

NEW PUBLICATION: Laboratory Workup of Amyloidosis

The "[Laboratory Workup of Amyloidosis](#)" was published on November 24, 2025, as an early online release in *Archives of Pathology & Laboratory Medicine (Archives)*.

The guideline aims to support earlier and more accurate diagnosis of amyloidosis. A multi-disciplinary panel of experts was convened by the CAP reviewed more than 4,000 studies to develop evidence-based recommendations on appropriate testing for amyloidosis and the proper evaluation of amyloid positive specimens.

Using the Grading of Recommendations Assessment, Development and Evaluation (GRADE) framework, four conditional recommendations and three good practice statements were established to provide guidance for proper testing and workup of amyloidosis.

The guideline includes various tools, such as an algorithm, case studies, and a podcast available on the [guideline webpage on cap.org](#).

Guideline presentation available on CAP On Demand

A recording of the CAP25 meeting presentation on the Laboratory Workup of Amyloidosis: "Not to be Missed" Evidence-based Guideline for Amyloidosis Detection and Typing is now available on [CAP On Demand](#).

Center Mission

The CAP Pathology and Laboratory Quality Center for Evidence-based Guidelines (the Center), along with our professional partners, is advancing the specialty of pathology and laboratory medicine by bringing evidence-based medicine to the forefront of clinical decision making.

The Center helps pathologists and other clinicians make more informed decisions about diagnosis and optimal treatment, and places emphasis on the pathologist's role on the patient care team.

Advance the Specialty

Prepare pathologists for future roles

Strengthen the practice of pathology

UPCOMING MILESTONES:

- The following guidelines are expected to be submitted for publication in Q1 2026
 - “Interpretive Diagnostic Error Reduction Guideline Update”
 - “HER2 Testing and Clinical Decision Making in Gastroesophageal Adenocarcinoma Guideline Update”
 - “Gastroenteropancreatic Neuroendocrine Tumors (GEP-NETs) and Ki-67”
 - “Molecular Testing Guideline for the Selection of Lung Cancer Patients for Treatment with TKI”

Guideline	Project Phase
Molecular Testing Guideline for the Selection of Lung Cancer Patients for Treatment with TKI (Updating 2018 publication)	Complete Recommendations and Draft Manuscript
Interpretive Diagnostic Error Reduction: Guideline Update (Updating 2015 publication)	Review and Approve
Lower Anogenital Squamous Terminology for HPV-associated Lesions (Updating 2012 publication)	Complete Recommendations and Draft Manuscript
Gastroenteropancreatic Neuroendocrine Tumors (GEP-NETs) and Ki-67	Complete Recommendations and Draft Manuscript
Evaluation of Measurable Residual Disease in B-Lymphoblastic Leukemia	Complete Recommendations and Draft Manuscript
HER2 Testing and Clinical Decision Making in Gastroesophageal Adenocarcinoma: Guideline Update (Updating 2016 publication)	Review and Approve
Initial Diagnostic Workup of Acute Leukemia (Updating 2017 publication)	Research and Review
Reevaluating the Role of Race in Prenatal Serum Screening Calculations	Research and Review
Molecular Biomarkers for the Evaluation of Colorectal Carcinoma: Guideline Update (Updating 2017 publication)	Determine Scope

SUBMIT A TOPIC

Pathologists and members of the medical team can [submit a topic](#) for the Center to consider.

CAP Center Guideline Committee

Chair

Mary Kay Washington, MD, PhD, FCAP, Chair

Members

Rahul Madhukar Jawale, MD, FCAP, Vice Chair
 Guoli Chen, MD, PhD, FCAP

Did you know?

The Center recently obtained a grant from the Council of Medical Specialty Societies (CMMS) to address the use of race in clinical algorithms for biochemical prenatal serum screening. Findings from this work will be presented in 2026.
