Surveys Program Shipping

Gain more value from your accreditation program.

CAP accreditation is more than "something to check off your list." It is an opportunity to help keep your laboratory operating at peak performance.

- The CAP offers educational material and support, including highly-trained medical technologists who are available to answer questions.
- The peer inspection model helps participants develop meaningful connections, learn from each other, and share best practices.

Competency Assessment Hub and Safety & Compliance Program

The license for your laboratory or network for Competency Assessment Hub is based on the number of individuals who will be using Competency Assessment Hub—that is, the number of people for whom you will be assessing competency, not the number of employees. The Safety & Compliance course package is an addition to your Competency Assessment Hub order. The same employees enrolled in Competency Assessment Hub will have access to Safety & Compliance courses if the additional fee is paid.

Refer to pages 16–18 of the Surveys catalog for program information.
