA1, PNA2

Analyte	Program Code		Challenges per Shipment
	PNA1	PNA2	
Staphylococcus	▮		3
Yeast		▮	3

Program Information

- Three specimens with diluents for inoculation of blood culture bottles
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Bordetella pertussis/parapertussis, Molecular BOR

Analyte	Program Code	Challenges per Shipment
	BOR	
Bordetella pertussis	▮	3
Bordetella parapertussis	▮	3

Program Information
- Three swab specimens
- Designed for molecular techniques
- Two shipments per year

Carbapenem-resistant Organisms CRO

Analyte	Program Code	Challenges per Shipment
	CRO	
KPC	▮	3
IMP	▮	3
NDM	▮	3
OXA-48	▮	3
VIM	▮	3

Program Information
- Three 130-µL specimens
- Compatible with Cepheid GeneXpert
- Two shipments per year

Campylobacter CAMP

Analyte	Program Code	Challenges per Shipment
	CAMP	
Campylobacter	▮	2

Program Information
- Two swabs with diluents in duplicate
- For use with rapid antigen, culture-based testing, and molecular methods
- Two shipments per year

C. difficile, 2 Challenge CDF2

Analyte	Program Code	Challenges per Shipment
	CDF2	
Clostridium difficile antigen/toxin	▮	2

Program Information
- Two 0.5-mL lyophilized specimens, for use with rapid or molecular testing methods
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

C. difficile, 5 Challenge CDF5

Analyte	Program Code	Challenges per Shipment
	CDF5	
***Clostridium difficile* antigen**/toxin	▮	5

CMS has clarified that the *C. difficile* toxin test is not subject to CLIA regulations; therefore, toxin results will not be sent to CMS. Only *C. difficile* antigen results will be sent.

Program Information

- Five 0.5-mL lyophilized specimens, for use with rapid or molecular testing methods
- Three shipments per year

C. trachomatis Antigen Detection HC1, HC3

Procedure	Program Code		Challenges per Shipment
	HC1	HC3	
***C. trachomatis* antigen detection (DFA)**	▮		5
***C. trachomatis* antigen detection (EIA)**		▮	5

Program Information

- HC1 - Five 5-well slide specimens; for the detection of chlamydial elementary bodies by DFA
- HC3 - Five 2.0-mL liquid specimens for *Chlamydia* antigen testing by EIA
- Three shipments per year

Fecal Lactoferrin FLAC

Analyte	Program Code	Challenges per Shipment
	FLAC	
Fecal lactoferrin	▮	3

Program Information

- Three 0.5-mL simulated stool specimens
- For use with rapid methods
- Two shipments per year

Helicobacter pylori Antigen, Stool HPS

Procedure	Program Code	Challenges per Shipment
	HPS	
Helicobacter pylori antigen detection	▮	2

Program Information

- Two 0.5-mL fecal suspensions
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Methicillin-resistant *Staphylococcus aureus* Screen, 2 Challenge MRS

Procedure	Program Code	Challenges per Shipment
	MRS	
MRSA/MSSA detection	▮	2

Program Information
- Two swab specimens with diluents
- For laboratories performing culture-based testing only or using culture and molecular testing
- Two shipments per year

MRSA Screen, Molecular, 2 Challenge MRS2M

Procedure	Program Code	Challenges per Shipment
	MRS2M	
MRSA/MSSA/SA detection	▮	2

Program Information
- Two swab specimens (in duplicate)
- For use with molecular methods that detect *mecA*
- Two shipments per year

Methicillin-resistant *Staphylococcus aureus* Screen, 5 Challenge MRS5

Procedure	Program Code	Challenges per Shipment
	MRS5	
MRSA/MSSA **detection**	▮	5

Program Information
- Five swab specimens with diluents
- For laboratories performing culture-based testing only or using culture and molecular testing
- Three shipments per year

MRSA Screen, Molecular, 5 Challenge MRS5M

Procedure	Program Code	Challenges per Shipment
	MRS5M	
MRSA/MSSA/SA **detection**	▮	5

Program Information
- Five swab specimens (in duplicate)
- For use with molecular methods that detect *mecA*
- Three shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Laboratory Preparedness Exercise LPX

Analyte	Program Code	Challenges per Shipment
	LPX	
Live organisms	▮	3

Additional Information

The Laboratory Preparedness Exercise (LPX) was developed as a collaborative effort between the College of American Pathologists, the Centers for Disease Control and Prevention (CDC), and the Association of Public Health Laboratories (APHL). Laboratories will be sent live organisms that either exhibit characteristics of bioterrorism agents or demonstrate epidemiologic importance and will be expected to respond following Laboratory Response Network Sentinel Laboratory Guidelines if a bioterrorism agent is suspected. All agents provided are excluded from the CDC's select agent list. These may include strains of *Bacillus anthracis, Yersinia pestis, Francisella tularensis,* and *Brucella abortus* that have been modified and are safe for testing in a laboratory that contains a certified Class II Biological Safety Cabinet and is capable of handling Category A and B agents.

Program Information

- Three swab specimens with diluents
- Not available to international customers due to United States export law restrictions
- Two shipments per year

Rapid Urease RUR

Analyte	Program Code	Challenges per Shipment
	RUR	
Urease	▮	3

Program Information

- Three simulated gastric biopsy specimens
- For use with methods such as CLOTEST®
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Stool Pathogen SP, SPN, SP1

Analyte	Program Code			Challenges per Shipment
	SP	SPN	SP1	
Adenovirus 40/41	▮	▮		2
C. difficile antigen/toxin	▮	▮		2
Rotavirus	▮	▮		2
Shiga toxin	▮			2
Norovirus			▮	1

Program Information

- SP - Two 1.0-mL liquid specimens; for use with rapid or molecular testing methods; not available to international customers due to United States export law restrictions
- SPN - Two 1.0-mL liquid specimens; for use with rapid or molecular testing methods; intended for international laboratories
- SP1 - One 1.0-mL liquid specimen compatible with molecular methods only
- Two shipments per year

Shiga Toxin ST

Analyte	Program Code	Challenges per Shipment
	ST	
Shiga toxin	▮	2

Program Information

- Two 0.5-mL liquid specimens
- For use with direct shiga toxin testing only; not compatible with culture methods, cytotoxicity assays, or PCR
- Not available to international customers due to United States export law restrictions
- Two shipments per year

Bacterial Vaginosis BV

Procedure	Program Code	Challenges per Shipment
	BV	
Bacterial vaginosis detection	▮	3

Program Information

- Three 1.0-mL liquid specimens
- For OSOM® BVBlue users
- Two shipments per year

Vaginitis Screen VS, VS1

Analyte	Program Code		Challenges per Shipment
	VS*	VS1**	
***Candida* sp.**	▮		5
Gardnerella vaginalis	▮		5
Trichomonas vaginalis	▮	▮	5

*The biohazard warning applies to Survey VS.
**Molecular users are encouraged to use *Trichomonas vaginalis*, Molecular (TVAG) on page 186.

Program Information

- VS - Five swabs for DNA probe technology; BD Affirm™ VP III probe detection method; three shipments per year

- VS1 - Five swabs for methods such as Sekisui OSOM *Trichomonas* Rapid Test, *Trichomonas vaginalis* methods; two shipments per year

Mycoplasma genitalium, Molecular MGEN

NEW

Analyte	Program Code	Challenges per Shipment
	MGEN	
Mycoplasma genitalium	▮	3

Program Information

- Three 1.0-mL liquid specimens
- Designed for molecular techniques
- Two shipments per year

Molecular Vaginal Panel MVP

Analyte	Program Code	Challenges per Shipment
	MVP	
Candida species group	▮	5
Candida krusei	▮	5
Candida glabrata	▮	5
Trichomonas vaginalis	▮	5
Bacterial vaginosis	▮	5

Program Information

- Five 1.0-mL liquid simulated vaginal specimens
- Designed for molecular methods such as BD MAX and Hologic
- Three shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

C. trachomatis and *N. gonorrhoeae* by NAA HC6, HC6X, HC7

Procedure	Program Code		Challenges per Shipment
	HC6,* HC6X*	HC7	
Nucleic acid amplification (NAA)	▮		5
Nucleic acid amplification (NAA/DNA)		▮	5

*The biohazard warning applies to Surveys HC6 and HC6X.

Program Information

- HC6 - Three swab specimens and two 1.0-mL simulated urine specimens
- HC6X - Three swab specimens; two 1.0-mL simulated urine specimens in duplicate
- Three shipments per year

- HC7 - Five 1.5-mL simulated body fluid specimens; designed for Cepheid users
- Three shipments per year

Vaginitis Screen, Virtual Gram Stain VS2

Procedure	Program Code	Challenges per Shipment
	VS2	
Interpretation of Gram-stained vaginal smears	▮	3

Additional Information

See system requirements on page 13.

Program Information

- Three online, whole slide images
- Powered by DigitalScope technology
- Two activities per year; your CAP shipping contact will be notified via email when the activity is available

Trichomonas vaginalis, Molecular TVAG

Analyte	Program Code	Challenges per Shipment
	TVAG	
Trichomonas vaginalis	▮	3

Program Information

- Three 1.0-mL liquid specimens
- Designed for molecular techniques
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Vancomycin-resistant *Enterococcus* VRE

Procedure	Program Code	Challenges per Shipment
	VRE	
Vancomycin-resistant *Enterococcus* (VRE) detection	▮	2

Program Information

- Two swabs with diluents
- For use with molecular methods and culture-based testing
- Two shipments per year

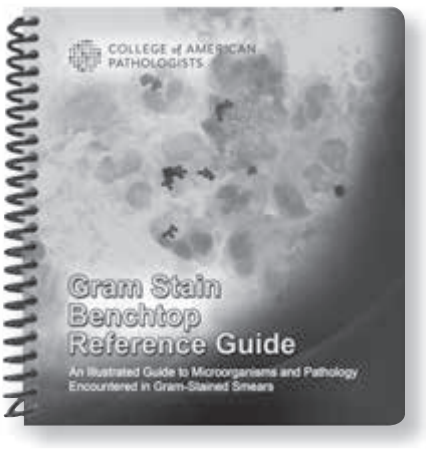
Identify microorganisms quickly and confidently.

Gram Stain Benchtop Reference Guide is an illustrated guide to gram-positive and gram-negative organisms. Its rugged construction is well suited for students and medical technologists for heavy use at the workbench.

Features include:

- Theory and application of the Gram stain
- Detailed descriptions of microbial morphology, quantitation, and indicators of pathology
- Examples of more than 35 gram-positive and gram-negative organisms found in blood, body fluids, CSF, urine, and the genital and respiratory tracts
- Seven tabbed sections for easy reference

This sturdy, spiral-bound, laminated guide is conveniently sized at 6½" x 7".



Item number: GSBRG
Spiral bound; 100 pages;
115+ images and tables; 2017

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Mycobacteriology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Mycobacteriology E

Procedure	Program Code	Challenges per Shipment
	E	
Acid-fast smear	▮	1
Antimycobacterial susceptibility testing	▮	1 graded, 1 ungraded
Mycobacterial identification*	▮	5

*This procedure requires identification of *Mycobacterium tuberculosis*.

Program Information

- Five simulated clinical isolates with diluents and one specimen for performing an acid-fast bacillus smear
- Identification may be performed by culture or molecular methods
- Two shipments per year

Mycobacteriology—Limited E1

Procedure	Program Code	Challenges per Shipment
	E1	
Acid-fast smear	▮	5
Mycobacterial culture	▮	5

Program Information

- Five simulated specimens for acid-fast smears and/or for the determination of the presence or absence of acid-fast bacillus by culture
- Two shipments per year

Molecular MTB Detection and Resistance MTBR

Procedure	Program Code	Challenges per Shipment
	MTBR	
Mycobacterium tuberculosis detection	▮	3
Rifampin resistance	▮	3

Program Information

- Three 1.25-mL simulated sputum specimens for use with molecular methods
- Not suitable for culture
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Mycology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Mycology and Aerobic Actinomycetes F

Procedure	Program Code	Challenges per Shipment
	F	
Antifungal susceptibility testing	▮	1
Cryptococcal antigen detection	▮	2 per year
Mold and yeast identification	▮	5

Program Information

- Five loops for culture with diluents in duplicate and one 1.0-mL simulated cerebrospinal fluid specimen (A and B shipments only)
- Identification of yeasts, molds, and aerobic actinomycetes may be performed by molecular- and culture-based methods
- Three shipments per year

Yeast F1

Procedure	Program Code	Challenges per Shipment
	F1	
Antifungal susceptibility testing	▮	1
Cryptococcal antigen detection	▮	2 per year
Yeast identification	▮	5

Program Information

- Five loops for culture with diluents in duplicate and one 1.0-mL simulated cerebrospinal fluid specimen (A and B shipments only)
- Identification of yeast may be performed by molecular- and culture-based methods
- Three shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Candida Culture F3

Procedure	Program Code	Challenges per Shipment
	F3	
Yeast identification	▮	5

Program Information

- Five loops for culture with diluents in duplicate
- Identification of *Candida* species may be performed by culture, molecular, and rapid methods
- Three shipments per year

Cryptococcal Antigen Detection CRYP

Procedure	Program Code	Challenges per Shipment
	CRYP	
Cryptococcal antigen	▮	5

Program Information

- Five 1.0-mL simulated cerebral spinal fluids
- Three shipments per year

Galactomannan FGAL

Analyte	Program Code	Challenges per Shipment
	FGAL	
Galactomannan - *Aspergillus*	▮	3

Program Information

- Three liquid specimens
- For use with methods such as Bio-Rad Platelia™
- Two shipments per year

Fungal Serology FSER

Procedure	Program Code	Challenges per Shipment
	FSER	
Serological detection of specific fungal antibodies	▮	3

Program Information

- Three serum specimens
- For use with immunodiffusion methods
- Designed for the detection of antibodies to *Aspergillus, Blastomyces, Coccidioides,* and *Histoplasma*
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Fungal Smear FSM

Procedure	Program Code	Challenges per Shipment
	FSM	
KOH preparation/calcofluor white	▮	3

Program Information
- Three unstained slides
- Two shipments per year

India Ink IND

Procedure	Program Code	Challenges per Shipment
	IND	
India ink	▮	2

Program Information
- Two liquid specimens
- Two shipments per year

Pneumocystis jirovecii PCP1, PCP2, PCP4

Procedure	Program Code			Challenges per Shipment
	PCP1	PCP2	PCP4	
PCP – Calcofluor white stain	▮			3
PCP – DFA stain		▮		3
PCP – GMS stain			▮	3

Program Information
- Three images, each available as photographs and online images for *Pneumocystis jirovecii*
- Two shipments per year

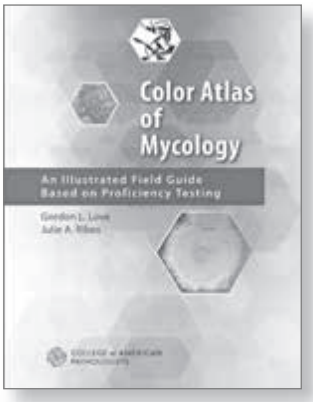
Color Atlas of Mycology (PUB226)

Built upon a foundation of more than 15 years of proficiency testing data, this resource book is designed to assist pathologists and medical technologists in the laboratory identification of fungi using the most recent taxonomic classifications. The text highlights diagnostic clusters of incorrect identifications and addresses conceptual classification issues. Comprehensive and complete, this book merges in vitro mycology (colonies on plated media/LPAB preparations) with in vivo mycology (histology/cytology).

Add Color Atlas of Mycology (PUB226) to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org



Item number: PUB226
Hardcover; 2018

Parasitology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Parasitology P, P3, P4, P5

Procedure	Challenges per Shipment			
	Program Code			
	P	P3	P4	P5
Fecal suspension (wet mount)	2	5	2	
Fecal suspension (*Giardia* and *Cryptosporidium* immunoassays and/or modified acid-fast stain)	2	1	1	5
Giemsa-stained blood smear	1			
Preserved slide (for permanent stain)	2		3	

Additional Information

- The proficiency testing materials used for the Parasitology Surveys contain formalin as a preservative.
- Modified acid-fast stain results do not meet CLIA requirements for parasite identification.
- Number of specimen types are indicated in chart.

Program Information

- P - Five specimens consisting of thin and thick films for blood and tissue parasite identification; preserved slides for permanent stain; 0.75-mL fecal suspensions for direct wet mount examination, photographs, and/or online images; two 0.75-mL fecal suspensions for *Giardia* and *Cryptosporidium* immunoassays and/or modified acid-fast stain
- P3 - Five 0.75-mL fecal suspensions for direct wet mount examination, photographs, and/or online images; one 0.75-mL fecal suspension for *Giardia* and *Cryptosporidium* immunoassays and/or modified acid-fast stain
- P4 - Five specimens consisting of 0.75-mL fecal suspensions for direct wet mount examination, preserved slides for permanent stain, photographs, and/or online images; one 0.75-mL fecal suspension for *Giardia* and *Cryptosporidium* immunoassays and/or modified acid-fast stain
- P5 - Five 0.75-mL fecal suspensions for *Giardia* and *Cryptosporidium* immunoassays and/or modified acid-fast stain
- Three shipments per year

CE credit

Blood Parasite BP

Procedure	Program Code	Challenges per Shipment
	BP	
Thin/thick blood film sets*	▮	5

*This Survey will include corresponding thick films when available.

Program Information
- Five Giemsa-stained blood film sets, photographs, and/or online images
- A variety of blood parasites, including *Plasmodium, Babesia, Trypanosoma,* and filarial worms
- Three shipments per year

Rapid Malaria RMAL

Procedure	Program Code	Challenges per Shipment
	RMAL	
Rapid malaria detection	▮	3

*Detects *Plasmodium falciparum* specific histidine-rich protein 2 (HRP2). May not be compatible with methods that use pLDH enzyme detection for mixed malaria infections.

Program Information
- Three 0.5-mL antigen specimens
- Two shipments per year

Expanded Parasitology PEX

Procedure	Program Code	Challenges per Shipment
	PEX	
Parasite identification	▮	3

This program provides an educational opportunity to challenge laboratory professionals' competency in the identification of parasites utilizing photo images.

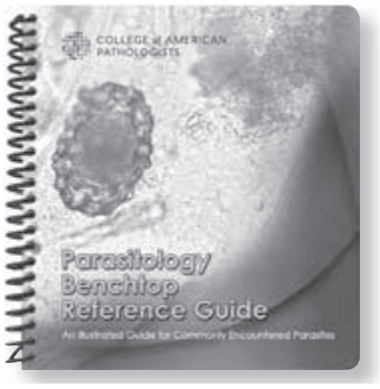
Program Information
- Three images, each available as photographs and online images
- Two shipments per year

Parasitology Benchtop Reference Guide (PBRG)

- More than 70 identifications for parasites commonly encountered in the clinical laboratory
- Five tabbed sections for easy reference
  - Blood Parasites
  - Intestinal Protozoa
  - Intestinal Helminths
  - Miscellaneous Specimens
  - Macroscopic Worms
- A durable and water-resistant format to withstand years of benchtop use—6½" x 7"

Add it to your order.

Or, view sample pages and purchase online:
- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: PBRG
Spiral bound; 98 pages;
70+ images and tables; 2014

Ticks, Mites, and Other Arthropods TMO

Procedure	Program Code	Challenges per Shipment
	TMO	
Tick, mite, and arthropod identification	▮	3

Program Information
- Three images, each available as photographs and online images
- Two shipments per year

Worm Identification WID

Procedure	Program Code	Challenges per Shipment
	WID	
Worm identification	▮	3

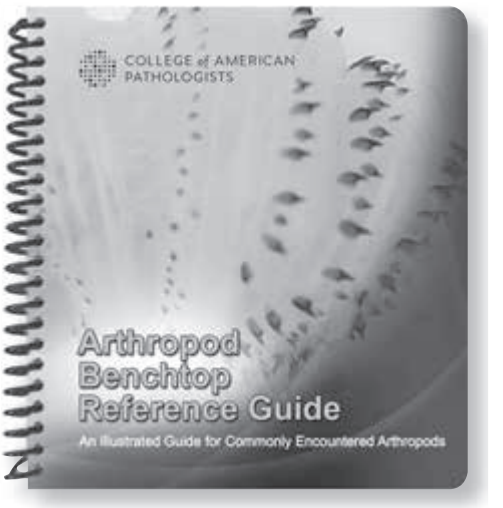
Program Information
- Three images, each available as photographs and online images
- Two shipments per year

Arthropod Benchtop Reference Guide (ABRG)

- Numerous identifications of ectoparasites commonly encountered in the clinical laboratory
- Detailed descriptions of the most significant morphologic elements, ecology, and clinical significance
- Eight tabbed sections for easy reference
  - Introduction
  - Ticks
  - Mites
  - Lice
  - Bed Bugs
  - Kissing Bugs
  - Fleas
  - Myiasis-causing Fly Larvae
- A durable and water-resistant format to withstand years of benchtop use—6½" x 7"

Add it to your order.

