NOTES: This is the first year CAP 28 and 32 has received a benchmark for the 2020 performance year. CMS does not retain newly established benchmarks for the subsequent performance year. However, if 20 reporting entities submit data on these measures again in 2021, then the measures will be worth a maximum 10 points. Once there are two years' worth of historical data, CMS will establish a standard benchmark that will remain from year to year.
