WHY DO YOU WANT TO BE PRESIDENT-ELECT OF THE CAP?

I ask for your vote for President-Elect of the College of American Pathologists for the same reason I asked for your vote twice before as candidate for Governor—if you, the Fellows of the CAP, again choose to allow me to do so—it would be an honor to serve the CAP and our Profession with my education, understanding, and experience. As I did while serving as Governor, I would continue to engage in team decision-making, consensus building, and transparency, both with CAP Fellows and other members, as well as with CAP staff.

WHAT MAJOR ISSUES DO YOU SEE FACING THE CAP DURING THE NEXT THREE YEARS?

Opportunities for the CAP and our profession will be numerous in the next few years, including addressing the changes being brought about by digital/artificial intelligence, and the merger and acquisition of hospitals and other health care institutions. The most important issue will remain our challenge of being paid appropriately for the vital services we provide our patients. As pressures mount from seemingly every direction to cut costs and save money, laboratory services, including payment for clinical pathologists' patient care services, and anatomic pathology payment will undoubtedly require constant, close attention and nuanced advocacy.

IF ELECTED, WHAT DO YOU HOPE TO ACCOMPLISH?

There are, among many important issues, two that I believe should be pursued with vigor. I would strive diligently to build and strengthen collegial bridges with other medical societies, both pathology and non-pathology societies, for the betterment of each society, and with the expectation that these closer relationships bolster the CAP and benefit its Fellows. Also, as the international involvement of the CAP is increasingly important, I would seek ways to further international relationships to foster improved care for our patient beyond our borders.