Or, view sample pages and purchase online:
- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: ABRG
Spiral bound; 82 pages;
65+ images and tables; 2016

Virology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Guide for Ordering Regulated Virology Surveys

Program Code	Procedure	
	Viral Identification	Viral Antigen Detection
VR1	▮	
VR2		▮
VR4		▮
HC2		▮
HC4	▮	
ID3	▮	
ID5	▮	

Guide to Virology Testing

Use this flowchart as a guide for ordering the appropriate Virology Surveys for your laboratory's testing menu. For the subspecialty of virology, participants must test five specimens per mailing. If you have any questions, please call the Customer Contact Center at 800-323-4040 or 847-832-7000 option 1.

For Comprehensive Virology Culture Testing → Select **VR1** (page 196)

For Virology Antigen Testing by Immunofluorescence → Select **VR2** (page 196)

For Viral Serology Testing → Select **VR3, VR3M** (page 205)

For Virology Antigen by EIA or Latex Agglutination → Select **VR4** (page 196)

For Herpes Simplex Virus Antigen Detection by DFA → Select **HC2** (page 197)

For Herpes Simplex Virus Culture Testing → Select **HC4** (page 197)

For Viral Load Testing → Select **HV2, HCV2, HBVL, HBVL5, VLS, VLS2** (pages 198-199)

For Nucleic Acid Amplification → Select **ID1, ID1T, ID2, ID5, VBDM** (pages 197, 198, 200)

Virology Culture VR1

Procedure	Program Code	Challenges per Shipment
	VR1	
Chlamydia trachomatis culture	▮	1
Viral isolation/identification	▮	5

Program Information

- Five 0.5-mL specimens for viral culture and one 0.5-mL specimen for *Chlamydia trachomatis* culture
- Three shipments per year

Virology Antigen Detection (DFA) VR2

Analyte/Procedure	Program Code	Challenges per Shipment		
	VR2	A	B	C
Adenovirus antigen	▮	1	1	
Cytomegalovirus antigen	▮	1	1	
Herpes simplex virus (HSV) antigen	▮		1	1
Influenza A antigen	▮	1		1
Influenza B antigen	▮		1	
Parainfluenza antigen	▮	1		1
Respiratory syncytial virus (RSV) antigen	▮	1		1
Varicella-zoster antigen	▮		1	1
Educational challenge	▮	1		

Program Information

- Five 5-well slide specimens
- Three shipments per year

Virology Antigen Detection (Non-DFA) VR4

Analyte	Program Code	Challenges per Shipment
	VR4	
Adenovirus (Not 40/41) antigen	▮	5
Influenza A antigen	▮	5
Influenza B antigen	▮	5
Respiratory syncytial virus (RSV) antigen	▮	5
Rotavirus antigen	▮	5

Program Information

- Five 1.5-mL specimens
- For use with enzyme immunoassay and/or latex agglutination methods
- Three shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Herpes Simplex Virus HC2, HC4

Procedure	Program Code		Challenges per Shipment
	HC2	HC4*	
Herpes simplex virus antigen detection (DFA)	▮		5
Herpes simplex virus culture		▮	5

*The biohazard warning applies to Survey HC4.

Program Information

- HC2 - Five 5-well slide specimens
- HC4 - Five 0.5-mL lyophilized specimens
- Three shipments per year

Human Papillomavirus HPV

Analyte	Program Code	Challenges per Shipment
	HPV	
Human papillomavirus	▮	2

For laboratories using Digene, SurePath, and/or ThinPrep collection media, see page 287.

Program Information

- Two simulated cervical specimens contained in Digene transport media
- For Digene Hybrid Capture only
- Two shipments per year

Nucleic Acid Amplification, Viruses ID1, ID1T

Analyte	Program Code		Challenges per Shipment
	ID1	ID1T	
Cytomegalovirus	▮		1
Enterovirus	▮		1
Epstein-Barr virus	▮		1
Herpes simplex virus	▮		1
Human herpesvirus 6	▮		1
Human herpesvirus 8	▮		1
Parvovirus B19	▮		1
Varicella-zoster virus	▮		1
BK virus		▮	1
JC virus		▮	1

Program Information

- ID1- Eight 1.0-mL liquid specimens
- ID1T - Two 1.0-mL liquid specimens
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Nucleic Acid Amplification, Respiratory ID2

Analyte	Program Code	Challenges per Shipment
	ID2	
Adenovirus	▮	1
Coronavirus**/Rhinovirus*	▮	1
Human metapneumovirus	▮	1
Influenza virus*	▮	1
Parainfluenza virus	▮	1
Respiratory syncytial virus (RSV)	▮	1

*Coronavirus/Rhinovirus and Influenza virus will be included in the following shipments:

- Shipment A: Coronavirus and Influenza A
- Shipment B: Rhinovirus and Influenza B

** Laboratories performing SARS-CoV-2 testing should see COV2 program in online store, here.

Program Information

- Six 1.0-mL liquid specimens
- Two shipments per year

Influenza A, Influenza B, and RSV by Nucleic Acid Amplification ID3

Analyte	Program Code	Challenges per Shipment
	ID3	
Influenza A virus	▮	5
Influenza B virus	▮	5
Respiratory syncytial virus (RSV)	▮	5

Program Information

- Five 1.0-mL liquid specimens
- Designed for molecular multiplex panel users
- Three shipments per year

HSV, VZV—Molecular ID5

NEW

Analyte	Program Code	Challenges per Shipment
	ID5	
Herpes simplex virus	▮	5
Varicella-zoster virus	▮	5

Program Information

- Five 1.0-mL liquid specimens
- Designed for molecular techniques
- Three shipments per year

Hepatitis Viral Load HCV2, HBVL, HBVL5

Procedure	Challenges per Shipment		
	Program Code		
	HCV2	HBVL	HBVL5
HCV genotyping	1		
HCV, qualitative	1		
HCV viral load	5		
HBV viral load		3	5

Program Information

- HCV2 - Five 1.5-mL liquid plasma specimens; three shipments per year
- HBVL - Three 1.5-mL plasma specimens; two shipments per year
- HBVL5 - Five 1.5-mL plasma specimens; three shipments per year

HIV Viral Load HV2, HIVG

Procedure	Program Code		Challenges per Shipment
	HV2	HIVG	
HIV-RNA viral load	▮		5
HIV genotyping*		▮	1

*HIV genotyping is for laboratories reporting reverse transcriptase, protease, and/or integrase mutations.

Program Information

- HV2 - Five 2.5-mL EDTA plasma specimens
- HIVG - One 1.0-mL liquid specimen
- Three shipments per year

Viral Load VLS, VLS2

Procedure	Program Code		Challenges per Shipment
	VLS	VLS2	
BK viral load	▮	▮	2
CMV viral load	▮	▮	2
EBV viral load	▮	▮	2
Adenovirus viral load		▮	2
HHV6 viral load		▮	2

Program Information

- VLS - Six 1.0-mL EDTA plasma specimens; two shipments per year
- VLS2 - Ten 2.0-mL EDTA plasma specimens; three shipments per year

Atlas of Fundamental Infectious Diseases Histopathology (PUB127)

This resource book is rich in detailed information and real-world examples to help anatomic pathologists identify infectious organisms in tissue, study patterns of inflammation for clues, understand which stains are best for detecting specific micro-organisms, spot infectious disease mimics, and select ancillary methods of detection.

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB127
Softcover; 304 pages; 800+ images and tables; 2018

Viral Load Calibration Verification/Linearity LN38, LN39, LN45

Analyte	Program Code			
	LN38*	LN39	LN45	Target Ranges
CMV viral load	▮			316–1.0M IU/mL
HIV viral load		▮		50–5.0M IU/mL
HCV viral load			▮	50–280M IU/mL

*The biohazard warning applies to Survey LN38.

View your expedited linearity evaluations within two business days by logging into e-LAB Solutions Suite.

Program Information

- LN38 - Six 1.5-mL frozen plasma specimens
- Two shipments per year; ships on dry ice

- LN39 - Six 2.5-mL plasma specimens
- LN45 - Seven 2.5-mL frozen DNA specimens
- Two shipments per year; ships on dry ice (dry ice does not apply to LN39)

Vector-Borne Disease—Molecular VBDM

Analyte	Program Code	Challenges per Shipment
	VBDM	
Zika virus	▮	3

Program Information

- Three 1.5-mL liquid specimens
- Two shipments per year

The CAP is your trusted calibration verification and linearity partner, providing you with the most comprehensive menu of programs.

- **Large peer groups**—Maximize confidence in instrument calibration by using peer group data for a broader view beyond your laboratory.
- **Customized report package**—Let our team of biostatisticians perform the statistical analysis of your results so you do not have to.
- **Expedited results**—View your linearity evaluation for most CVL programs within two business days of data submission.

See the Instrumentation Verification Tools section of this catalog to determine programs that best fit your laboratory's CVL needs.

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Multidiscipline Microbiology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Guide for Ordering Regulated Molecular Multidiscipline Surveys

Program Code	Procedure	
	Bacterial Identification	Viral Identification
IDR	▮	▮
GIP5	▮	▮

Nucleic Acid Amplification, Organisms IDO, IDN

Analyte/Procedure	Program Code		Challenges per Shipment
	IDO	IDN	
Bordetella pertussis/parapertussis	▮	▮	1
*Legionella pneumophila/Chlamydia pneumoniae**	▮	▮	1
Methicillin-resistant *Staphylococcus aureus*	▮	▮	1
Molecular typing (bacterial isolates)	▮	▮	1
Mycobacterium tuberculosis	▮		1
Mycoplasma pneumoniae	▮	▮	1
Vancomycin-resistant *Enterococcus*	▮	▮	1

**Legionella pneumophila/Chlamydia pneumoniae* will be included in the following shipments:

- Shipment A: *Chlamydia pneumoniae*
- Shipment B: *Legionella pneumophila*

Program Information

- IDO - Seven liquid or swab simulated clinical isolate specimens and two diluents
- IDN - Six liquid or swab simulated clinical isolate specimens and two diluents; designed for international laboratories that cannot receive MTB
- Two shipments per year

BIOHAZARD

BIOHAZARD Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Meningitis/Encephalitis Panel IDME

Analyte	Program Code	Challenges per Shipment
	IDME	
Escherichia coli K1	▮	3
Haemophilus influenzae	▮	3
Listeria monocytogenes	▮	3
Neisseria meningitidis	▮	3
Streptococcus agalactiae	▮	3
Streptococcus pneumoniae	▮	3
Cytomegalovirus (CMV)	▮	3
Enterovirus	▮	3
Herpes simplex virus 1 (HSV-1)	▮	3
Herpes simplex virus 2 (HSV-2)	▮	3
Human herpesvirus 6 (HHV-6)	▮	3
Human parechovirus	▮	3
Varicella-zoster virus (VZV)	▮	3
Cryptococcus neoformans/gattii	▮	3

Program Information

- Three 1.0-mL liquid specimens
- Designed for molecular multiplex panel users
- Two shipments per year

Infectious Disease, Respiratory Panel IDR

Analyte	Program Code	Challenges per Shipment
	IDR	
Adenovirus	▮	5
Bocavirus	▮	5
Bordetella (pertussis, parapertussis, bronchiseptica, holmesii)	▮	5
Chlamydia pneumoniae	▮	5
Coronavirus*	▮	5
Human metapneumovirus	▮	5
Influenza A	▮	5
Influenza B	▮	5
Legionella pneumophila	▮	5
Mycoplasma pneumoniae	▮	5
Parainfluenza type 1, 2, 3	▮	5
Parainfluenza type 4	▮	5
Respiratory syncytial virus (RSV)	▮	5
Rhinovirus/Enterovirus	▮	5

Program Information

- Five 1.0-mL liquid specimens
- Designed for molecular multiplex panel users
- Three shipments per year

*Laboratories performing SARS-CoV-2 testing should see COV2 program in online store, here.

Infectious Disease, Pneumonia Panel IDPN

NEW

Analyte	Program Code	Challenges per Shipment
	IDPN	
Acinetobacter calcoaceticus-baumannii complex	▮	5
Adenovirus	▮	5
Coronavirus*	▮	5
Chlamydia pneumoniae	▮	5
Enterobacter cloacae complex	▮	5
Escherichia coli	▮	5
Haemophilus influenzae	▮	5
Human metapneumovirus	▮	5
Rhinovirus/Enterovirus	▮	5
Influenza A	▮	5
Influenza B	▮	5
Klebsiella aerogenes	▮	5

Klebsiella pneumoniae group	▮	5
Legionella pneumophila	▮	5
Moraxella catarrhalis	▮	5
Mycoplasma pneumoniae	▮	5
Parainfluenza virus	▮	5
Proteus spp.	▮	5
Pseudomonas aeruginosa	▮	5
Respiratory syncytial virus (RSV)	▮	5
Serratia marcescens	▮	5
Staphylococcus aureus	▮	5
Streptococcus agalactiae	▮	5
Streptococcus pneumoniae	▮	5
Streptococcus pyogenes	▮	5

Includes antimicrobial resistance genes as appropriate.

*Laboratories performing SARS-CoV-2 testing should see COV2 program in online store, here.

Program Information

- Five 1.0-mL liquid specimens
- Designed for molecular multiplex panel users
- Three shipments per year

Gastrointestinal Panel GIP5, GIP

Analyte	Challenges per Shipment	
	Program Code	
	GIP5	GIP
Adenovirus	5	3
Astrovirus	5	3
Campylobacter	5	3
Clostridium difficile, toxin A/B	5	3
Cryptosporidium	5	3
Cyclospora cayetanensis	5	3
Entamoeba histolytica	5	3
Enteroaggregative *E. coli* (EAEC)	5	3
Enteropathogenic *E. coli* (EPEC)	5	3
Enterotoxigenic *E. coli* (ETEC) LT/ST	5	3
***Escherichia coli* O157**	5	3
Giardia	5	3
Norovirus GI/GII	5	3
Plesiomonas shigelloides	5	3
Rotavirus A	5	3
Salmonella	5	3
Sapovirus	5	3
Shiga-like toxin producing *E. coli* (STEC) stx1/stx2	5	3
***Shigella*/Enteroinvasive *E. coli* (EIEC)**	5	3
Shigella	5	3
Vibrio cholerae	5	3
Yersinia enterocolitica	5	3

Note: Only GIP5 analytes in **bold** type will meet CMS requirements for bacteriology and virology identification.

Program Information

- GIP5 - Five 1.0-mL simulated stool specimens; three shipments per year
- GIP - Three 1.0-mL simulated stool specimens; two shipments per year
- Designed for molecular multiplex panel users
- Not available to international customers due to United States export law restrictions

Infectious Disease Serology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Infectious Disease Serology VR3, VR3M

Analyte	Program Code		Challenges per Shipment
	VR3	VR3M	
Cytomegalovirus (CMV) – IgG, IgM, and total antibodies	▮		1
Epstein-Barr virus (EBV) – VCA – IgG, IgM EBNA – IgG, IgM, and total antibodies EA – IgG	▮		1
Helicobacter pylori – IgG, IgA, and total antibodies	▮		1
Herpes simplex virus (HSV) – IgG antibody	▮		1
Mycoplasma pneumoniae – IgG, IgM, and total antibodies	▮		1
Mumps – IgG		▮	1
Rubeola virus (English measles) – IgG antibody	▮		1
Toxoplasma gondii – IgG, IgM, and total antibodies	▮		1
Varicella-zoster virus – IgG and total antibodies	▮		1

Program Information

- VR3 - Eight 0.5-mL lyophilized defibrinated plasma specimens
- VR3M - One 0.5-mL lyophilized defibrinated plasma specimen
- Two shipments per year

Tick-Transmitted Diseases TTD

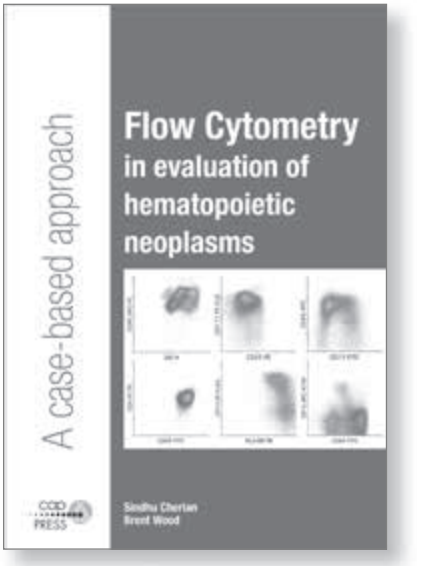
Analyte	Program Code	Challenges per Shipment
	TTD	
Antibodies to tick-transmitted disease organisms	▮	3

Program Information

- Three 0.4-mL liquid specimens
- Designed for the detection of antibodies to *Borrelia burgdorferi*, *Babesia microti*, and *Anaplasma phagocytophilum*
- Two shipments per year

Rely on this reference for a rapidly growing field.

Flow Cytometry in Evaluation of Hematopoietic Neoplasms: A Case-Based Approach is a practical, case-based guide to flow cytometric analysis in the workup of hematopoietic neoplasms presenting in the peripheral blood, marrow, lymphoid tissue, and extranodal sites. This text provides pathologists, residents, laboratory technologists, and hematologists with both a study guide and an atlas for regular consultation in the clinical flow cytometry laboratory.



Item number: PUB221
Hardcover; 176 pages; 2012

Add it to your order.

hCG, serum, qualitative/ quantitative				▮				▮	5
Infectious mononucleosis					▮			▮	5
Rheumatoid factor*						▮		▮	5
Rubella (IgG)*							▮	▮	5

***ANA, ASO, Rheumatoid factor,** and **Rubella** are regulated analytes and are graded for both qualitative and quantitative methods. Semiquantitative and/or titer results for these analytes are ungraded/educational in these Surveys and do not meet regulatory requirements.

Program Information

- ANA and RUB - Five 0.5-mL serum specimens
- ANA - Three educational pattern interpretation dry challenges per year
- ASO, HCG, and RF - Five 1.0-mL serum specimens
- CRP - Two 0.5-mL serum specimens; not appropriate for high-sensitivity CRP (hsCRP) methods
- IM - Five 0.6-mL serum specimens
- RFX - All Survey RF specimens in duplicate
- RUBX - All Survey RUB specimens in duplicate
- IL - All immunology specimens except RFX and RUBX
- Three shipments per year

Immunology, General IG/IGX

	LKM	
Anti-LKM	▮	2

Program Information
- Two 1.0-mL serum specimens
- Two shipments per year

M. tuberculosis-Stimulated Infection Detection QF

Analyte	Program Code	Challenges per Shipment
	QF	
M. tuberculosis	▮	2

Program Information
- Two 1.0-mL lyophilized serum specimens and one lyophilized mitogen control
- For use with the QuantiFERON®-TB Gold and Gold Plus methods only
- Two shipments per year

Rheumatic Disease Special Serologies RDS

Analyte	Program Code	Challenges per Shipment
	RDS	
Anti-Jo-1 (antihistidyl t-RNA synthetase)	▮	1
Anti-Scl-70 (anti-DNA topoisomerase)	▮	1

Program Information
- Two 1.0-mL serum specimens
- Two shipments per year

CE credit

Syphilis Serology G

Analyte	Program Code	Challenges per Shipment
	G	
Syphilis	▮	5

Use with VDRL, RPR, MHA-TP/TP-PA/PK-TP/TPHA, EIA, CMIA, multiplex flow immunoassay, TP-LIA IgG, FTA-ABS, and USR methods. Laboratories performing syphilis serology on CSF specimens may also use this Survey.

Program Information
- Five 1.5-mL serum specimens
- Three shipments per year

CE credit

Total Hemolytic Complement CH50

Analyte	Program Code	Challenges per Shipment
	CH50	
Total hemolytic complement, 50% lysis	▮	2
Total hemolytic complement, 100% lysis	▮	2

Program Information
- Two 0.5-mL lyophilized serum specimens
- Two shipments per year

Viscosity V

Analyte	Program Code	Challenges per Shipment
	V	
Viscosity	▮	2

Program Information
- Two 10.0-mL serum specimens
- Two shipments per year

Serum Free Light Chains SFLC

Analyte	Program Code	Challenges per Shipment
	SFLC	
Kappa serum free light chain	▮	3
Lambda serum free light chain	▮	3
Kappa/lambda serum free light chain ratio and ratio interpretation	▮	3

Program Information
- Three 1.0-mL serum specimens
- Two shipments per year

Flow Cytometry

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Flow Cytometry FL, FL1, FL2

Procedure	Program Code			Challenges per Shipment
	FL	FL1	FL2	
DNA content and cell cycle analysis	▮		▮	3
Lymphocyte immunophenotyping	▮	▮		3

These Surveys are not appropriate for hematology analyzers with monoclonal antibody analysis.

Program Information

- FL1 - Three 1.5-mL whole blood specimens
- FL2 - Three 1.1-mL specimens; two fixed cell line specimens and one calibrator for DNA content and cell cycle analysis
- FL - All Survey FL1 and FL2 specimens
- Three shipments per year

Flow Cytometry—Immunophenotypic Characterization of Leukemia/Lymphoma FL3

Procedure	Program Code	Challenges per Shipment
	FL3	
Leukemia/lymphoma	▮	2

Survey FL3 is appropriate for laboratories that perform technical component-only flow cytometry testing.

