

Acute Leukemia Diagnostic Journey

Based on the CAP/ASH Guideline

Patient History

Make sure your doctor has your complete medical history.

Blood Tests

These determine whether bone marrow aspiration or biopsy is necessary.

If you or your doctor thinks you may be referred to another center for treatment, wait to have the bone marrow testing at that center to avoid duplicate testing, if possible.

Diagnostic Categorization

Test results will determine your specific type of leukemia.

ACUTE **MYELOID**

MIXED

Molecular Tests

Using the CAP/ASH guideline, your pathologist and hemo-oncologist will determine which tests to perform.

Treatment

Now your care team can personalize a treatment plan that is right for you.