Program Information

- Two 2.5-mL whole blood specimens and/or cell lines simulating leukemia/lymphoma; images of tissue sections, bone marrow, and/or peripheral blood smears with clinical histories
- Online, whole slide images powered by DigitalScope® technology
- Two shipments per year

Flow Cytometry, CD34+ FL4

Analyte	Program Code	Challenges per Shipment
	FL4	
CD34+	▮	2

Program Information

- Two 1.5-mL stabilized human CD34+ specimens
- Two shipments per year

Flow Cytometry, Interpretation Only FL5

Procedure	Program Code	Challenges per Shipment
	FL5	
Flow cytometry, interpretation only of leukemia/lymphoma	▮	3

Survey FL5 is for laboratories that receive flow cytometry analyses from referring laboratories to perform the interpretation of patient results.

Program Information

- Three cases consisting of gated dot plots, clinical histories, and pertinent laboratory data, as well as images of tissue sections, bone marrow, and/or peripheral blood smears
- Online, whole slide images powered by DigitalScope technology
- Two shipments per year

Flow Cytometry—Post-Immunotherapy Analysis FL6

NEW

Procedure	Program Code	Challenges per Shipment
	FL6	
Post-immunotherapy flow cytometry analysis	▮	3

Survey FL6 is appropriate for laboratories that perform flow cytometry analysis on samples from patients treated with chimeric antigen receptor (CAR) T-cell or other immunotherapy regimens that cause immunophenotypic changes to normal and/or neoplastic cells.

Program Information

- Three cases consisting of gated dot plots, clinical histories, and pertinent laboratory data, as well as images of tissue sections, bone marrow, and/or peripheral blood smears
- Online, whole slide images powered by DigitalScope technology
- Two shipments per year

Flow Cytometry—B-ALL Minimal Residual Disease BALL

Analyte	Program Code	Challenges per Shipment
	BALL	
B-ALL minimal residual disease	▮	3

Survey BALL is intended for laboratories that currently or will begin to perform minimal residual disease (MRD) testing (rare event analysis) for B lymphoblastic leukemia/lymphoma. The cases presented will be based on Children's Oncology Group (COG) approved B-ALL MRD method.

Minimum Requirements

- For ungated list mode files, each challenge will include 2-3 "virtual tubes" performed by a 6-color method. The participant will download the files from a CAP website and analyze the data on a MAC or PC using standard software, including FlowJo, FACSDiva, Kaluza, Woodlist, etc. The files will be large as each tube will have collected hundreds of thousands of events. Boolean gating will be necessary to see if there is an atypical population.
- Demo list mode files are available for download to determine software compatibility prior to enrollment. Go to fileshare.cap.org (user name: demo-b-all-mrd; password: ProductTest1).

Program Information

- One 1.1-mL specimen containing a cell line/whole blood mixture simulating B lymphoblastic leukemia/lymphoma minimal residual disease with clinical history
- Two cases with ungated list mode files that allow users to examine gating strategies and interpret antibody staining patterns; files are in standard format (see Minimum Requirements)
- Two shipments per year

Flow Cytometry—Plasma Cell Neoplasms PCNEO

Analyte	Program Code	Challenges per Shipment
	PCNEO	
Plasma cell neoplasms	▮	3

Survey PCNEO is especially helpful for laboratories that have leukemia/lymphoma assays that target plasma cell neoplasms, including cytoplasmic light chain staining.

Program Information

- One 2.5-mL whole blood specimen and/or cell line simulating a plasma cell neoplasm with clinical history and pertinent laboratory data
- Two cases consisting of gated dot plots, clinical histories, and pertinent laboratory data
- Each challenge includes images of tissue sections, bone marrow, and/or peripheral blood smears
- Online, whole slide images powered by DigitalScope technology
- Two shipments per year

Flow Cytometry—Immunophenotypic Characterization of Paroxysmal Nocturnal Hemoglobinuria PNH

Analyte	Program Code	Challenges per Shipment
	PNH	
PNH RBC analysis	▮	2
PNH WBC analysis	▮	2

Additional Information

- The PNH Survey complies with the recommendations from the *Guidelines for the Diagnosis and Monitoring of Paroxysmal Nocturnal Hemoglobinuria and Related Disorders by Flow Cytometry* for RBC and WBC analysis. Due to the unique nature of these human, donor-based materials, the shipping dates are subject to change. If this should occur, the CAP will provide notification prior to the originally scheduled shipping date.
- This Survey is appropriate for high-sensitivity testing (≤0.01% PNH type clone in red cells and/or granulocytes).

Program Information

- Two 0.5-mL whole blood specimens for RBC and WBC analysis
- Two shipments per year

Fetal Red Cell Detection HBF

Procedure	Program Code	Challenges per Shipment
	HBF	
Kleihauer-Betke and flow cytometry	▮	2
Rosette fetal screen	▮	2
Acid elution whole slide image	▮	1

Program Information

- Two 1.2-mL liquid whole blood specimens
- Not designed for F cell quantitation
- Two online, whole slide images per year with optional grids for cell counting
- Powered by DigitalScope® technology
- Two shipments per year

Rare Flow Antigen Validation RFAV1, RFAV2

Analyte	Program Code		Challenges per Shipment
	RFAV1	RFAV2	
CD1a	▮		1
CD103		▮	1

Surveys RFAV1 and RFAV2 do not meet the regulatory requirements for proficiency testing.

Additional Information

These Surveys meet the CAP Accreditation Checklist item FLO.23737, which requires semiannual testing of antigens.

Program Information

- RFAV1 - One 4.5-mL cell line specimen
- RFAV2 - One 1.0-mL stabilized cell specimen
- Two shipments per year

ZAP-70/CD49d Analysis by Flow Cytometry ZAP70

Analyte	Program Code	Challenges per Shipment
	ZAP70	
Zeta chain-associated protein kinase 70	▮	3
CD49d	▮	3

Additional Information

- This Survey tests for intracellular ZAP-70 staining of a cell line. It allows for assessment of the laboratory's staining techniques and the antibody clone used for ZAP-70 detection.
- CD49d is an important prognostic marker for CLL by flow cytometry. This Survey allows assessment of the laboratory's ability to detect CD49d.

Program Information

- Three 4.5-mL cell line specimens
- Two shipments per year

17 Transfusion Medicine, Viral Markers, and Parentage Testing

Confirm all your instruments are in working order.

Monitor performance across multiple instruments between proficiency testing events with Quality Cross Check.

- Gain an early indication of instrument problems.
- Assess comparability across multiple automated and manual methods with the Quality Cross Check—Transfusion Medicine program (JATQ).

Transfusion Medicine, Viral Markers, and Parentage Testing

Transfusion Medicine J, J1

Procedure	Program Code		Challenges per Shipment
	J	J1	
ABO grouping	▮	▮	5
Rh typing	▮	▮	5
Antibody detection	▮		5
Antibody identification	▮		5
Compatibility testing	▮		5
Red blood cell antigen typing	▮		1

Program Information

- J - Five 3.0-mL 3% red blood cell suspensions; five 3.0-mL corresponding serum specimens; one 3.0-mL donor red blood cell suspension
- J1 - Five 3.0-mL 3% red blood cell suspensions; five 3.0-mL corresponding serum specimens
- Three shipments per year

CE credit

Transfusion Medicine—Educational Challenge JE1

Procedure	Program Code	Challenges per Shipment
	JE1	
Educational challenge	▮	1

Program Information

- One educational challenge, which may consist of a paper challenge and/or wet specimen for ABO grouping, Rh typing, antibody detection, antibody identification, compatibility testing, antigen typing, and/or direct antiglobulin testing
- Must order in conjunction with Survey J
- Three shipments per year

CE credit

Electronic Crossmatch EXM

Procedure	Program Code	Challenges per Shipment
	EXM	
Electronic crossmatch	▮	3

Survey EXM assists laboratories in monitoring the performance of their electronic crossmatching system.

Program Information

- Three simulated, ISBT-128 labeled donor unit challenges and three corresponding red blood cell suspensions
- Must order in conjunction with Survey J
- Two shipments per year

CE credit

Transfusion Medicine—Automated JAT

Procedure	Program Code	Challenges per Shipment
	JAT	
ABO grouping	▮	5
Antibody detection	▮	5
Antibody identification	▮	5
Compatibility testing	▮	5
Rh typing	▮	5

Program Information

- Five bar-coded 4.0-mL 18%–22% whole blood specimens and one 4.0-mL 18%–22% whole blood specimen for compatibility testing
- Three shipments per year

CE credit

Transfusion Medicine—Automated Education Challenge JATE1

Procedure	Program Code	Challenges per Shipment
	JATE1	
Educational challenge	▮	1

Program Information

- One educational challenge, which may consist of a paper challenge and/or wet specimen for ABO grouping, Rh typing, antibody detection, antibody identification, and/or compatibility testing
- Must order in conjunction with Survey JAT
- Three shipments per year

CE credit

Quality Cross Check—Transfusion Medicine JATQ

Procedure	Program Code	Challenges per Shipment
	JATQ	
ABO grouping	▮	3
Antibody detection	▮	3
Rh typing	▮	3

This program does not meet regulatory requirements for proficiency testing; see Survey JAT on page 221. For additional information about the Quality Cross Check program, see page 40.

Program Information

- Three 7.0-mL 13-17% whole blood specimens
- May be used with automated and manual procedures
- Two shipments per year

Electronic Crossmatch, Automated EXM2

Procedure	Program Code	Challenges per Shipment
	EXM2	
Electronic crossmatch	▮	3

Survey EXM2 assists laboratories in monitoring the performance of their electronic crossmatching system.

Program Information

- Three simulated, ISBT-128 labeled donor unit challenges and three corresponding red blood cell suspensions
- Must order in conjunction with Survey JAT
- Two shipments per year

CE credit

ABO Subgroup Typing ABOSG

Procedure	Program Code	Challenges per Shipment
	ABOSG	
ABO subgroup typing	▮	3
Rh typing	▮	3

Program Information

- Three 2.0-mL 3% red blood cell suspensions; three 2.0-mL corresponding serum specimens
- Two shipments per year

Red Blood Cell Antigen Genotyping RAG

Procedure	Program Code	Challenges per Shipment
	RAG	
Red blood cell antigen genotype with predictive phenotype	▮	3

Program Information

- Three 2.0-mL whole blood specimens
- Two shipments per year

Red Blood Cell Antigen Typing RBCAT

Procedure	Program Code	Challenges per Shipment
	RBCAT	
Red blood cell antigen typing	▮	2

Program Information

- Two 2.0-mL 2%–4% red blood cell suspensions
- Two shipments per year

Additional Information

Survey RBCAT is for donor centers and transfusion laboratories performing non-automated/manual red cell phenotyping for the management of patients with complex serology (ie, alloimmunization, sickle cell disease, warm autoimmune hemolytic anemia). Challenges will include antigens such as Rh, Kell, MNSs, Duffy, and Kidd blood group system.

Antibody Titer ABT, ABT1, ABT2, ABT3

Procedure	Program Code				Challenges per Shipment
	ABT	ABT1	ABT2	ABT3	
Anti-A titer	▮	▮			1
Anti-B titer				▮	1
Anti-D titer	▮		▮		1

Program Information

- ABT - One 2.0-mL plasma specimen for anti-A titer with one corresponding titer cell (3%–4% red blood cell suspension); one 2.0-mL plasma specimen for anti-D titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT1- One 2.0-mL plasma specimen for anti-A titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT2 - One 2.0-mL plasma specimen for anti-D titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT3 - One 2.0-mL plasma specimen for anti-B titer with one corresponding titer cell (3%–4% red blood cell suspension)
- Two shipments per year

Antibody Titer—Automated AABT, AABT1, AABT2, AABT3

NEW

Procedure	Program Code				Challenges per Shipment
	AABT	AABT1	AABT2	AABT3	
Anti-A titer	▮	▮			1
Anti-B titer				▮	1
Anti-D titer	▮		▮		1

Program Information

- AABT - One 2.0-mL plasma specimen for anti-A titer; one 2.0-mL plasma specimen for anti-D titer
- AABT1 - One 2.0-mL plasma specimen for anti-A titer
- AABT2 - One 2.0-mL plasma specimen for anti-D titer
- AABT3 - One 2.0-mL plasma specimen for anti-B titer
- Two shipments per year

Transfusion-Related Cell Count TRC

Procedure	Program Code	Challenges per Shipment
	TRC	
Platelet count (platelet-rich plasma)	▮	5
WBC count	▮	4
Dry challenge	▮	2

WBC counts must be performed using a Nageotte chamber, fluorescence microscopy, or by flow cytometry.

Program Information

- Five 1.2-mL suspensions of platelet-rich plasma
- Two 1.0-mL vials leukocyte-reduced platelet material
- Two 1.0-mL vials leukocyte-reduced red blood cells
- Three shipments per year

Direct Antiglobulin Testing DAT

Procedure	Program Code	Challenges per Shipment
	DAT	
Direct antiglobulin testing	▮	3

Program Information

- Three 2.0-mL 3% red blood cell suspensions
- For use with manual method
- Two shipments per year

Eluate Survey ELU

Procedure	Program Code	Challenges per Shipment
	ELU	
Antibody elution	▮	2

Program Information

- Two 2.0-mL 50% red blood cell suspensions
- Two shipments per year

Fetal Red Cell Detection HBF

Procedure	Program Code	Challenges per Shipment
	HBF	
Kleihauer-Betke and flow cytometry	▮	2
Rosette fetal screen	▮	2
Acid elution whole slide image	▮	1

Program Information

- Two 1.2-mL liquid whole blood specimens
- Not designed for F cell quantitation
- Two online, whole slide images per year with optional grids for cell counting
- Powered by DigitalScope® technology
- Two shipments per year

Platelet Serology PS

Procedure	Program Code	Challenges per Shipment
	PS	
Antibody detection	▮	3
Platelet crossmatch	▮	3
Platelet antibody identification	▮	3

A low concentration of sodium azide may be present in the specimens and may affect lymphocytotoxicity methods.

Program Information

- Three 3.0-mL plasma specimens
- For use with solid-phase red cell adherence, flow cytometry, and EIA/ELISA methods
- Two shipments per year

Transfusion Medicine Comprehensive—Competency Assessment TMCA

Procedure	Program Code	Challenges per Shipment
	TMCA	
ABO grouping	▮	2
Antibody detection	▮	2
Antibody identification	▮	2
Compatibility testing	▮	2
Rh typing	▮	2

Survey TMCA does not meet the regulatory requirements for proficiency testing.

Program Information

- Two 2.0-mL 3% red blood cell suspensions
- Two 3.0-mL corresponding serum specimens
- One 2.0-mL donor 3% red blood cell suspension
- Three shipments per year; order shipments individually or for an entire year

Direct Antiglobulin Test—Competency Assessment TMCAD

Procedure	Program Code	Challenges per Shipment
	TMCAD	
Direct antiglobulin testing	▮	2

Survey TMCAD does not meet the regulatory requirements for proficiency testing.

Program Information

- Two 2.0-mL 3% red blood cell suspensions
- Two shipments per year; order shipments individually or for an entire year

Eluate Competency Assessment TMCAE

Procedure	Program Code	Challenges per Shipment
	TMCAE	
Antibody elution	▮	2

Survey TMCAE does not meet the regulatory requirements for proficiency testing.

Program Information

- Two 2.0-mL 50% red blood cell suspensions
- Two shipments per year; order shipments individually or for an entire year

Fetal Red Cell Quantitation—Competency Assessment TMCAF

Procedure	Program Code	Challenges per Shipment
	TMCAF	
Kleihauer-Betke, flow cytometry	▮	2
Rosette fetal screen	▮	2
Acid elution whole slide image	▮	1

Survey TMCAF does not meet the regulatory requirements for proficiency testing.

Program Information

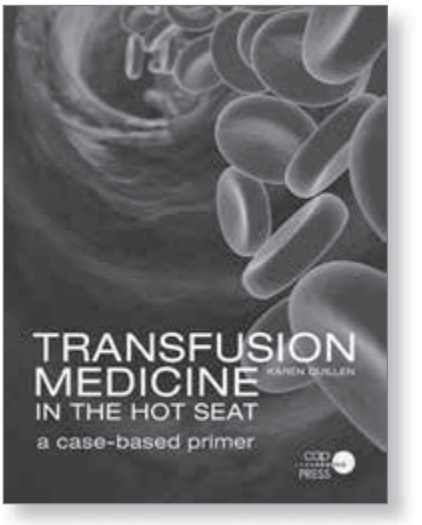
- Two 1.2-mL whole blood specimens
- Two online, whole slide images per year with optional grids for cell counting
- Powered by DigitalScope technology
- Two shipments per year; order shipments individually or for an entire year

Make critical transfusion decisions with confidence.

Transfusion Medicine in the Hot Seat is a valuable educational resource for pathology trainees and pathologists practicing transfusion medicine. The text presents a total of 26 realistic transfusion scenarios divided into three sections:

- Antibodies
- Blood Components
- Complications

The short-case format makes the information easily accessible and can serve as the basis for a transfusion medicine curriculum in clinical pathology.



Add Transfusion Medicine in the Hot Seat (PUB224) to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB224
Softcover; 123 pages

Additional Information

- Because these materials are human donor-based, the ship date is subject to change. If this should occur, notification will be provided prior to the scheduled date. In some instances, the program may ship in two installments.
- Due to material stability, no replacements will be available.
- See International Shipping information section in the Ordering Information Supplement regarding additional dangerous goods shipping fees.

Program Information

- CBT - Two 2.5-mL cord blood specimens; designed for assays required for the production of umbilical cord blood stem cell programs
- SCP - Two 3.0-mL peripheral blood specimens; designed for laboratories that process and assess the suitability of stem cells
- Two shipments per year

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Bacterial Detection in Platelets BDP, BDP5

Procedure	Program Code		Challenges per Shipment
	BDP	BDP5	
Bacterial culture and detection systems	▮		2
Bacterial culture and detection systems		▮	5

Additional Information

- The Centers for Medicare & Medicaid Services (CMS) requires proficiency testing for bacterial detection/identification. Please select the appropriate program for your laboratory based on the information below.
- Survey BDP is designed for donor centers/laboratories that are associated with a CMS-certified microbiology laboratory with the same CLIA number and are participating in an approved proficiency testing program for bacterial detection.
- Survey BDP5 is designed for donor centers/laboratories that are performing bacterial detection for the purposes of platelet unit screening and are not associated with a CMS-certified microbiology laboratory with the same CLIA number.
- See International Shipping information section in the Ordering Information Supplement regarding additional dangerous goods shipping fees.

Program Information

- BDP - Two lyophilized pellet specimens with diluents; two shipments per year
- BDP5 - Five lyophilized pellet specimens with diluents; three shipments per year

Bacterial Detection in Platelets, Rapid BDPV, BDPV5

Procedure	Challenges per Shipment	
	Program Code	
	BDPV	BDPV5
CMS certified rapid immunoassay	2	5

Additional Information

- The Centers for Medicare & Medicaid Services (CMS) requires proficiency testing for bacterial detection in platelets.
- Survey BDPV is designed for donor centers/laboratories that are associated with a CMS-certified microbiology laboratory with the same CLIA number and are participating in an approved proficiency testing program for bacterial detection.
- Survey BDPV5 is designed for donor centers/laboratories that are performing bacterial detection for the purposes of platelet unit screening and are not associated with a CMS-certified microbiology laboratory with the same CLIA number.
- See International Shipping information section in the Ordering Information Supplement regarding additional dangerous goods shipping fees.

Program Information

- BDPV - Two frozen specimens; two shipments per year
- BDPV5 - Five frozen specimens; three shipments per year
- For use with methods such as Verax Biomedical

Refer to the Ordering Information provided for information regarding additional dangerous goods and related fees.

Expanded Transfusion Medicine Exercises ETME1

Procedure	Program Code	Challenges per Shipment
	ETME1	
Expanded challenges	▮	2

Additional Information

Survey ETME1 is an educational opportunity that offers:

- More challenging and/or complex antibody identification
- Comprehensive case studies in transfusion medicine
- Simulated collaboration with other professionals, including those within or outside your institution
- A method for determining the laboratory's ability to recognize and integrate problem solving skills in transfusion medicine

The wet challenge may consist of specimens for ABO grouping, Rh typing, antibody detection, antibody identification, compatibility testing, antigen typing, direct antiglobulin testing, antibody titer, and/or antibody elution.

Program Information

- One paper challenge and one wet challenge consisting of a serum specimen(s) and/or red blood cell suspensions
- Two shipments per year

Viral Markers

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Help pathologists stay current with rapidly changing issues in clinical pathology.

The **Clinical Pathology Improvement Program (CPIP)** provides peer-reviewed, interactive, case-based learning activities that cover a diverse portfolio of real-life clinical scenarios. Every month, you receive a new online module with images and clinical details that unfold as you solve the case in real time. Earn CME/SAM credits upon successful completion of the posttest.

Add CPIP/CPIP1 to your Surveys order.

Parentage Testing

Parentage/Relationship Test—Filter Paper PARF

Analyte/Procedure	Program Code	Challenges per Shipment
	PARF	
Calculation challenge (paper challenge)	▮	1
DNA testing (PCR)	▮	4

Program Information

- Three blood-stained filter paper paternity trio specimens; two buccal swabs for a second alleged-father challenge
- Reporting for short tandem repeats (STRs), XSTRs, Y-STRs, as well as the conclusions provided
- Three shipments per year

Insight at a glance.

In just seconds, the CAP's Performance Analytics Dashboard provides valuable insights into your laboratory's performance, letting you proactively focus energy on areas that need immediate attention while filtering out distractions. Updated daily, this complimentary proficiency testing and CAP accreditation performance monitoring tool reduces the stress of managing today's laboratory by giving you fast access to a single laboratory's or an expansive network's performance.

To view a demo, search Performance Analytics Dashboard at cap.org.

18 Histocompatibility

Use the CAP's Participant Summary Reports to take your laboratory to the next level.

- Compare your results and methods against large peer groups for greater diagnostic confidence.
- Review the extensive discussion to further educate staff on testing trends and best practices.
- Earn continuing education credit with content that aligns with the proficiency testing challenge.

Crossmatching	▮	▮		6
Antibody screen	▮	▮	▮	3
Antibody identification	▮	▮	▮	3

Additional Information

Blood donor screening is now a reporting option for antibody screening results. This change covers the use of HLA testing in blood centers/hospital laboratories for the purpose of donor qualification.

Program Information

- MX1B - Three 0.25-mL plasma specimens; two (approximately 1.0 x 10^6 cells) purified peripheral blood lymphocyte specimens
- MX1C - Three 0.50-mL plasma specimens; two (approximately 4.0 x 10^6 cells) purified peripheral blood lymphocyte specimens
- MX1E - Three 0.25-mL plasma specimens; must be ordered in conjunction with Survey MX1B or MX1C
- Three shipments per year

HLA Crossmatching, Antibody Screen, and Antibody Identification (Class II) MX2B, MX2C, MX2E

Procedure	Program Code			Challenges per Shipment
	MX2B	MX2C	MX2E	
Crossmatching	▮	▮		6
Antibody screen	▮	▮	▮	3
Antibody identification	▮	▮	▮	3

Additional Information

Blood donor screening is now a reporting option for antibody screening results. This change covers the use of HLA testing in blood centers/hospital laboratories for the purpose of donor qualification.

Program Information

- MX2B - Three 0.25-mL plasma specimens; two (approximately 7.2 x 10^6 cells) purified peripheral blood lymphocyte specimens
- MX2C - Three 0.50-mL plasma specimens; two (approximately 9.6 x 10^6 cells) purified peripheral blood lymphocyte specimens
- MX2E - Three 0.25-mL plasma specimens; must be ordered in conjunction with Survey MX2B or MX2C
- Three shipments per year

For laboratories conducting BOTH Class I and Class II HLA testing, see next page.

HLA Crossmatching, Antibody Screen, and Antibody Identification (Class I/II) Combinations MXB, MXC

Procedure	Corresponding Survey	Program Code	
		MXB	MXC
Crossmatching, antibody screen, and antibody identification (Class I)	MX1B*	▮	
Crossmatching, antibody screen, and antibody identification (Class II)	MX2B*	▮	
Crossmatching, antibody screen, and antibody identification (Class I)	MX1C*		▮
Crossmatching, antibody screen, and antibody identification (Class II)	MX2C*		▮

*See page 236 for specimen and analyte information.

Program Information

- MXB - Class I: three 0.25-mL plasma specimens, two purified peripheral blood lymphocyte specimens; Class II: three 0.25-mL plasma specimens, two purified peripheral blood lymphocyte specimens
- MXC - Class I: three 0.50-mL plasma specimens, two purified peripheral blood lymphocyte specimens; Class II: three 0.50-mL plasma specimens, two purified peripheral blood lymphocyte specimens
- Three shipments per year

Class I & II HLA Molecular Typing DML

Procedure	Program Code	Challenges per Shipment
	DML	
Molecular HLA-A, -B, and -C typing (Class I)	▮	5
Molecular HLA-DR, -DQ, and -DP typing (Class II)	▮	5

Program Information

- Ten approximately 1.0-mL whole blood specimens in CPD-A
- Serologic equivalents and MICA reporting available
- Three shipments per year

HLA-B27 Typing B27

Procedure	Program Code	Challenges per Shipment
	B27	
HLA-B27 typing	▮	5

Program Information

- Five 2.0-mL whole blood specimens in CPD-A
- Two shipments per year

Antibody Titer ABT, ABT1, ABT2, ABT3

Procedure	Program Code				Challenges per Shipment
	ABT	ABT1	ABT2	ABT3	
Anti-A titer	▮	▮			1
Anti-B titer				▮	1
Anti-D titer	▮		▮		1

Program Information

- ABT - One 2.0-mL plasma specimen for anti-A titer with one corresponding titer cell (3%–4% red blood cell suspension); one 2.0-mL plasma specimen for anti-D titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT1- One 2.0-mL plasma specimen for anti-A titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT2 - One 2.0-mL plasma specimen for anti-D titer with one corresponding titer cell (3%–4% red blood cell suspension)
- ABT3 - One 2.0-mL plasma specimen for anti-B titer with one corresponding titer cell (3%–4% red blood cell suspension)
- Two shipments per year

Antibody Titer—Automated AABT, AABT1, AABT2, AABT3

NEW

Procedure	Program Code				Challenges per Shipment
	AABT	AABT1	AABT2	AABT3	
Anti-A titer	▮	▮			1
Anti-B titer				▮	1
Anti-D titer	▮		▮		1

Program Information

- AABT - One 2.0-mL plasma specimen for anti-A titer; one 2.0-mL plasma specimen for anti-D titer
- AABT1 - One 2.0-mL plasma specimen for anti-A titer
- AABT2 - One 2.0-mL plasma specimen for anti-D titer
- AABT3 - One 2.0-mL plasma specimen for anti-B titer
- Two shipments per year

Monitoring Engraftment ME		
Procedure	**Program Code**	**Challenges per Shipment**
	ME	
Stem cell monitoring engraftment	▮	3

Program Information

- Five 1.0-mL whole blood specimens
- Designed for laboratories supporting stem cell transplant and laboratories monitoring chimerism after organ transplantation
- Three shipments per year

Atlas of Transplant Pathology (PUB124)

This atlas serves as a handy resource for practical interpretation of solid organ transplant biopsies and other specimens by general pathologists as well as subspecialists.

Includes over 600+ photomicrographs and tables.

Add it to your order.

DQB1*02:02		▮	3

Program Information

- Three 0.1-mL specimens, each containing 200 µg/mL of human DNA in media
- Two shipments per year

Additional Information

These Surveys will challenge the laboratory to accurately identify the presence or absence of alleles associated with a variety of disease states (listed below) and/or the adverse reactions to specific drugs.

DADR1

- o Carbamezepine induced Stevens-Johnson syndrome (CSJ)
- o Allopurinol Stevens-Johnson syndrome (ASJ)
- o Hypersensitivity to abacavir (HA)
- o Dapsone hypersensitivity (DH)

DADR2

- o Celiac disease (CD)
- o Narcolepsy (N)
- o Pemphigus vulgaris (PV)
- o Psoriasis (P)
- o Antiglomerular basement membrane disease (ABM)
- o Birdshot retinochoroidopathy (BR)
- o Idiopathic myopathy (IM)

19 Genetics and Molecular Pathology

The CAP broadens its network of laboratory experts through its collaborations.

Among the organizations with which we partner:

- American Association for Clinical Chemistry (AACC)
- American College of Medical Genetics and Genomics (ACMG)
- Association for Molecular Pathology (AMP)
- National Society for Histotechnology (NSH)

Genetics and Molecular Pathology

Cytogenetics 242
Biochemical and Molecular Genetics 245
Next-Generation Sequencing 254
Molecular Oncology—Solid Tumors 258
Molecular Oncology—Hematologic 262

Program Changes

Next-Generation Sequencing—Germline (NGS) New dry challenge 254

Cytogenetics

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

CAP/ACMG Cytogenetics CY, CYBK

Analyte/Procedure	Program Code		Challenges per Shipment
	CY	CYBK	
Chromosome abnormality	▮	▮	6
Karyotype nomenclature	▮	▮	6
Educational challenge, ungraded	▮	▮	1 per year

Additional Information

Each challenge includes a case history and images of metaphase cells that are representative of each case. Each mailing will include three constitutional and three neoplastic challenges.

Program Information

- CY - Online images of metaphase cells; delivered two times a year; your CAP shipping contact will be notified via email when the activity is available
- CYBK - Prints of metaphase cells; two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CE credit

CAP/ACMG Fluorescence In Situ Hybridization CYF, CYI

Disease/Procedure	Program Code		Challenges per Shipment	
	CYF	CYI	A	B
Constitutional and Hematologic Disorders				
FISH for constitutional disorder - slides	▮		1	1
FISH for constitutional disorder - paper/photograph challenge	▮		2	2
FISH for hematologic disorder - slides	▮		1	1
FISH for hematologic disorder - paper/photograph challenge	▮		2	2
Urothelial Carcinoma				
FISH for urothelial carcinoma		▮	2	2

Additional Information

- CYF 2020-A:
  Constitutional disorder - Prenatal aneuploidy probes (interphase cells) (two slides)
  Constitutional disorder - (two paper/photograph challenges)
  Hematologic disorder - *MLL* gene rearrangement (two slides)
  Hematologic disorder - (two paper/photograph challenges)
- CYF 2020-B:
  Constitutional disorder - *SHOX* (two slides)
  Constitutional disorder - (two paper/photograph challenges)
  Hematologic disorder - *BCR/ABL1* gene rearrangement (two slides)
  Hematologic disorder - (two paper/photograph challenges)
- CYF is prepared from cell suspension samples. For FISH in paraffin-embedded tissues, see page 243.
- These programs are only for laboratories that perform both hybridization and interpretation under the same CLIA number.

Program Information

- CYF - Four slides and four paper/photograph challenges
- CYI - Two 250-µL cell samples suspended in ethanol from two different specimens; participants use FISH to detect chromosome abnormalities
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG Fluorescence In Situ Hybridization for Paraffin-Embedded Tissue CYH, CYJ, CYK, CYL

Analyte/Procedure	Program Code				Challenges per Shipment	
	CYH	CYJ	CYK	CYL	A	B
Breast Cancer						
HER2 gene amplification	▮				10	10
Brain/Glioma Tissue						
1p/19q		▮			1	1
Solid Tumor						
SS18 gene rearrangement			▮		1	
EWSR1 gene rearrangement			▮			1
Lymphoma Tissue						
MALT1 gene rearrangement				▮	1	
MYC gene rearrangement				▮		1

Additional Information

- These programs are only for laboratories that perform both hybridization and interpretation under the same CLIA number.
- For HER2 FISH, interpretation only, for breast cancer, see page 282.

Program Information

- CYH - Two unstained, five-core tissue microarray slides equivalent to 10 paraffin-embedded breast tissue specimens; two H&E stained tissue microarray slides will also be provided
- CYJ - Four unstained slides; one H&E stained slide
- CYK, CYL - Two unstained slides; one H&E stained slide
- All CYJ, CYK, CYL specimens will be 4.0-micron tissue sections mounted on positively charged glass slides
- Two shipments per year

ACMG American College of Medical Genetics and Genomics

Bone Marrow Benchtop Reference Guide (BMBRG)

Bone Marrow Benchtop Reference Guide is an illustrated guide to common and rare cells. With more than 60 different identifications and a detailed description for each cell morphology, it's an affordable, convenient way to identify various cell types quickly and confidently. Its rugged construction is well suited for heavy use at the workbench.

Add it to your order.

Or, view sample pages and purchase online:

CAP/ACMG Constitutional Microarray CYCGH

Procedure	Program Code	Challenges per Shipment
	CYCGH	
Cytogenomic microarray analysis for constitutional abnormality	▮	2
Educational dry challenge for constitutional abnormality	▮	1

Program Information

- Two 3.0-µg DNA specimens; one dry challenge
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

Additional Information

Participants will identify and characterize gains or losses and the cytogenetic location of abnormalities detected.

This Survey is not appropriate for low resolution arrays that are designed to detect only aneuploidy.

CAP/ACMG Oncology Microarray CYCMA

Procedure	Program Code	Challenges per Shipment
	CYCMA	
Cytogenomic microarray analysis for oncologic abnormality	▮	1
Educational dry challenge for oncologic abnormality	▮	1

Program Information

- One 2.0-ug DNA specimen; one dry challenge
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

Additional Information

Participants will identify and characterize gains or losses and the cytogenetic location of abnormalities detected.

Biochemical and Molecular Genetics

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

CAP/ACMG Biochemical Genetics BGL, BGL1

Analyte/Procedure	Program Code		Challenges per Shipment
	BGL	BGL1	
Acylcarnitines, qualitative and quantitative	▮		1
Amino acids, qualitative and quantitative	▮		1
Carnitine, qualitative and quantitative		▮	3
Glycosaminoglycans (mucopolysaccharides), qualitative and quantitative	▮		1
Organic acids, qualitative and quantitative	▮		1
Educational challenge	▮		1

Program Information

- BGL -
  Acylcarnitines: One 0.1-mL plasma specimen
  Amino acids: One 1.0-mL plasma or 2.0-mL urine specimen
  Glycosaminoglycans (mucopolysaccharides): One 2.0-mL urine specimen
  Organic acids: One 7.5-mL urine specimen
  Educational challenge: Will consist of any one of the BGL analytes
- BGL1 - Three 0.3-mL serum specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG Alpha-1 Antitrypsin Genotyping AAT

Analyte/Procedure	Program Code	Challenges per Shipment
	AAT	
Alpha-1 antitrypsin (*SERPINA1*) genotyping	▮	3

This Survey will test for the M, S, and Z alleles.

Program Information

- Three 10.0-µg extracted DNA specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG Apolipoprotein E Genotyping APOE

Analyte/Procedure	Program Code	Challenges per Shipment
	APOE	
Apolipoprotein E (*APOE*) genotyping	▮	3

This Survey is designed for laboratories utilizing *APOE* testing for hyperlipoproteinemia type III and Alzheimer diseases and will test for *APOE* e2, *APOE* e3, and *APOE* e4.

Program Information

- Three 10.0-µg extracted DNA specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG *BRCA1/2* Sequencing BRCA

Analyte/Procedure	Program Code	Challenges per Shipment
	BRCA	
BRCA1/2 DNA sequencing and variant interpretation	▮	3
BRCA1/2 duplication/deletion analysis	▮	3

Additional Information

- Test your skill at reporting and interpreting DNA sequence variants for *BRCA1/2* using standard nomenclature.
- Receive a summary and discussion of responses, including comments on the variant nomenclature and known or expected outcomes from identified variants.
- Primers are not included; laboratories are expected to utilize the primers used in routine clinical testing.

Program Information

- Three 10.0-µg extracted DNA specimens
- Results for this program must be submitted online through e-LAB Solutions Suite
- Two shipments per year

ACMG American College of Medical Genetics and Genomics

CAP/ACMG Cardiomyopathy Sequencing Panel CMSP

Analyte/Procedure	Program Code	Challenges per Shipment
	CMSP	
Cardiomyopathy sequencing panel	▮	3

Additional Information

- This proficiency challenge is for laboratories performing gene panels, exome sequencing, and whole genome sequencing to detect germline variants associated with inherited forms of cardiomyopathy.
- Participants will be asked to identify variants in the following genes: *MYBPC3*, *MYH7*, *TNNI3*, *TNNT2*, and *TPM1*.

Program Information

- Three 80.0-µL purified extracted DNA specimens (50 ng/µL)
- Results for this program must be submitted online through e-LAB Solutions Suite
- Two shipments per year

ACMG American College of Medical Genetics and Genomics

CAP/ACMG Hemoglobinopathies Genotyping HGM

Analyte/Procedure	Program Code	Challenges per Shipment
	HGM	
Alpha-thalassemia	▮	3
Beta-thalassemia	▮	3
Hemoglobin S/C	▮	3

Program Information

- Three 50.0-µg extracted DNA specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG Inherited Cancer Sequencing Panel ICSP

Analyte/Procedure	Program Code	Challenges per Shipment
	ICSP	
Inherited cancer sequencing panel	▮	3

Additional Information

- This proficiency challenge is for laboratories performing gene panels, exome sequencing, and whole genome sequencing to detect germline variants associated with inherited forms of cancer.
- Participants will be asked to identify variants in the following genes: *BRCA1*, *BRCA2*, *CDKN2A*, *MLH1*, *MSH2*, *MSH6*, and *PMS2*.

Program Information

- Three 80.0-µL purified extracted DNA specimens (50 ng/µL)
- Results for this program must be submitted online through e-LAB Solutions Suite
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

Atlas of Fundamental Infectious Diseases Histopathology (PUB127)

This resource book is rich in detailed information and real-world examples to help anatomic pathologists identify infectious organisms in tissue, study patterns of inflammation for clues, understand which stains are best for detecting specific micro-organisms, spot infectious disease mimics, and select ancillary methods of detection.

Add it to your order.

Or, view sample pages and purchase online:

Continued on the next page

Program Information

- MGL1, MGL2, MGL3, MGL4 - Three 50.0-µg extracted DNA specimens per disease/gene
- MGL5 - Two 50.0-µg extracted DNA specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

Additional Information

- The *BRCA1/2* program (module MGL3) is designed for laboratories testing for the three Ashkenazi Jewish founder mutations.
- The cystic fibrosis programs (modules MGL2 and MGL5) are designed for laboratories that are testing for the minimum mutation panel for population-based carrier screening (ie, the ACMG-23 mutation panel) from the ACMG Technical Standards and Guidelines for *CFTR* Mutation Testing, expanded panels, PolyT variant analysis, and/or full gene sequencing.
- Module MGL4 is designed for laboratories testing for diseases/disorders related to Ashkenazi Jewish ancestry.
- The Prader-Willi/Angelman syndrome program is designed for laboratories using methylation techniques for analysis.

CAP/ACMG Molecular Genetics Series MGL1, MGL2, MGL3, MGL4, MGL5 continued

CAP/ACMG Inherited Metabolic Diseases IMD1, IMD2, IMD3

Analyte/Procedure	Program Code			Challenges per Shipment
	IMD1	IMD2	IMD3	
Mitochondrial DNA deletion syndromes	▮			3
MCAD		▮		3
Mitochondrial cytopathies*			▮	3

*Includes disorders/diseases such as Leber hereditary optic neuropathy and myoclonus epilepsy with ragged red fibers (MERRF).

Program Information

- IMD1 - Three 50.0-µL DNA specimens (50.0 ng/µL DNA PCR product that encompasses the entire mitochondrial genome)
- IMD2, IMD3 - Three 50.0-µg extracted DNA specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics Translating Genes Into Health®

CAP/ACMG Molecular Genetics Sequencing SEC, SEC1

Procedure	Program Code		Challenges per Shipment
	SEC	SEC1	
DNA sequencing interpretation challenge	▮		3
DNA sequencing		▮	3

Additional Information

- Test your skill at interpreting and reporting DNA sequence variants for inherited diseases using standard nomenclature.
- Receive a summary and discussion of responses, including comments on nomenclature, known or expected outcomes from identified variants, and teaching points about genes/disorders represented.

Program Information

- SEC - DNA sequence electropherogram files with a range of variants, suitable for base-calling and analysis using a range of commercial or public domain software programs; also includes nomenclature/variant references. Two online acitivities per year; your CAP shipping contact will be notified via email when the activity is available
- SEC1 - Three 30.0-µg extracted DNA specimens; forward and reverse lyophilized primers are provided. Two shipments per year
- Results for both programs must be submitted online through e-LAB Solutions Suite

Give the CAP's complimentary Sample Exchange Registry service a try!

Sign up for this unique and complimentary service for those rare analytes for which proficiency testing is not yet available. This service now includes all clinical laboratory disciplines.

- The CAP connects labs performing testing for which no formal proficiency testing is available.
- There is no charge for this service.
- Participate at any time, no contract required.
- A minimum of three labs performing the same analyte test must participate before the CAP can facilitate the sample exchange.
- Each individual laboratory will receive its own results along with an anonymized summary report for all participants.

Register today! Visit cap.org and from the Laboratory Improvement tab, choose Proficiency Testing > Sample Exchange Registry.

Pharmacogenetics PGX, PGX1, PGX2, PGX3

Analyte/Procedure	Program Code				Challenges per Shipment

*HLA-B*57:01*			▮		3
DPYD				▮	3
TPMT				▮	3
UGT1A1				▮	3

Program Information

- Three 25.0-µg extracted DNA specimens
- Includes allele detection (genotyping) and/or interpretive challenges
- Two shipments per year

Additional Information

- *UGT1A1* (PGX3 Survey) tests the laboratory's ability to detect variants in the TATA repeat sequence in the *UGT1A1* promotor (eg, *UGT1A1*28* with seven TA repeats). The ability to detect variants in other regions of the *UGT1A1* gene is not part of this program.
- Survey PGX2 is designed for laboratories that provide *HLA-B*57:01* testing to identify risk of hypersensitivity to abacavir and *HLA-B*15:02* testing to identify risk of hypersensitivity to carbamazepine. The intended response is qualitative (presence/absence of the allele). This Survey is not appropriate for laboratories that perform molecular HLA typing. For HLA typing proficiency testing, please consult the HLA Molecular Typing (DML) Survey.

CAP/ACMG Rett Syndrome (*MECP2*) RETT

Analyte/Procedure	Program Code	Challenges per Shipment
	RETT	
Rett (*MECP2*) genotyping	▮	3
Rett (*MECP2*) duplication/deletion analysis	▮	3

Analyte/Procedure	Program Code	Challenges per Shipment
	TPM	
Factor II (*F2* gene, Prothrombin)	▮	3
Factor V Leiden (*F5* gene)	▮	3

Additional Information

This Survey is designed for the Cepheid GeneXpert factor II and factor V assays. DNA extraction for other assays/methods is NOT recommended.

Program Information

- Three 250.0-µL synthetic whole blood specimens
- Two shipments per year

ACMG American College of Medical Genetics and Genomics

Red Blood Cell Antigen Genotyping RAG

Procedure	Program Code	Challenges per Shipment
	RAG	
Red blood cell antigen genotype with predictive phenotype	▮	3

Program Information

- Three 2.0-mL whole blood specimens
- Two shipments per year

Variant Interpretation Only Program VIP/VIP1

Analyte/Procedure	Program Code	Challenges per Shipment
	VIP/VIP1	
Variant interpretation online case review	▮	3

Additional Information

VIP is an educational activity for pathologists, PhDs, genetic counselors, technologists, and any other laboratory staff with an interest in germline variant interpretation to assess and improve their diagnostic skills. All cases will comply with the 2015 ACMG standards and guidelines for the interpretation of sequence variants and will include:

- A clinical history with relevant laboratory data
- Results of ancillary studies, where appropriate
- Case discussion and discussion of interpretive criteria
- A variety of germline variants, diseases, and disorders

Program Information

- VIP - Three germline diagnostic challenges; reporting with CME/CE credit is available for one pathologist, MD, PhD, technologist, or genetic counselor
- VIP1 - Reporting option with CME/CE credit for each additional pathologist, MD, PhD, technologist, or genetic counselor (within the same institution); must order in conjunction with Survey VIP
- Earn a maximum of 3 CME credits *(AMA PRA Category 1 Credits™)* per pathologist/MD/PhD and a maximum of 3 CE credits per technologist/genetic counselor for completion of an entire year
- One online educational activity per year; your CAP shipping contact will be notified via email when the activity is available

CME CE credit

Noninvasive Prenatal Testing NIPT

Analyte	Program Code	Challenges per Shipment
	NIPT	
Cell-free DNA screening for fetal aneuploidy	▮	3

Noninvasive prenatal testing is an exercise and is not considered proficiency testing. This exercise may be used to meet the requirements for alternative assessment

Program Information

- Three maternal plasma samples
- Two shipments per year

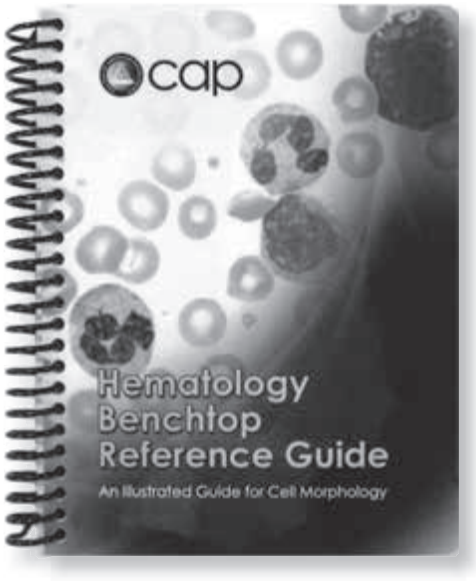
Hematology Benchtop Reference Guide (HBRG)

- More than 50 different cell identifications, including common and rare cells
- Detailed descriptions for each cell morphology
- Six tabbed sections for easy reference
  - Erythrocytes
  - Erythrocyte Inclusions
  - Granulocytic (Myeloid) and Monocytic Cells
  - Lymphocytic Cells
  - Platelets and Megakaryocytic Cells
  - Microorganisms and Artifacts
- A durable and water-resistant format to withstand years of benchtop use—5” x 6½”

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org



Item number: HBRG
Spiral bound; 60 pages;
50+ images; 2012

Next-Generation Sequencing

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

All laboratories subject to US Clinical Laboratory Improvement Amendments (CLIA) Regulations: Proficiency testing (PT) challenges must NOT be referred to another laboratory for any portion of NGS testing, even if this is how patient testing is routinely performed. For PT challenges, any referral is strictly prohibited by CMS.

Next-Generation Sequencing—Germline NGS

Procedure	Program Code	Challenges per Shipment
	NGS	
Next-generation sequencing	▮	2

Additional Information

Laboratories will have the ability to analyze up to 200 preselected chromosomal positions within various genes; for a full list of genes in this program, please go to cap.org. Under the Laboratory Improvement tab, click on Catalog and Ordering Information. The list is located under the PT Order Supplements header.

Program Information

- One 10.0-µg extracted gDNA specimen; one educational variant interpretation paper challenge
- Methods-based challenge for germline variants for laboratories using gene panels, exome, and whole genome sequencing
- Results for this program must be submitted online through e-LAB Solutions Suite
- Two shipments per year

Next-Generation Sequencing—Solid Tumor NGSST

Procedure	Program Code	Challenges per Shipment
	NGSST	
Next-generation sequencing	▮	3

Additional Information

- This is a methods-based proficiency challenge for laboratories performing targeted next-generation sequencing of cancer genes or mutation hotspots in solid tumors. Laboratories will be asked to identify somatic single nucleotide variants and small insertions or deletions in some of these genes: *AKT1, ALK, APC, ATM, BRAF, CDH1, CTNNB1, EGFR, ERBB2, FBXW7, FGFR2, GNAQ, GNAS, HRAS, IDH1, KIT, KRAS, MET, NRAS, PDGFRA, PIK3CA, PTEN, SMAD4, SMARCB1, SMO, SRC, STK11, TP53.*
- This Survey includes variants present with a variant allele fraction (VAF) potentially as low as 5%.

Program Information

- Three 1.0-µg gDNA (50 ng/µL) specimens
- Two shipments per year

Next-Generation Sequencing—Hematologic Malignancies NGSHM

Procedure	Program Code	Challenges per Shipment
	NGSHM	
Next-generation sequencing	▮	3

Additional Information

- This is a methods-based proficiency challenge for laboratories performing targeted next-generation sequencing of genes or mutation hotspots in hematologic malignancies. Laboratories will be asked to identify somatic single nucleotide variants and small insertions or deletions in some of these genes: *ASXL1, ATM, BRAF, CALR, CEBPA, CREBBP, CSF3R, DNMT3A, EZH2, FLT3, IDH1, IDH2, JAK2, KIT, KMT2D, MPL, MYD88, NOTCH1, NPM1, SF3B1, SRSF2, TET2, TP53, U2AF1*.
- This Survey includes variants present with a variant allele fraction (VAF) potentially as low as 5%.

Program Information

- Three 1.0-µg gDNA (50 ng/µL) specimens
- Two shipments per year

Next-Generation Sequencing Bioinformatics NGSB1, NGSB2

Procedure	Program Code		Challenges per Shipment
	NGSB1	NGSB2	
Illumina TruSeq Amplicon Cancer Panel	▮		1
Ion Torrent AmpliSeq Cancer Hotspot v2		▮	1

Additional Information

- This in silico bioinformatics program is designed to complement and augment somatic variant wet bench NGS proficiency testing programs by testing a greater diversity of variants at a greater range of variant allele fractions.
- The BAM and/or FASTQ files are platform-specific and may not be compatible with other instruments/software.
- Laboratories will be asked to identify somatic single nucelotide variants and small insertions/deletions/indels in some of these genes: *ABL1, AKT1, ALK, APC, ATM, BRAF, CDH1, CDKN2A, CSF1R, CTNNB1, EGFR, ERBB2, ERBB4, FBXW7, FGFR1, FGFR2, FGFR3, GNA11, GNAQ, GNAS, HNF1A, HRAS, IDH1, JAK3, KDR, KIT, KRAS, MET, MLH1, MPL, NOTCH1, NPM1, NRAS, PDGFRA, PIK3CA, PTEN, PTPN11, RB1, RET, SMAD4, SMARCB1, SMO, SRC, STK11, TP53, VHL*.
- This Survey includes variants present with a variant allele fraction (VAF) potentially as low as 5%.

Program Information

- Sequencing files containing somatic variants to be downloaded into your laboratory bioinformatics pipeline for analysis and reporting; file sizes range from 100MB to 1GB
- NGSB1 - FASTQ file format for the Illumina TruSeq Amplicon Cancer Panel
- NGSB2 - BAM and FASTQ file formats for the Ion Torrent AmpliSeq Cancer Hotspot v2 Panel
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Next-Generation Sequencing Undiagnosed Disorders—Exome NGSE

Analyte/Procedure	Program Code	Challenges per Shipment
	NGSE	
Exome analysis for germline undiagnosed disorders	▮	1

Additional Information/Minimum Requirements

- This in silico based Survey will assess the ability of the laboratory to identify germline variants responsible for a provided clinic phenotype as is encountered in an undiagnosed disease scenario. In addition to analyzing the in silico mutagenized file to identify a genetic diagnosis for the provided clinical scenario, pathogenic or likely pathogenic ACMG secondary findings may also be reported.
- Laboratories must provide an exome sequencing data file that has been generated using one of the following sources: a specimen from the NGS Survey program (see page 254) or from one of the NIST Reference Material cell lines: RM 8398 (NA12878), RM 8391, RM 8392, or RM 8393. Specimens from the NGSST and NGSHM Surveys cannot be used for this program.
- FASTQs or unaligned BAMs must be submitted along with a BED file describing the regions targeted and interrogated by your laboratory. Additionally, >90% of exons targeted and interrogated by your laboratory must have a minimum read coverage of 10X.
- Laboratories can transfer and download files from most modern browsers/operating systems. For the most up-to-date information on system requirements, go to cap.org and click **System Requirements**, located at the bottom of the home page.
- Due to the extremely large file sizes, a minimum allowable transfer speed of 40 Mbps or higher is needed to ensure successful transfer of your laboratory's sequencing files to the CAP. Contact your IT department for allowable transfer speeds to determine estimated transfer time and browser/operating system access.
- Laboratories must comply with all of the above requirements to participate in this program. Additional information and steps to provide your laboratory's exome file will be included in the kit materials.

Program Information

- One exome sequencing data file, originating from your laboratory and provided to the CAP, for in silico mutagenesis. The mutagenized exome sequencing data file is to be downloaded and analyzed by your bioinformatics pipeline
- The mutagenized exome sequencing file will be accompanied by a clinical history, relevant laboratory data, and results of ancillary studies, where appropriate
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Next-Generation Sequencing Bioinformatics Somatic Validated Materials NGSBV

Analyte/Procedure	Program Code	Challenges per Shipment
	NGSBV	
Somatic in silico mutagenized sequencing file	▮	1

Additional Information/Minimum Requirements

- This in silico program is designed to optimize bioinformatics pipelines, augment validations, and assist with pipeline verification after changes to NGS/bioinformatics processes. This is not traditional proficiency testing and no results will be returned to the CAP; information regarding the variants introduced will be sent along with the mutagenized file.
- Laboratories must provide a gene panel or exome sequencing data file that has been generated using one of the following sources: a specimen from the NGS Survey program (see page 254) or from one of the following NIST Reference Material cell lines: RM 8398 (NA12878), RM 8391, RM 8392, or RM 8393. Specimens from the NGSST and NGSHM Surveys cannot be used for this program.
- FASTQs or unaligned BAMs must be submitted along with a BED file describing the regions targeted and interrogated by your laboratory.
- The mutagenized sequencing file will contain up to 75 somatic variants (depending on the size of the panel/exome provided) at allele fractions from 3% to 99% (higher allele fractions to mimic loss of heterozygosity or homozygosity) and will include:
  - o Single nucleotide variants
  - o Insertions, deletions, delins, and/or duplications ranging from 1-100bp (1-15bp, 15-50bp, 51-100bp)
  - o Copy number variants of single exons, partial or whole genes, and/or partial or whole chromosomes
  - o DNA fusions (if a laboratory indicates that they detect such structural rearrangements, if the rearrangements are specified and submitted in the BED file, and there is appropriate intronic coverage)
  - o Microsatellite instability at mono nucleotide tracts included in the submitted capture design
  - o Simulated artifactual sequence

  All variants will be modeled based on actual somatic mutations from the COSMIC and/or cBIOPORTAL databases.
- Laboratories can transfer and download files from most modern browsers/operating systems. For the most up-to-date information on system requirements, go to cap.org and click **System Requirements**, located at the bottom of the home page.
- Due to the extremely large file sizes, a minimum allowable transfer speed of 40 Mbps or higher is needed to ensure successful transfer of your laboratory's sequencing files to the CAP. Contact your IT department for allowable transfer speeds to determine estimated transfer time and browser/operating system access.
- Laboratories must comply with all of the above requirements to participate in this program. Additional information and steps to provide your laboratory's sequencing file will be included in the kit materials.

Program Information

- One panel or exome sequencing data file, originating from your laboratory and provided to the CAP, for in silico mutagenesis
- The mutagenized panel or exome sequencing data file is to be downloaded and analyzed by your laboratory bioinformatics pipeline and compared with the variant information provided by CAP
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Molecular Oncology—Solid Tumors

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Microsatellite Instability (HNPCC) MSI

Procedure	Program Code	Challenges per Shipment
	MSI	
Microsatellite instability testing (DNA amplification)	▮	3
MLH1 promoter methylation analysis	▮	1

Laboratories performing DNA mismatch repair assessment by immunohistochemistry methods should see Survey MMR on page 278.

Program Information

- Two 10.0-micron unstained paraffin section slides and one H&E slide; two photograph challenges
- For laboratories performing molecular testing using PCR
- Two shipments per year

IGHV Mutation Analysis IGHV

Analyte/Procedure	Program Code	Challenges per Shipment
	IGHV	
IGHV	▮	3

Additional Information

- Sequence analysis of the clonal immunoglobulin heavy chain V gene (*IGHV*) to determine somatic hypermutation (SHM) status.
- Any sequencing method may be used.
- Report V-gene allele, percent similarity and mutation status (SHM).

Program Information

- Three 20-µg DNA specimens (200 ng/µL)
- Two shipments per year

In Situ Hybridization ISH, ISH2

Analyte/Procedure	Program Code		Challenges per Shipment
	ISH	ISH2	
Epstein-Barr virus (EBV)	▮		4
Human papillomavirus (HPV)	▮		4
Kappa/Lambda (IGK/IGL)	▮		4
HER2 (*ERBB2*) gene amplification (brightfield)		▮	10

Laboratories performing FISH for interphase chromosomal targets in paraffin sections refer to the Cytogenetics Surveys, page 243.

Additional Information

Survey ISH2 is only for laboratories that perform both hybridization and interpretation under the same CLIA number.

Program Information

- ISH -

  EBV, HPV: Three 4-core tissue microarray slides and one H&E slide (each)

  Kappa/Lambda: Four 4-core tissue microarray slides and one H&E slide
- ISH2 - Two 5-core tissue microarray slides in duplicate
- Two shipments per year

DNA Extraction & Amplification FFPE MHO5

Procedure	Program Code	Challenges per Shipment
	MHO5	
DNA purification	▮	1

Additional Information

Methods-based proficiency challenge to examine DNA purification from formalin-fixed, paraffin-embedded tissues (FFPET). Laboratories will be able to purify DNA from FFPET sections and amplify control targets using laboratory-provided reagents.

Program Information

- Three 10.0-micron paraffin sections
- Two shipments per year

Neoplastic Cellularity NEO

Procedure	Program Code	Challenges per Shipment
	NEO	
Online assessment of percent neoplastic cellularity	▮	10

Program Information

- Ten Regions of Interests (ROIs) using online, whole slide images
- A method-based preanalytic Survey to assess competency for determining percent neoplastic cellularity
- Powered by DigitalScope® technology
- Individual reporting fields for up to five pathologists are available
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Sarcoma Translocation SARC

Gene	Program Code	Challenges per Shipment
	SARC	
Sarcoma translocation* (RT-PCR)	▮	3

*See translocation listing below.

Laboratories performing FISH for sarcoma translocation refer to the Cytogenetics Surveys, page 243.

Program Information

- Three snap-frozen cell pellets from which approximately 5.0-µg of RNA can be extracted
- Two shipments per year

Sarcoma Translocation Listing

COL1A1/PDGFB, t(17;22)
ETV6/NTRK3, t(12;15)
EWSR1/ATF1, t(12;22)
EWSR1/ERG, t(21;22)
EWSR1/FLI1, t(11;22)
EWSR1/FLI1 or *EWSR1/ERG*
EWSR1/WT1, t(11;22)
FUS/DDIT3, t(12;16)
PAX3/FOXO1, t(2;13)
PAX7/FOXO1, t(1;13)
PAX3/FOXO1 or *PAX7/FOXO1*
SS18/SSX1, t(X;18)
SS18/SSX2, t(X;18)
SS18/SSX1 or *SS18/SSX2*

Cell-free Tumor DNA CFDNA

Analyte/Procedure	Program Code	Challenges per Shipment
	CFDNA	
cfDNA	▮	3

Additional Information

- DNA fragments stabilized in simulated plasma.
- This is not intended for laboratories that perform circulating tumor cell (CTC) analysis.
- Potential targets included in this Survey are *BRAF* V600E, *EGFR* T790M, *IDH1* R132C, *KRAS* G12C, *KRAS* G12D, and *NRAS* Q61R, all within a range of 0.1 to 1.0%.

Program Information

- Three 125-ng DNA (25 ng/mL) specimens
- Two shipments per year

Fusion RNA Sequencing RNA

Analyte/Procedure	Program Code	Challenges per Shipment
	RNA	
RNA	▮	3

Additional Information

- Total RNA from a cell line engineered to contain desired fusion RNA.
- This is for laboratories using RNAseq to detect gene fusion transcripts.
- This is not intended to replace the current Survey (SARC) for reverse transcription (RT)-PCR based detection (see page 259).
- Potential fusion variants include: *CD74-ROS1, EML4-ALK, ETV6-NTRK3, FGFR3-TACC3, PAX8-PPARG, SLC45A3-BRAF*.
- Specific intragenic fusion/exon skipping variants may also be included, specifically *EGFRvIII* and *MET* exon 14 skipping.

Program Information

- Three 500-ng RNA (20 ng/µL) specimens
- Two shipments per year

Solid Tumor—Other BRAF, EGFR, KRAS, KIT

Analyte	Program Code				Challenges per Shipment
	BRAF	EGFR	KRAS	KIT	
BRAF	▮				3
EGFR		▮			3
KRAS			▮		3
KIT				▮	3
PDGFRA				▮	3

Program Information

- BRAF, EGFR, KRAS - Paraffin-embedded sections or shavings
- KIT/PDGFRA -

  One specimen containing four 10.0-micron unstained paraffin section slides and one H&E slide

  Two 1.0-µg gDNA (50 ng/µL) specimens
- For laboratories performing molecular testing using PCR
- Two shipments per year

Multigene Tumor Panel MTP

Analyte	Program Code	Challenges per Shipment
	MTP	
BRAF	▮	3
EGFR	▮	3
HER2 (ERBB2)	▮	3
KIT	▮	3
KRAS	▮	3
NRAS	▮	3
PDGFRA	▮	3
PIK3CA	▮	3

Program Information

- Three 2.0-µg gDNA (50 ng/µL) specimens for laboratories performing molecular testing on multiple targets
- Two shipments per year

Additional Information

BRAF, *EGFR*, and *KRAS* are required analytes. Laboratories that perform testing for the detection of somatic single nucleotide variants, insertions, and deletions in these genes are required to enroll in either MTP or the respective single gene Surveys. This includes laboratories that perform NGS-based assays, non-NGS-based multiplexed assays, and nonmultiplexed assays (eg, Sanger sequencing). Laboratories that perform NGS-based testing are encouraged to also enroll in NGSST (on page 254), as this proficiency testing program provides challenges with lower variant allele fractions as well as challenges in other genes commonly included in NGS-based panels for the identification of somatic variants in solid tumors.

Glioma GLI

Analyte	Program Code	Challenges per Shipment
	GLI	
MGMT	▮	3
IDH1, IDH2	▮	3
10q *(PTEN)* deletion	▮	1

Program Information

- Four 2.0-µg gDNA (50 ng/µL) specimens
- One specimen containing four 10.0-micron unstained paraffin section slides and one H&E slide
- For laboratories performing molecular testing using PCR
- Two shipments per year

Molecular Oncology—Hematologic

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Molecular Hematologic Oncology MHO, MHO1, MHO2, MHO3, MHO5

NPM1		▮		3
PML/RARA		▮		3
RUNX1/RUNX1T1		▮		3
DNA extraction and amplification from formalin-fixed, paraffin-embedded (FFPE) tissue			▮	1

Program Information

- MHO - One sample vial containing purified DNA (200 µg/mL per vial) for each specimen
- MHO1 - MHO specimens in duplicate for additional DNA testing
- MHO2 - Two sample vials; one with purified DNA containing 200 µg/mL and one with purified RNA containing 400 µg/mL
- MHO3 - MHO2 specimen in duplicate for additional DNA and RNA testing
- MHO5 - Three 10.0-micron paraffin sections; extraction and amplification from FFPE tissue will be assessed by a method-based challenge
- Two shipments per year; ships on dry ice (dry ice does not apply to MHO5 or international shipments)

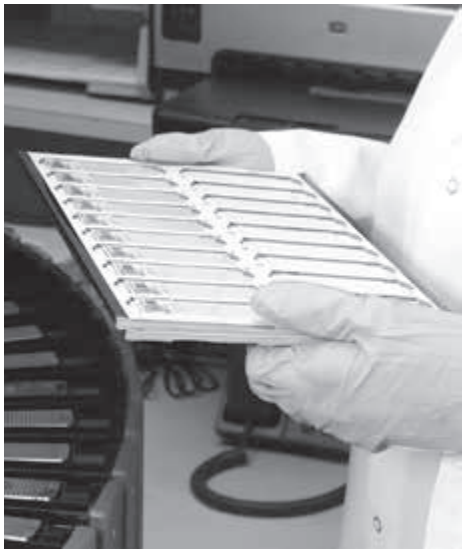
Minimal Residual Disease MRD, MRD1, MRD2

Analyte	Program Code			Challenges per Shipment
	MRD	MRD1	MRD2	
BCR/ABL1 p190		▮		3
BCR/ABL1 p210	▮			3
PML/RARA			▮	3

Program Information

- Three RNA specimens in sterile water
- For laboratories diagnosing and monitoring leukemia tumor burden by measuring the quantity of *BCR/ABL1* or *PML/RARA* fusion transcripts
- Two shipments per year; ships on dry ice

20 Anatomic Pathology



Depend on our commitment to slide quality for PAP PT and PAP Education programs.

- Every slide is reviewed and approved by pathologists and cytotechnologists before it is put in circulation.
- All slide sets are reviewed every six months by a staff cytotechnologist.
- Slides that do not maintain consensus grading are removed from the program and reviewed by a committee of pathologist experts.

Online Performance Improvement Program in Surgical Pathology PIPW/PIPW1

Program	Program Code	Challenges per Shipment
	PIPW/PIPW1	
Surgical pathology case review	▮	10

Additional Information

PIPW educates pathologists in general surgical pathology.

- Pathologists can assess their diagnostic skills and compare their performance with that of their peers.
- Included PIPW case selections feature:
  - A variety of neoplastic and nonneoplastic lesions
  - Inflammatory and infectious diseases
  - Various sites, encompassing a variety of organ systems
- See system requirements on page 13.

Program Information

- PIPW - Ten diagnostic challenges/whole slide H&E images with clinical history; reporting with CME credit is available for one pathologist; for each additional pathologist, order PIPW1
- PIPW1 - Reporting option with CME credit for each additional pathologist (within the same institution); must order in conjunction with Survey PIPW
- Earn a maximum of 40 CME credits *(AMA PRA Category 1 Credits™)* per pathologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope® technology
- Four online activities per year; your CAP shipping contact will be notified via email when the activity is available

Performance Improvement Program in Surgical Pathology PIP/PIP1

Program	Program Code	Challenges per Shipment
	PIP/PIP1	
Surgical pathology case review	▮	10

Additional Information

PIP educates pathologists in general surgical pathology. This program:

- Provides a practical approach to continuing education
- Gives pathologists a method to assess their diagnostic skills and compare their performance with that of their peers
- Features PIP case selections that include:
  - A variety of neoplastic and nonneoplastic lesions
  - Inflammatory and infectious diseases
  - Various sites, encompassing a variety of organ systems

Program Information

- PIP - Ten diagnostic challenges/H&E stained glass slides with clinical history; reporting with CME credit is available for one pathologist; for each additional pathologist, order PIP1
- PIP1 - Reporting option with CME credit for each additional pathologist (within the same institution); must order in conjunction with Survey PIP
- Earn a maximum of 40 CME credits *(AMA PRA Category 1 Credits™)* per pathologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Four shipments per year

CME credit

Medical Kidney Diseases: Morphology-Based Novel Approach to Renal Biopsy (PUB129)

This book is designed to provide brief and concise yet comprehensive information for practicing pathologists, pathology residents, and nephrology fellows. It presents a simple and practical approach to renal biopsy by providing a pertinent differential diagnosis related to various patterns of injuries involving renal parenchyma by light microscopy, reaching a correct diagnosis by assimilating immunofluorescence and electron microscopy findings. The book is divided into sections on glomerular, vascular, tubulointerstitial, and transplant renal pathology.

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB129
Softcover; 92 pages; 245+ photomicrographs, exhibits, and tables; 2019

Virtual Biopsy Program VBP/VBP1

Program	Program Code	Challenges per Shipment
	VBP/VBP1	
Online biopsy case review	▮	5

Additional Information

VBP educates pathologists to assess and improve their diagnostic skills in surgical pathology.

- Cases may include gross, radiographic, or endoscopic images.
- Cases are from selected organ systems and may include a variety of specimen types (eg, core biopsies, endoscopic biopsies, curettings, aspirate smears). Activities with their corresponding topics are:
  - 2020-A Upper Gastrointestinal Tract Biopsy
  - 2020-B Bone Biopsy
  - 2020-C Lymph Node Biopsy
  - 2020-D Surgical Pathology Biopsy (various sites)
- See system requirements on page 13.

Program Information

- VBP - Five diagnostic challenges/whole slide images with clinical history; reporting with CME/SAM credit is available for one pathologist; for each additional pathologist, order VBP1
- VBP1 - Reporting option with CME/SAM credit for each additional pathologist (within the same institution); must order in conjunction with Survey VBP
- Earn a maximum of 25 CME/SAM credits *(AMA PRA Category 1 Credits™)* per pathologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope technology
- Four online activities per year; your CAP shipping contact will be notified via email when the activity is available

Digital Slide Program—Dermatopathology DPATH/DPATH1

Program	Program Code	Challenges per Shipment
	DPATH/DPATH1	
Online dermatopathology case review	▮	6

Additional Information

DPATH educates pathologists, dermatopathologists, and dermatologists to assess and improve their diagnostic skills in dermatopathology.

- Cases include static images.
- See system requirements on page 13.

Program Information

- DPATH - Six diagnostic challenges/whole slide images with clinical history; reporting with CME/SAM credit is available for one pathologist; for each additional pathologist, order DPATH1
- DPATH1 - Reporting option with CME/SAM credit for each additional pathologist (within the same institution); must order in conjunction with Survey DPATH
- Earn a maximum of 15 CME/SAM credits *(AMA PRA Category 1 Credits™)* per pathologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Hematopathology Online Education HPATH/HPATH1

Program	Program Code	Challenges per Shipment
	HPATH/HPATH1	
Hematopathology online case review	▮	5

Additional Information

HPATH educates pathologists, hematolopathologists, and hematologists with an interest in hematopathology to assess and improve their diagnostic skills in hematopathology.

- All cases have been specially selected to highlight important changes in the 2016 revision of the WHO Classification.
- Clinical history and relevant laboratory data.
- At least one online, whole slide image of peripheral blood, bone marrow, spleen, lymph node, or other tissue.
- Results of ancillary studies such as immunohistochemistry, flow cytometry, FISH, karyotyping, and molecular studies, where appropriate.
- Case discussion and discussion of differential diagnoses.
- Five SAM questions per case.
- See system requirements on page 13.

Program Information

- HPATH - Five diagnostic challenges/online, whole slide images with clinical history; reporting with CME/SAM credit is available for one pathologist/ hematologist; for additional pathologist/hematologist, order HPATH1
- HPATH1 - Reporting option with CME/SAM credit for each additional pathologist and hematologist (within the same institution); must order in conjunction with Survey HPATH
- Earn a maximum of 12.5 CME/SAM credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 12.5 CE credits per hematologist for completion of an entire year
- This activity meets the ABP MOC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Clinical Pathology Improvement Programs (CPIP/CPIP1)

CPIP supports pathologists who principally practice clinical pathology as well as those who primarily practice anatomic pathology but cover clinical pathology. A diverse portfolio of real-life case scenarios, including images and clinical background, help pathologists to stay abreast of issues and advances in the lab.

Designed for pathologists, by pathologists. Each case is developed and peer-reviewed ensuring what you learn is practical and easily applied to your work. Thought provoking questions with feedback and a multiple-choice post-test allow you to assess and confirm your diagnostic skills. Participants who earn a passing score on the post-test may apply their earned credits to the ABP's CC requirements.

Clinical Pathology Improvement Program CPIP/CPIP1

Program Name	Program Code	Cases/Year
	CPIP/CPIP1	
Online cases in clinical pathology	▮	12 (One per month. See below.)

Additional Information

Consider the CPIP program if you are a:

- Medical director seeking to continuously improve the clinical pathology knowledge and collective skills of your pathology team.
- Pathologist with clinical and/or laboratory management responsibilities.
- Pathologist seeking CME/SAM or CC credits in clinical pathology.
- Subspecialty clinical pathologist who needs to keep current.

To learn more visit www.cap.org and search CPIP.

Discipline	Case Schedule (subject to change)	Month 2020
Lab Management	How to retire a test	January
Toxicology	Non-cancer pain management	February
Hematology	Molecular approach to myeloid neoplasms	March
Chemistry	Growth hormone testing	April
Transfusion Medicine	Blood bank education for clinical staff	May
Hematology	Neutrophilia	June
Microbiology	Automation in clinical microbiology	July
Transfusion Medicine	Utilization of platelets and plasma	August
Hematology	Flow/lymphocytosis	September
Molecular Pathology	Cell-free and/or circulating tumor cell DNA testing for solid tumors	October
Chemistry	Adrenal function testing	November
Lab Management	Physician wellness	December

Program Information

- CPIP - One online clinical laboratory case per month
- CPIP1 - Reporting option with CME/SAM credit for each additional pathologist (within the same institution); must order in conjunction with CPIP
- Earn a maximum of 15 CME/SAM credits *(AMA PRA Category 1 Credits™)* per year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Twelve cases per year; your CAP shipping contact will be notified via email when the activity is available

Touch Imprint/Crush Preparation TICP/TICP1

Procedure	Program Code	Challenges per Shipment
	TICP/TICP1	
Online slide and image program in rapid assessment case review	▮	4

Additional Information

- The TICP Program is designed to familiarize surgical pathologists, cytopathologists, and cytotechnologists with the cytomorphologic features of pathologic processes and tumors in touch imprints and crush or scrape preparations. These specimens are prepared either for intraoperative consultation (frozen section) or rapid on-site evaluation (ROSE) of tissue biopsies for adequacy and/or interpretation. Participants will learn to make an immediate adequacy assessment, assign the process to a general category, and triage the specimen to appropriate ancillary studies. Participants will review digital whole slides of the TICP preparations (hematoxylin & eosin, modified Wright-Giemsa, and/or Papanicolaou stains), static images of the preparation and ancillary studies, and clinical history/radiographic findings to reach a diagnosis. Each case has a complete description of entities in the differential diagnosis along with a discussion of the correct interpretation.
- Participants will receive immediate feedback on interpretations, ancillary studies, and case-related adequate assessment.
- The cases will be comprised of specimens from gastrointestinal and miscellaneous topics.
- May include rarely captured cases that may not be available on the glass slide.
- See system requirements on page 13.

Program Information

- TICP - Four online assessment challenges with clinical history; TICP provides CME/SAM/CE credit for one pathologist or cytotechnologist; for each additional pathologist or cytotechnologist, order TICP1
- TICP1 - Reporting option with CME/SAM/CE credit for each additional pathologist/cytotechnologist (within the same institution); must order in conjunction with Survey TICP
- Earn a maximum of 10 CME/SAM credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 10 CE credits per cytotechnologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Online, whole slide images powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

CAP/NSH HistoQIP HQIP

Stain/Tissue	Program Code	Challenges per Shipment	
	HQIP	A	B
H&E – Bone marrow needle core biopsy	▮	1	
H&E – Lymph node, excision specimen	▮	1	
IHC – Podoplanin, appendix specimen	▮	1	
IHC – CD5, lymph node nonneoplastic specimen	▮	1	
Special stain – Reticulin, liver biopsy specimen	▮	1	
H&E – Colon resection	▮		1
H&E – Stomach resection	▮		1
IHC – SOX10, skin resection	▮		1
IHC – E-cadherin, ductal carcinoma (breast) resection	▮		1
Special stain – Elastin, lung resection	▮		1

Program Information

- Participant laboratories may submit up to five stained coverslipped glass slides (one from each category) per mailing
- Includes photographs and online learning assessment questions
- Two shipments per year

CE credit

Additional Information

HistoQIP improves the preparation of histologic slides in all anatomic pathology laboratories. In this educational program, participants will receive an evaluation specific to their laboratory, an education critique, and a participant summary that includes peer comparison data, evaluators' comments, and performance benchmarking data. An expert panel of pathologists, histotechnologists, and histotechnicians will evaluate submitted slides for histologic technique using uniform grading criteria.

Learn the secret to good slide technique.

Histologic Preparations: Common Problems and Their Solutions is a how-to guide to good slide preparation. Building on data and images from the CAP/NSH HistoQIP program, the book presents photographic examples of well-prepared slides followed by numerous examples of associated problems and their solutions. The text contains troubleshooting techniques for the most common artifacts and problems incurred in routine histologic preparations, including fixation and processing; microtomy; frozen sections; hematoxylin-eosin, trichrome, reticulin, elastin, basement membrane, mucin, amyloid, immunohistochemical, and Gram stains, along with mycobacteria, *Helicobacter pylori*, spirochetes, and fungi.

Add Histologic Preparations: Common Problems and Their Solutions (PUB123) to your order. Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB123
Softcover; 168 pages; 300+ photomicrographs, figures, and tables; 2009

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

CAP/NSH HistoQIP Central Nervous System IHC HQNEU

NEW

Stain/Tissue	Program Code	Challenges per Shipment	
	HQNEU	A	B
H&E – Glioblastoma	▮	1	
IHC – GFAP positive glioblastoma	▮	1	
IHC – p53 positive glioblastoma	▮	1	
H&E – IDH1 positive mutant glioma	▮	1	
IHC – IDH1 (R132H) positive mutant glioma	▮	1	
H&E – Low grade astrocytoma	▮		1
IHC – S100 positive low grade astrocytoma	▮		1
IHC – Ki-67 positive low grade astrocytoma	▮		1
H&E – ATRX positive wild-type glioma	▮		1
IHC – ATRX positive wild-type glioma	▮		1

Additional Information

This program augments efforts to improve the preparation of H&E and immunohistochemical slides in all anatomic pathology laboratories involved in the handling of central nervous system gliomas.

Program Information

- Participants may submit up to three IHC and two H&E stained coverslipped glass slides (one from each category) per mailing
- Two shipments per year

CAP/NSH HistoQIP In Situ Hybridization (Kappa/Lambda) HQISH

NEW

Stain/Tissue	Program Code	Challenges per Shipment	
	HQISH	A	B
H&E – Nonneoplastic tonsil	▮	1	
DNA/RNA positive control probe (ISH)	▮	1	
DNA/RNA negative control probe (ISH)	▮	1	
Kappa ISH (Kappa probe, ISH)	▮	1	
Lambda ISH (Lambda probe, ISH)	▮	1	
H&E – Bone marrow core biopsy	▮		1
DNA/RNA positive control probe (ISH)	▮		1
DNA/RNA negative control probe (ISH)	▮		1
Kappa ISH (Kappa probe, ISH)	▮		1
Lambda ISH (Lambda probe, ISH)	▮		1

Additional Information

This program augments efforts to improve the preparation of ISH slides in all anatomic pathology laboratories involved in the handling of specimens undergoing analysis for kappa and lambda expression by chromogenic in situ hybridization.

Program Information

- Participants are to submit an H&E, positive and negative reagent control slides and kappa and lambda DNA/RNA ISH stained coverslipped glass slides (one from each category) per mailing
- Two shipments per year

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

CAP/NSH HistoQIP Melanoma IHC HQMEL

NEW

Stain/Tissue	Program Code	Challenges per Shipment	
	HQMEL	A	B
H&E – Melanoma, skin biopsy	▮	1	
IHC – Melan A/MART-1 positive melanoma, skin biopsy	▮	1	
IHC – SOX10 positive melanoma, skin biopsy	▮	1	
H&E – PD-L1 positive melanoma, skin biopsy	▮	1	
IHC – PD-L1 positive melanoma, skin biopsy	▮	1	
H&E – Melanoma, skin resection	▮		1
IHC – S100 positive melanoma, skin resection	▮		1
IHC – HMB-45 positive melanoma, skin resection	▮		1
H&E – BRAF V600E positive mutated melanoma	▮		1
IHC – BRAF V600E positive mutated melanoma	▮		1

Program Information

- Participants may submit up to three IHC and two H&E stained coverslipped glass slides (one from each category) per mailing
- Two shipments per year

Additional Information

This program augments efforts to improve the preparation of H&E and immunohistochemical slides in all anatomic pathology laboratories involved in the handling of skin specimens containing melanoma.

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

HQIP Whole Slide Image Quality Improvement Program HQWSI

Stain/Tissue	Program Code	Challenges per Shipment	
	HQWSI	A	B
H&E – Breast resection	▮	1	
H&E – Lung resection	▮	1	
H&E – Breast needle core biopsy	▮	1	
H&E – Prostate needle core biopsy	▮	1	
H&E – Colon resection	▮		1
H&E – Kidney resection	▮		1
H&E – Colon biopsy	▮		1
H&E – Skin punch biopsy	▮		1

Program Information

- Participant laboratories may submit up to four stained coverslipped glass slides and upload their scanned whole slide images per mailing
- Two shipments per year

CAP/NSH HistoQIP—IHC HQIHC

Stain/Tissue	Program Code	Challenges per Shipment	
	HQIHC	A	B
IHC – Desmin, leiomyoma	▮	1	
IHC – CD20, tonsil resection	▮	1	
IHC – ER, tonsil resection	▮	1	
IHC – BCL6, follicular lymphoma	▮	1	
IHC – GATA3, bladder biopsy	▮	1	
IHC – Calretinin, appendix	▮		1
IHC – Pancytokeratin, liver resection	▮		1
IHC – PR, breast core biopsy	▮		1
IHC – PAX5, tonsil resection	▮		1
IHC – NKX3.1, prostatic adenocarcinoma	▮		1

Program Information

- Participant laboratories may submit up to five IHC stained and coverslipped glass slides (one from each category) per mailing
- Two shipments per year

Additional Information

HistoQIP – IHC improves the preparation of immunohistochemistry slides in all anatomic laboratories involved in the handling of gastrointestinal, dermatologic, and urological tract biopsies. Participants will receive an evaluation specific to their laboratory and a participant summary. An expert panel of pathologists, histotechnologists, and histotechnicians will evaluate submitted slides for histologic technique using uniform grading criteria.

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

CAP/NSH HistoQIP Mismatch Repair IHC HQMMR

Stain/Tissue	Program Code	Challenges per Shipment	
	HQMMR	A	B
H&E – Colon adenocarcinoma	▮	1	
IHC – MLH1 (colon adenocarcinoma)	▮	1	
IHC – MSH2 (colon adenocarcinoma)	▮	1	
IHC – MSH6 (colon adenocarcinoma)	▮	1	
IHC – PMS2 (colon adenocarcinoma)	▮	1	
H&E – Endometrial adenocarcinoma	▮		1
IHC – MLH1 (endometrial adenocarcinoma)	▮		1
IHC – MSH2 (endometrial adenocarcinoma)	▮		1
IHC – MSH6 (endometrial adenocarcinoma)	▮		1
IHC – PMS2 (endometrial adenocarcinoma)	▮		1

Additional Information

This program augments efforts to improve the preparation of H&E and immunohistochemical slides in all anatomic pathology laboratories involved in the handling of colonic and endometrial tumors performing mismatch repair IHC.

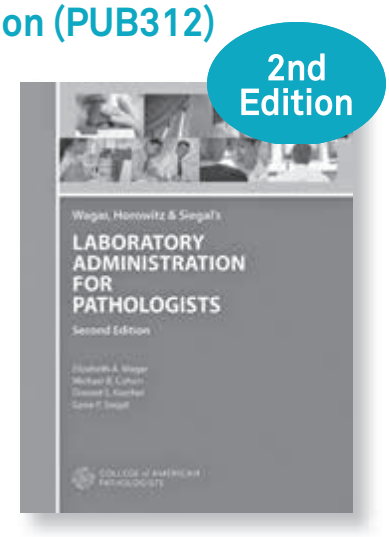
Program Information

- Participants may submit up to four IHC and one H&E stained coverslipped glass slides (one from each category) per mailing
- Two shipments per year

Laboratory Administration for Pathologists, Second Edition (PUB312)

Laboratory Administration for Pathologists is designed to provide pathologists with an overview of the fundamentals of management and leadership, addressing the specific role and responsibility of the pathologist in directing the laboratory.

- Provides information for both clinical and anatomic pathology practice
- Includes an overview of patient safety not available in the first edition
- Covers financial management of the laboratory and the pathology practice
- Geared for trainees and those entering practice while appropriate for all pathologists



Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org
- ebooks at ebooks.cap.org

Item number: PUB312
Hardcover; 296 pages; 2019

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

CAP/NSH HistoQIP Non-small Cell Lung Carcinoma IHC HQNSC

Stain/Tissue	Program Code	Challenges per Shipment	
	HQNSC	A	B
H&E – Lung adenocarcinoma	▮	1	
IHC – TTF-1 (lung adenocarcinoma)	▮	1	
IHC – Napsin-A (lung adenocarcinoma)	▮	1	
H&E – ALK (positive lung adenocarcinoma)	▮	1	
IHC – ALK (positive lung adenocarcinoma)	▮	1	
H&E – Lung squamous cell carcinoma	▮		1
IHC – p40/p63 (lung squamous cell carcinoma)	▮		1
IHC – CK5/6 (lung squamous cell carcinoma)	▮		1
H&E – PD-L1 (positive lung squamous cell carcinoma)	▮		1
IHC – PD-L1 (positive lung squamous cell carcinoma)	▮		1

Additional Information

This program augments efforts to improve the preparation of H&E and immunohistochemical slides in all anatomic pathology laboratories involved in the handling of non-small cell lung carcinoma.

Program Information

- Participants may submit up to three IHC and two H&E stained coverslipped glass slides (one from each category) per mailing
- Two shipments per year

CAP/NSH HistoQIP Biopsy Series HQIPBX

Stain/Tissue	Program Code	Challenges per Shipment	
	HQIPBX	A	B
H&E – Bladder biopsy	▮	1	
H&E – Cervical biopsy	▮	1	
H&E – Skin punch biopsy	▮	1	
H&E – Stomach biopsy	▮	1	
H&E – Colon biopsy	▮		1
H&E – Endometrial biopsy	▮		1
H&E – Prostate needle biopsy	▮		1
H&E – Breast core biopsy	▮		1

Additional Information

The HistoQIP Biopsy Series is an additional program to improve the preparation of histologic slides in all anatomic pathology laboratories. Participants will receive an evaluation specific to their laboratory and a participant summary. An expert panel of pathologists, histotechnologists, and histotechnicians will evaluate submitted slides for histologic technique using uniform grading criteria.

Program Information

- Participants may submit up to four H&E stained and coverslipped glass slides (one from each category) per mailing
- Two shipments per year

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

CAP/NSH HistoQIP Specialty Series HQBX1, HQBX2, HQBX3, HQBX4

Stain/Tissue	Program Code				Challenges per Shipment	
	HQBX1	HQBX2	HQBX3	HQBX4	A	B
Gastrointestinal Biopsy Module						
H&E – Colon biopsy	▮				1	1
H&E – Esophageal biopsy	▮				1	1
H&E – Small intestinal biopsy	▮				1	1
H&E – Stomach biopsy	▮				1	1
Dermatologic Biopsy Module						
H&E – Alopecia		▮			1	1
H&E – Skin excisional biopsy (large excision)		▮			1	1
H&E – Skin punch biopsy		▮			1	1
H&E – Skin shave biopsy		▮			1	1
Urogenital Tract Biopsy Module						
H&E – Bladder biopsy (nonneoplastic)			▮		1	1
H&E – Bladder biopsy (with carcinoma)			▮		1	1
H&E – Prostate needle biopsy (nonneoplastic)			▮		1	1
H&E – Prostate needle biopsy (with carcinoma)			▮		1	1
Gynecological Biopsy						
H&E – Cervical biopsy				▮	1	1
H&E – Endometrial biopsy				▮	1	1
H&E – Cone/Leep biopsy				▮	1	1
H&E – Vagina biopsy				▮	1	1

Program Information

- HQBX1, HQBX2, HQBX3, HQBX4 - Participants may submit up to four H&E stained and coverslipped glass slides (one from each category) per mailing
- Two shipments per year

Additional Information

The HistoQIP Specialty Series includes modules to improve the preparation of histologic slides in all anatomic pathology laboratories involved in the handling of gastrointestinal, dermatologic, gynecologic, and urogenital tract biopsies. Participants will receive an evaluation specific to their laboratory and a participant summary. An expert panel of pathologists, histotechnologists, and histotechnicians will evaluate submitted slides for histologic technique using uniform grading criteria.

HistoQIP IHC programs assess preanalytic steps. For immunohistochemistry programs that focus on analytic and postanalytic (interpretive) steps, see the immunohistochemistry programs on pages 272-276.

General Immunohistochemistry

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Immunohistochemistry MK

Procedure	Program Code	Challenges per Shipment
	MK	
Immunohistochemistry	▮	16

The MK program allows laboratories to compare their assay methodology and results with all participating laboratories.

Program Information

- Seven glass slides with unstained tissue sections from four separate cases; additional slides provided for an H&E stain and negative control
- Two shipments per year

BRAF V600E BRAFV

Procedure	Program Code	Challenges per Shipment
	BRAFV	
BRAF V600E	▮	10

Program Information

- One 10-core tissue microarray slide
- Two shipments per year

Dermatopathology Immunohistochemistry DPIHC

NEW

Procedure	Program Code	Challenges per Shipment
	DPIHC	
Dermatopathology	▮	8

Program Information

- Six glass slides with unstained tissue sections from two separate cases; additional slides provided for an H&E stain, four to be stained and one for negative control
- Two shipments per year

DNA Mismatch Repair MMR

Procedure	Program Code	Challenges per Shipment
	MMR	
DNA mismatch repair by immunohistochemistry	▮	4

If your laboratory performs DNA mismatch repair by molecular methods, see the MSI program on page 258.

Program Information

- Four unstained paraffin section slides and one H&E slide for the immunohistochemical analysis of DNA mismatch repair proteins MLH1, MSH2, MSH6, and PMS2
- Two shipments per year

These general immunohistochemistry Surveys assess analytic and postanalytic (interpretive) steps. For Surveys focusing on preanalytic steps, see the HistoQIP IHC programs on pages 272-276.

PD-L1 PDL1

Procedure	Program Code	Challenges per Shipment
	PDL1	
PD-L1	▮	10

Program Information
- One 10-core tissue microarray slide; additional slides provided for H&E and PD-L1 control
- Two shipments per year

CD117, CD20 Immunohistochemistry Tissue Microarray PM1, PM3

Analyte	Program Code		Challenges per Shipment
	PM1	PM3	
CD117	▮		10
CD20		▮	10

Program Information
- PM1, PM3 — One 10-core tissue microarray slide per predictive marker
- PM1: One shipment per year; PM3: Two shipments per year

For ER/PgR testing, see the PM2 program on page 281.

CD30 Immunohistochemistry Tissue Microarray CD30

Analyte	Program Code	Challenges per Shipment
	CD30	
CD30	▮	10

Program Information
- One 10-core tissue microarray slide
- Two shipments per year

NEW

c-Myc/Bcl-2 Immunohistochemistry Tissue Microarray MYBC

Analyte	Program Code	Challenges per Shipment
	MYBC	
c-Myc	▮	10
Bcl-2	▮	10

Program Information
- Two 10-core tissue microarray slides, one for c-Myc and one for Bcl-2
- Two shipments per year

p16 Immunohistochemistry Tissue Microarray P16

Analyte	Program Code	Challenges per Shipment
	P16	
p16	▮	10

Program Information
- One 10-core tissue microarray slide
- Two shipments per year

These general immunohistochemistry Surveys assess analytic and postanalytic (interpretive) steps.
For Surveys focusing on preanalytic steps, see the HistoQIP IHC programs on pages 272-276.

Immunohistochemistry Tissue Microarray Series PM5

Analyte	Program Code	Challenges per Shipment
	PM5	
pan-TRK	▮	10
Ki-67	▮	10

Additional Information

Each year, the PM5 program will feature two different markers for immunohistochemistry laboratories to evaluate assay performance on a variety of tissue and/or tumor types. The IHC markers for this Survey may change from those listed above due to development constraints.

Program Information

- Two 10-core tissue microarray slides, one for pan-TRK and one for Ki-67
- One shipment per year

Highly Sensitive Anaplastic Lymphoma Kinase IHC PM6

Procedure	Program Code	Challenges per Shipment
	PM6	
Highly sensitive anaplastic lymphoma kinase IHC (ALK)	▮	10

Program Information

- One 10-core tissue microarray slide
- Two shipments per year

Let the CAP connect you to the IHC samples you need.

CAP Immunohistochemistry (IHC) Validation Program

- The CAP will facilitate the exchange of tissue samples once a sufficient number of laboratories performing the same marker are identified.
- Samples will be exchanged twice a year based on availability.
- Each laboratory will receive its own individual results along with an anonymized summary report for all participants.

Sign up for this complimentary service to access those hard-to-obtain specimens.

To get started, visit cap.org and from the Laboratory Improvement tab, choose Proficiency Testing > Sample Exchange Registry to learn more and download a Contact Information Form.

These general immunohistochemistry Surveys assess analytic and postanalytic (interpretive) steps. For Surveys focusing on preanalytic steps, see the HistoQIP IHC programs on pages 272-276.

Predictive Markers

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

HER2 Immunohistochemistry HER2

Analyte	Program Code	Challenges per Shipment
	HER2	
HER2	▮	20

Program Information
- Two 10-core tissue microarray slides
- Two shipments per year

Additional Information

The HER2 program fulfills the proficiency testing requirement stated in the ASCO/CAP HER2 Testing Guideline. Due to the unique nature of these human, donor-based materials, the shipping date is subject to change. If this should occur, the CAP will provide notification prior to the originally scheduled shipping date.

Gastric HER2 GHER2

Analyte	Program Code	Challenges per Shipment
	GHER2	
HER2	▮	10

Program Information
- One 10-core tissue microarray slide
- Two shipments per year

Additional Information

The interpretive criteria for HER2 immunohistochemistry performed on gastroesophageal adenocarcinomas differs significantly from breast carcinoma. The GHER2 program will help participating laboratories understand these differences.

ER/PgR Immunohistochemistry Tissue Microarray PM2

Analyte	Program Code	Challenges per Shipment
	PM2	
Estrogen receptor (ER)	▮	20
Progesterone receptor (PgR)	▮	20

Program Information
- Four 10-core microarray slides, two for ER and two for PgR
- Two shipments per year

Additional Information

The PM2 program fulfills the proficiency testing requirement stated in the ASCO/CAP ER/PgR Testing Guideline. Due to the unique nature of these human, donor-based materials, the shipping date is subject to change. If this should occur, the CAP will provide notification prior to the originally scheduled shipping date.

These general immunohistochemistry Surveys assess analytic and postanalytic (interpretive) steps. For Surveys focusing on preanalytic steps, see the HistoQIP IHC programs on pages 272-276.

CAP/ACMG *HER2* Gene Amplification by FISH, Interpretation Only CYHI

NEW

Analyte/Procedure	Program Code	Challenges per Shipment
	CYHI	
HER2 gene amplification in breast cancer, interpretation only	▮	3

Additional Information

- *HER2* Gene Amplification by FISH, Interpretation Only, is an exercise and is not considered proficiency testing. This exercise may be used to meet the requirements for alternative assessment.
- This program is for laboratories that perform interpretation only for HER2 FISH for breast cancer.
- For laboratories that perform both hybridization and interpretation for HER2 FISH for breast cancer under the same CLIA number, see page 243.

Program Information

- Three online, educational interpretation dry challenges; your CAP shipping contact will be notified via email when the activity is available
- Two shipments per year

ACMG
American College of Medical Genetics and Genomics
Translating Genes into Health®

Specialty Anatomic Pathology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Autopsy Pathology AUP/AUP1

Procedure	Program Code	Challenges per Shipment
	AUP/AUP1	
Autopsy online case analysis	▮	5

Each case includes case description, gross and/or microscopic images, and case discussion with sample death certificate, key teaching points, and current references.

Program Information

- AUP - Online activity providing five cases; reporting with CME/SAM or CE credit is available for one pathologist or pathologists' assistant; for each additional pathologist/pathologists' assistant order AUP1
- Includes the option to download program content
- AUP1 - Reporting option with CME/SAM or CE credit for each additional pathologist or pathologists' assistant (within the same institution); must order in conjuction with Survey AUP
- Earn a maximum of 12.5 CME/SAM credits *(AMA PRA Category 1 Credits™)* per pathologist and a maximum of 12.5 CE credits per pathologists' assistant for completion of entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Two online activities per year

Neuropathology Program NP/NP1

Program	Program Code	Challenges per Shipment
	NP/NP1	
Neuropathology online case review	▮	8

Additional Information

The Neuropathology program helps anatomic pathologists, neuropathologists, and trainees assess and improve their diagnostic skills and learn about new developments in neuropathology. Each shipment of this educational program includes eight cases that cover the spectrum of neoplastic and nonneoplastic disorders affecting the central and peripheral nervous systems, including infectious, degenerative, developmental, demyelinating, traumatic, toxic-metabolic, vascular, and neuromuscular diseases. In addition, each mailing will include a mini-symposium that focuses on a specific problem area in neuropathology, which relates to at least four of the eight cases.

Program Information

- NP - Online activity providing eight cases and a mini-symposium; reporting with CME/SAM credit is available for one pathologist; for each additional pathologist, order NP1
- Includes option to download program content
- NP1 - Reporting option with CME/SAM credit for each additional pathologist (within the same institution); must order in conjunction with Survey NP
- Earn a maximum of 10 CME/SAM credits *(AMA PRA Category 1 Credits™)* per pathologist
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Powered by DigitalScope technology
- Two online activities per year

Cytopathology

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Glass Slide Gynecologic Cytopathology PT Program with Glass Slide PAP Education PAP PT

Slide Type	Program Code					Challenges per Year	
	PAPCPT	PAPKPT	PAPMPT	PAPLPT	PAPJPT	Proficiency Testing	Education
Conventional	▮				▮	10	10
SurePath		▮		▮	▮		
ThinPrep			▮	▮	▮		
Individual Participant Response Form	APAPCPT	APAPKPT	APAPMPT	APAPLPT	APAPJPT		

Ordering Information

You will receive one shipment for proficiency testing (10 slides) and two additional shipments for your education (five slides each).

Follow these steps to order your PAP Proficiency Testing and PAP Education:

1. Choose the following:
   a. Slide Type program code (refer to table above)
   b. PAP Education series shipment dates (choose one)
      - Series 1
        - A mailing ships February
        - B mailing ships August
      - Series 2
        - A mailing ships May
        - B mailing ships November
   c. Add the PAP Education series number after the slide type program code (eg, PAPCPT1, PAPCPT2).
2. Order one Individual Participant Response Form code for each participating pathologist/cytotechnologist. Also include the PAP Education Series number after the program code (eg, APAPCPT1).
3. Select primary testing session option with two alternative date options using the Gynecologic Cytology Proficiency Testing Order Details Form.
4. Order PPTENR only if you are a laboratory possessing a CLIA license to perform gynecologic cytology where all personnel are performing proficiency testing at another CLIA location.

Additional Information

- Participants can receive laboratory reference interpretations and performance for the PAP Education slides within 20 minutes by fax.
- The PAP Education component meets the CAP Laboratory Accreditation Program requirement for participation in a peer educational program.

Program Information

- Ten glass slides for proficiency testing and ten glass slides for education
- APAPCPT/APAPKPT/APAPMPT/APAPLPT/APAPJPT - Reporting option with CME/CE credit for each pathologist/cytotechnologist (within the same institution); must order in conjunction with Survey PAPCPT/PAPKPT/PAPMPT/PAPLPT/PAPJPT
- Earn a maximum of 8 CME credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 8 CE credits per cytotechnologist for completing all challenges
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Three shipments per year; one shipment for proficiency testing (10 slides) and two shipments for education (five slides each)

CME CE credit

Cytopathology Glass Slide Education Program PAPCE, PAPJE, PAPKE, PAPLE, PAPME Series 1 or 2

ThinPrep			▮	▮	▮	
Individual Participant Response Form	APAPCE	APAPKE	APAPME	APAPLE	APAPJE	

Ordering Information

Follow these steps to order your PAP Education:

1. Choose the following:
   a. Slide Type program code (refer to table above)
   b. PAP Education series shipment dates (choose one)
      - Series 1
        - o A mailing ships February
        - o B mailing ships August
      - Series 2
        - o A mailing ships May
        - o B mailing ships November
   c. Add the PAP Education series number after the slide type program code (eg, PAPCE1, PAPCE2)
2. Order one Individual Participant Response Form code for each participating pathologist/cytotechnologist. Also include the PAP Education series number after the program code (eg, APAPCE1).

Additional Information

- Participants can receive laboratory reference interpretations and performance for the PAP Education slides within 20 minutes by fax.
- The PAP Education component meets the CAP Laboratory Accreditation Program requirement for participation in a peer educational program.

Program Information

- Ten glass slides for education
- APAPCE/APAPJE/APAPKE/APAPLE/APAPME - Reporting option with CME/CE credit for each pathologist/cytotechnologist (within the same institution); must order in conjunction with Survey PAPCE/PAPJE/PAPKE/PAPLE/PAPME
- Earn a maximum of 8 CME credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 8 CE credits per cytotechnologist for completing all challenges
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Two shipments (five slides each)

CME CE credit

Human Papillomavirus (High Risk) for Cytopathology CHPVD, CHPVM, CHPVK, CHPVJ

Analyte/Procedure	Program Code				Challenges per Shipment
	CHPVD	CHPVM	CHPVK	CHPVJ	
HPV	▮	▮	▮	▮	5
High-risk HPV genotyping (optional)		▮		▮	5

Additional Information

- Each laboratory should choose the Survey that best reflects the transport media received in its facility. For Survey CHPVJ, participants must provide results for all three media types. If your laboratory receives two types of media, order the Survey that is most appropriate for your specific laboratory (CHPVD, CHPVM, or CHPVK).
- For laboratories that perform HPV genotyping using ThinPrep PreservCyt Transport medium on site, Survey CHPVM and select samples of Survey CHPVJ provide an opportunity to report specific HPV genotypes.
- The CAP does not report genotyping responses to the CMS.

Program Information

- Five simulated cervical specimens
- CHPVD - Digene® Specimen Transport Medium™ (STM)
- CHPVM - ThinPrep PreservCyt® Transport Medium
- CHPVK - SurePath Preservative Fluid Transport Medium and corresponding vial of diluent
- CHPVJ - Combination of Digene, ThinPrep PreservCyt, and SurePath transport mediums
- Three shipments per year

Touch Imprint/Crush Preparation TICP/TICP1

Procedure	Program Code	Challenges per Shipment
	TICP/TICP1	
Online slide and image program in rapid assessment case review	▮	4

Additional Information

- The TICP Program is designed to familiarize surgical pathologists, cytopathologists, and cytotechnologists with the cytomorphologic features of pathologic processes and tumors in touch imprints and crush or scrape preparations. These specimens are prepared either for intraoperative consultation (frozen section) or rapid on-site evaluation (ROSE) of tissue biopsies for adequacy and/or interpretation. Participants will learn to make an immediate adequacy assessment, assign the process to a general category, and triage the specimen to appropriate ancillary studies. Participants will review digital whole slides of the TICP preparations (hematoxylin & eosin, modified Wright-Giemsa, and/or Papanicolaou stains), static images of the preparation and ancillary studies, and clinical history/radiographic findings to reach a diagnosis. Each case has a complete description of entities in the differential diagnosis along with a discussion of the correct interpretation.
- Participants will receive immediate feedback on interpretations, ancillary studies, and case-related adequate assessment.
- The cases will be comprised of specimens from gastrointestinal and miscellaneous topics.
- May include rarely captured cases that may not be available on the glass slide.
- See system requirements on page 13.

Program Information

- TICP - Four online assessment challenges with clinical history; TICP provides CME/SAM/CE credit for one pathologist or cytotechnologist; for each additional pathologist or cytotechnologist, order TICP1
- TICP1 - Reporting option with CME/SAM/CE credit for each additional pathologist/ cytotechnologist (within the same institution); must order in conjunction with Survey TICP
- Earn a maximum of 10 CME/SAM credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 10 CE credits per cytotechnologist for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Online, whole slide images powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

Nongynecologic Cytopathology Education Program NGC/NGC1

Procedure	Program Code	Challenges per Shipment
	NGC/NGC1	
Nongynecologic cytopathology case review – glass slides	▮	5
Nongynecologic cytopathology case review – online	▮	5 per year

Additional Information

- The Nongynecologic Cytopathology Education (NGC) program is an interlaboratory educational opportunity to assess participants' screening and interpretive skills. The NGC program is unsuitable for proficiency testing as these cases are chosen for their educational value. Cases may incorporate static online images that incorporate radiology and multiple aspects of pathology to enhance the interpretation.
- Participants can access laboratory reference interpretations and performance for the glass slides within 20 minutes by fax, providing rapid educational feedback, peer comparison, and additional review time.
- Additional online advanced education cases provide immediate feedback on interpretation selection, follow-up recommendations, and case-related educational questions.
- See system requirements on page 13.

Program Information

- NGC - Five glass slides; five online advanced education cases; one laboratory response form and two individual response forms
- NGC1 - Reporting option with CME/CE credit for each additional pathologist/ cytotechnologist (within the same institution); must order in conjunction with Survey NGC
- Earn a maximum of 25 CME credits *(AMA PRA Category 1 Credits™)* per pathologist and a maximum of 25 CE credits per cytotechnologist for completing the glass slides and online cases
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Online, whole slide images powered by DigitalScope technology
- Four shipments per year

CME CE credit

Have you created or updated your own CAP Profile?

Each laboratory staff member should have their own profile. Your profile is transferable when you leave your current position. Use it to maintain information about yourself, including:

- Business affiliations
- Certifications
- Contact preferences
- Inspector-related information
- Personal contact information
- Specialties and skills
- Addresses

To create or update your profile, visit cap.org, log in, and click on UPDATE MY PROFILE.

Digital Slide Program in Fine-Needle Aspiration FNA/FNA1

Procedure	Program Code	Challenges per Shipment
	FNA/FNA1	
Online program in fine-needle aspiration case review	▮	5

Additional Information

- This program focuses on FNA diagnostic dilemmas in practice. Online cases, which consist of whole slide images and static images, provide immediate feedback on interpretation selection, ancillary studies selection, and case-related educational questions.
- Cases will focus on FNA of unusual variants of common tumors and EBUS/EUS topics.
- May include rarely captured cases that may not be available on the glass slide.
- See system requirements on page 13.

Program Information

- FNA - Five online diagnostic challenges; FNA provides CME/CE credit for one pathologist or cytotechnologist; for each additional pathologist or cytotechnologist, order FNA1
- FNA1 - Reporting option with CME/CE credit for each additional pathologist/ cytotechnologist (within the same institution); must order in conjuction with Survey FNA
- Earn a maximum of 10 CME credits *(AMA PRA Category 1 Credits™)* per pathologist and a maximum of 10 CE credits per cytotechnologist
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Online, whole slide images powered by DigitalScope technology
- Two online activities per year; your CAP shipping contact will be notified via email when the activity is available

CME CE credit

Fine-Needle Aspiration Glass Slide FNAG/FNAG1

Procedure	Program Code	Challenges per Shipment
	FNAG/FNAG1	
Fine-needle aspiration glass slide case review	▮	5

Additional Information

- The Fine-Needle Aspiration Glass Slide Education program is an interlaboratory educational opportunity to assess participants' screening and interpretive skills. FNAG cases may include more than one slide of varying stains and/or preparations used on fine-needle aspirations.
- Cases may include static online images that incorporate radiology and multiple aspects of pathology to support the interpretation.
- Participants can access laboratory reference interpretations and performance for the glass slides within 20 minutes by fax, providing rapid educational feedback, peer comparison, and additional review time.

Program Information

- FNAG - Five cases consisting of glass slides and selected online images, representing a variety of conditions; one laboratory response form and two individual response forms
- FNAG1 - Reporting option with CME/CE credit for each additional pathologist/cytotechnologist (within the same institution); must order in conjunction with Survey FNAG
- Earn a maximum of 10 CME credits *(AMA PRA Category 1 Credits™)* per pathologist and a maximum of 10 CE credits per cytotechnologist
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Two shipments per year

CME CE credit

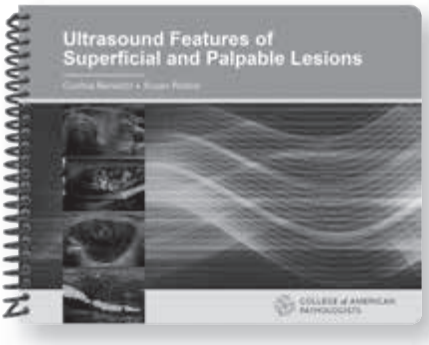
Ultrasound Features of Superficial and Palpable Lesions (PUB128)

This ruggedly constructed guide is the ideal reference tool for clinicians to use while performing ultrasound-guided fine-needle aspiration (USFNA). Compact and easy-to-follow, it includes hundreds of comparative images and concise descriptions covering normal anatomy and abnormalities of superficial body sites. Helpful clinical hints are offered throughout the book.

Add Ultrasound Features of Superficial and Palpable Lesions (PUB128) to your order.

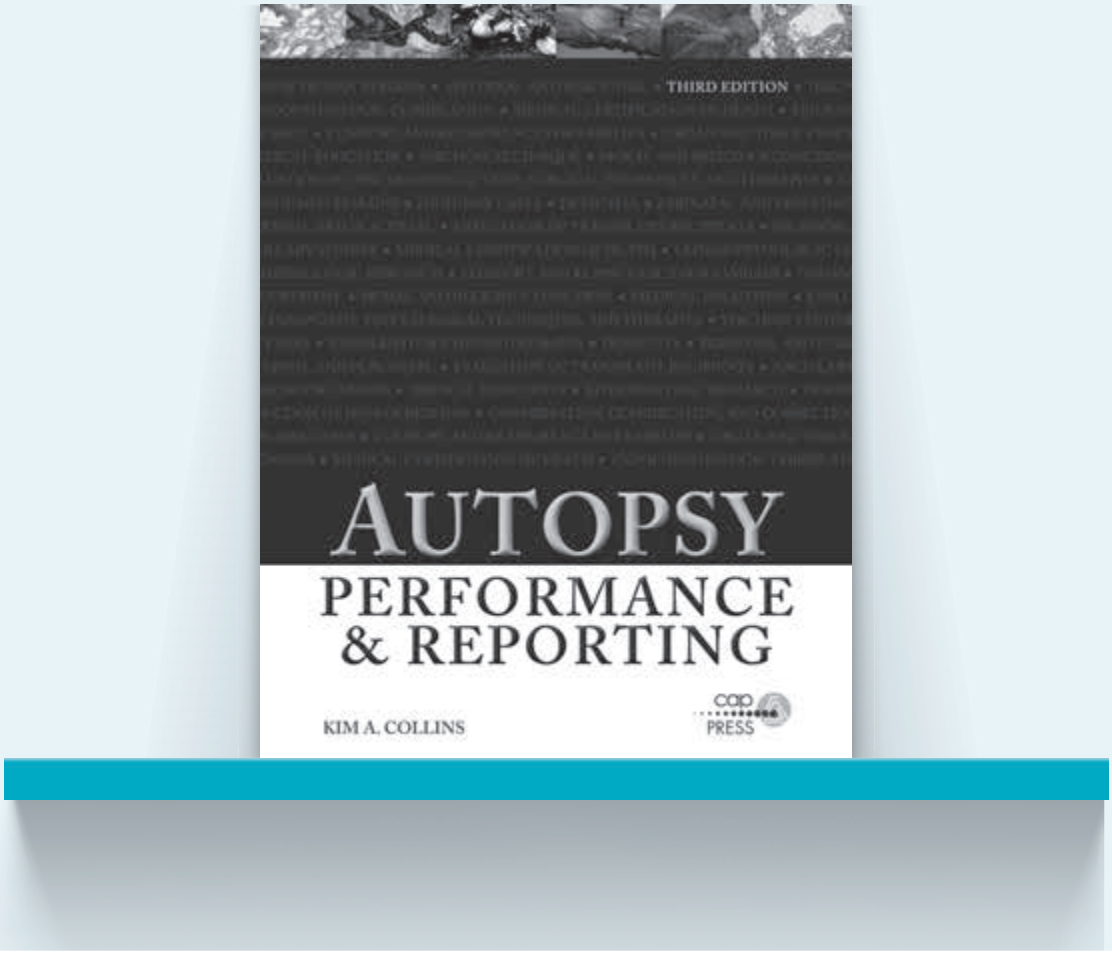
Or, view sample pages and purchase online:

- printed books at estore.cap.org



Item number: PUB128
Spiral bound; 200 pages; 375 images and illustrations; 2018

Take a modern approach to autopsy pathology.



With more than 1,000 high-quality color images, the third edition of *Autopsy Performance & Reporting* includes:

- Numerous tables and checklists for fast, thorough reference
- Role of new technology, including molecular pathology, ancillary laboratory studies, and 3-D radiography
- Detailed autopsy procedures for specific organ systems and patient populations
- Guidelines for autopsy reporting and quality assurance

Autopsy Performance & Reporting

Item number: **PUB126**

Hardcover; 472 pages; 1,000+ color images and tables; 2017

VIEW SAMPLE PAGES AND ORDER ONLINE.

21 Forensic Sciences

We live our mission of quality.

- More than 8,000 CAP-accredited laboratories
- Approximately 4,000 CAP inspections annually
- More than 22,500 laboratory sites using CAP proficiency testing

Forensic Sciences

Analytes/procedures in **bold** type are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Forensic Pathology FR/FR1

Procedure	Program Code	Challenges per Shipment
	FR/FR1	
Forensic pathology cases	▮	5

Additional Information

- Cases may include or reflect anthropologic materials, ballistics, dental identification, DNA identification, environmental pathology, forensic evidence, injury pattern, medicolegal issues, toxicology, and trace evidence.
- FR/FR1 is for hospital-based pathologists, forensic pathologists, residents, fellows, and medical examiners/coroners. This educational program is also designed for investigators, analysts, and technicians/technologists.

Program Information

- FR - Online activity containing five case studies illustrating gross and/or microscopic slides and questions related to medicolegal decision making; CME/SAM or CE credit is available for one pathologist or investigator. For each additional pathologist/investigator, order FR1
- FR1 - Additional pathologist or investigator (within the same institution) reporting option with CME/SAM or CE credit; must order in conjunction with Survey FR
- Includes option to download program content
- Earn a maximum of 12.5 CME/SAM credits (*AMA PRA Category 1 Credits™*) per pathologist and a maximum of 12.5 CE credits per investigator for completion of an entire year
- This activity meets the ABP CC Part IV Practice Performance Assessment requirements
- Two online activities per year

Vitreous Fluid, Postmortem VF		
Analyte	**Program Code**	**Challenges per Shipment**
	VF	
Acetone	▮	3
Chloride	▮	3
Creatinine	▮	3
Ethanol	▮	3
Glucose	▮	3
Potassium	▮	3
Sodium	▮	3
Vitreous urea nitrogen	▮	3

Program Information

- Three 5.0-mL synthetic vitreous fluid specimens
- For forensic and other toxicology laboratories that perform quantitative analysis of vitreous fluid
- Conventional and International System of Units (SI) reporting offered
- Two shipments per year

Clinical Toxicology Testing: A Guide for Laboratory Professionals, Second Edition (PUB227)

This book is a practical guide, written for pathologists, to directing hospital toxicology laboratory operations. This new edition features expanded sections on testing in the clinical setting, methodologies, and more user-friendly information on specific analytes. It provides the reader with a comprehensive view of what is needed—and expected—when offering a clinical toxicology service.

Contents include:

- Toxicology testing in the clinical setting, including new chapters on pediatric testing and chronic opioid therapy
- Toxicokinetics and methodologies, with new and expanded information on laboratory-developed tests, screening assays, targeted tests, and oral fluids and alternative matrices
- Specific analytes, including novel psychoactive substances and the use of medical cannabis
- Appendices on such useful topics as urine and serum screens, therapeutic drug monitoring, and proficiency testing

Add it to your order.

Or, view sample pages and purchase online:

- printed books at estore.cap.org

Forensic Toxicology, Criminalistics FTC

Analyte	Program Code	Challenges per Shipment
	FTC	
See drug listing below	▮	4

The American Society of Crime Laboratory Directors/Laboratory Accreditation Board Proficiency Review Committee (ASCLD/LAB PRC) has approved Survey FTC.

Program Information

- Three 20.0-mL whole blood specimens and one 20.0-mL synthetic urine specimen
- For crime and hospital laboratories that have forensic toxicology divisions performing qualitative and quantitative analysis of drugs in whole blood specimens along with a urine qualitative challenge
- Two shipments per year

CE credit

FTC Program Drug Listing

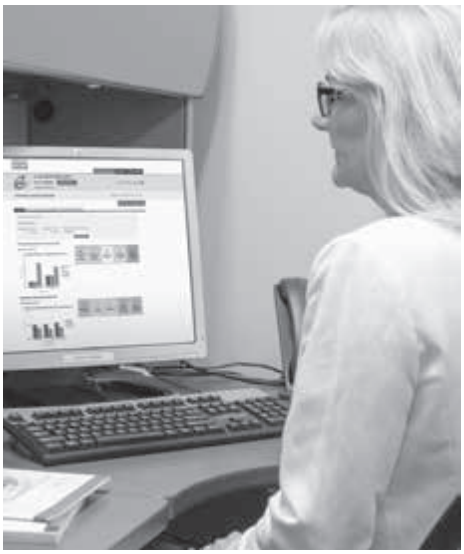
Challenges will include a mix of drugs from the list below.

6-acetylmorphine (6-AM)
7-aminoclonazepam
7-aminoflunitrazepam
Acetaminophen
Alpha-hydroxyalprazolam
Alprazolam
Amitriptyline
Amphetamine
Benzoylecgonine
Brompheniramine
Butalbital
Carisoprodol
Chlorpheniramine
Clonazepam
Cocaethylene
Cocaine
Codeine
Cyclobenzaprine*
Delta-9-THC
Delta-9-THC-COOH
Desipramine
Desmethylcyclobenzaprine
Dextromethorphan
Diazepam
Diphenhydramine
Doxepin
Ecgonine ethyl ester
Ecgonine methyl ester
Ephedrine
Fentanyl*
Fluoxetine
Flurazepam*
Gamma-hydroxybutyrate (GHB)
Hydrocodone
Hydromorphone
Imipramine
Ketamine
Lorazepam
Lysergic acid diethylamide (LSD)
Meperidine*
Meprobamate
Methadone
Methadone metabolite (EDDP)
Methamphetamine
Methylenedioxyamphetamine (MDA)
Methylenedioxymethamphetamine (MDMA)
Morphine*
N-desmethyltramadol
Nordiazepam
Nordoxepin
Norfentanyl
Norfluoxetine
Norketamine
Norpropoxyphene
Norsertraline
Nortriptyline
Oxazepam
Oxycodone
Oxymorphone
Paroxetine
Phencyclidine
Phenethylamine
Phenobarbital
Phentermine
Phenytoin
Propoxyphene
Pseudoephedrine
Salicylate
Secobarbital
Sertraline
Temazepam
Tramadol*
Trazodone
Zolpidem

*and/or metabolite(s)

Refer to Section 9, Toxicology, for a more comprehensive selection of toxicology offerings.

22 Analyte/Procedure Index



Simplify analysis and reporting of PT and accreditation performance using the Performance Analytics Dashboard.

The complimentary dashboard helps you manage your CAP PT and accreditation performance.

- Quickly identify trends to mitigate risk by accessing up to three years or three accreditation cycles of data.
- Benchmark your laboratory against your peers and CAP-wide performance.
- Consolidate multiple CAP numbers to view a single dashboard for an entire system.

Analyte/Procedure Index

The following Analyte/Procedure Index is a comprehensive listing of analytes and corresponding CAP program options.

Analytes/procedures **in bold type** whose corresponding program codes are **bold** are regulated for proficiency testing by the Centers for Medicare & Medicaid Services (CMS).

Laboratories must perform five challenges three times per year (as noted by boldface) for analytes that are regulated by the CMS.

The **X** in the LAP ENR column denotes the CAP programs that can be used to fulfill the proficiency testing enrollment requirements for CAP-accredited laboratories. Refer to program descriptions in this catalog to determine compatibility with your specific methodologies.

Analyte/Procedure	LAP ENR	Program Code	Description	Pg

23 Program Code Page Index

Benefit from the most comprehensive range of scientifically developed programs.

- More than 650 Surveys and anatomic pathology education programs
- 25 new proficiency testing and quality improvement programs in 2019
- 600 experts in laboratory medicine support CAP offerings

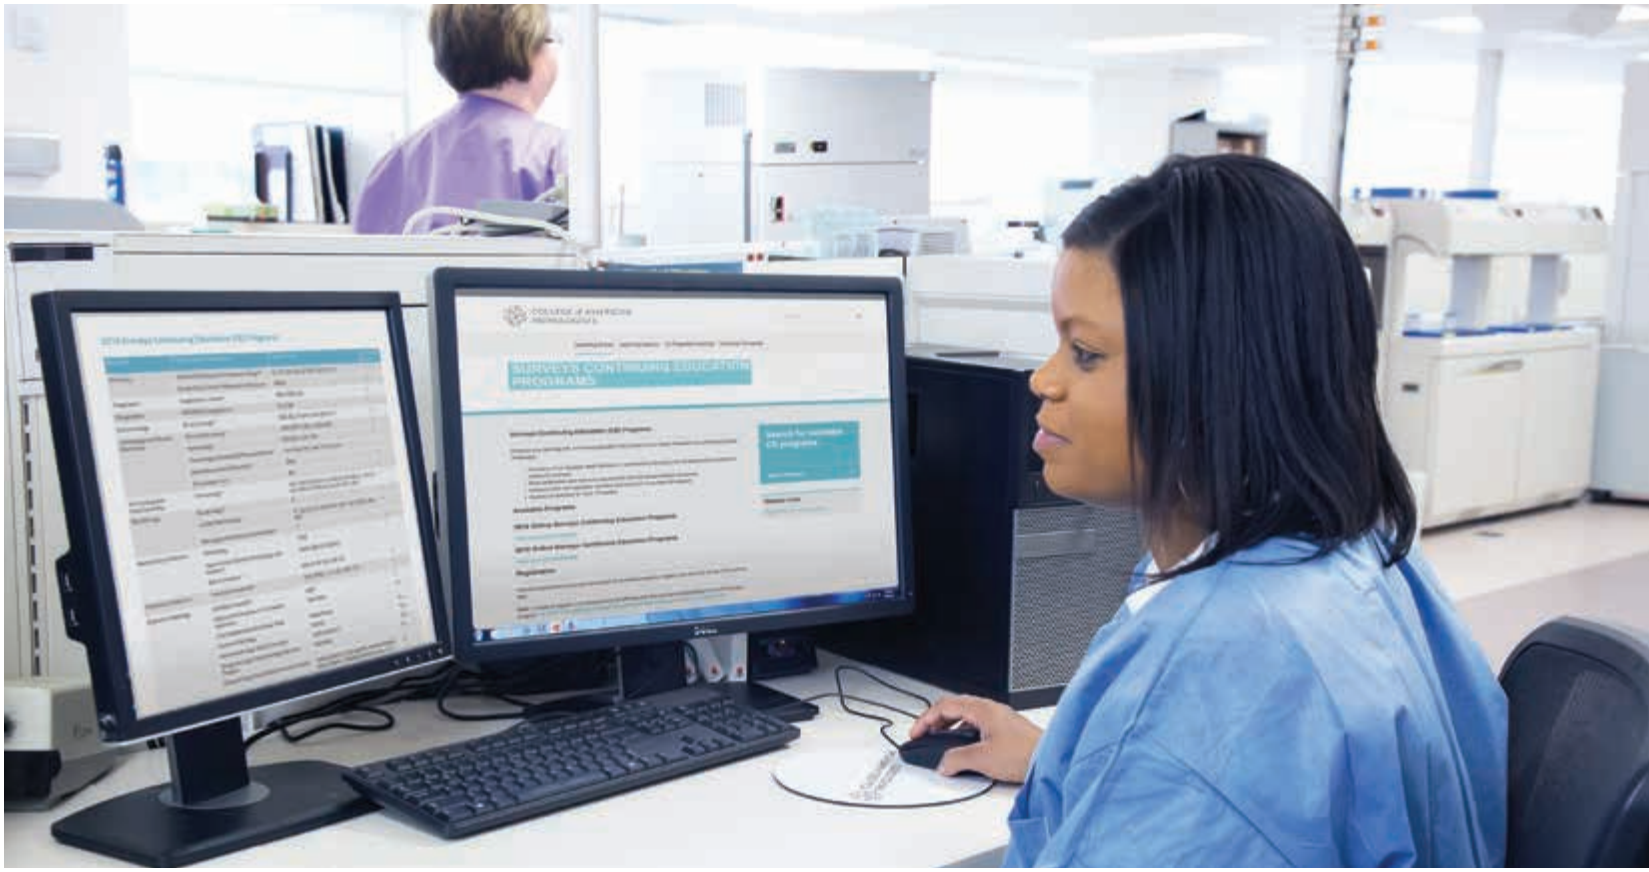
You can offer your staff more than 100 CE credits.



Enhance your learning with continuing education (CE) content that is tightly integrated with proficiency testing challenges.

- For many of our Surveys, each member of a participating laboratory has complimentary enrollment to online CE activities.
- Meet certification and licensure requirements with CE across multiple disciplines.
- Advance skills with education activities developed by more than 600 experts in pathology and laboratory medicine.
- Access CE activities for up to 12 months.

To learn more and see how to access CE, visit cap.org and search Surveys CE.

Laboratory medicine is changing at a rapid pace. Our comprehensive range of programs is constantly evolving to keep you in step with these changes, so you will have more time for what matters most—accuracy in the laboratory.

- Choose from more than 650 programs—see pages 4-6 for our full listing of new programs.
- Offer your staff up to 100 CE credits with CAP Surveys.
- Educate staff on testing trends and best practices with our Participant Summary Reports' extensive discussions.
- Purchase your programs and manage your account online—you can review, modify, and submit your prepopulated quote.

From routine to esoteric, our programs help you deliver performance you can measure and accuracy you can trust.
