### Definitions

| **Personal Account** | This is your personal online account and is required for anyone logging on to cap.org and ELSS. All laboratory staff with responsibilities that include performing Proficiency Testing/External Quality Assessment (PT/EQA) data entry and review of results will need to have a CAP personal account.  

*Note:* Your account remains accessible, even if you move to another laboratory. |

How to Navigate e-LAB Solutions Suite (ELSS)

**Site Administrator**

Using ELSS keeps your laboratory’s data secure by allowing laboratories control of who sees their laboratory’s data and information.

The *Site Administrator(s)* is the “gatekeeper” for the laboratory’s data and information. This person(s) controls which laboratory staff can access specific data and information by assigning permissions.

---

**Laboratory Site Administrator**

1. **Provisional Access Granted to Medical Director and Ship To Contact**
2. **Create Individual Web Account/Activate Account Access**
3. **Grant Access to Laboratory Staff**

---

**Laboratory Personnel**

1. **Create Individual Web Account**
2. **Request Access to Laboratory**
3. **Approval Granted by Site Administrator**
**Setup and Proficiency Testing (PT) Steps**

**Step 1: Create Your CAP Personal Account**

All site administrators and laboratory staff must complete the following:

1. Go to cap.org.
2. Click **Login** in the upper-right corner of the page. Click on **CREATE AN ACCOUNT** and complete the required fields.
3. You will see a confirmation message and the CAP will email you within 24 hours when your account has been activated.

**Step 2: Activate Access to Your CAP Laboratory Account to Access Your Laboratory Data Online through ELSS**

*This step is for site administrators only and performed only once.*

Once an initial PT order is placed, the CAP will provisionally grant site administrator permissions to the medical director and the ship to contact. These individuals will receive an email containing a link to activate their access. If the medical director and/or ship to contact are responsible for more than one laboratory, those individuals will receive provisional access for each laboratory. The site administrators must activate their access for each laboratory.

If you did not receive the provisional access email, contact the Customer Contact Center at 800-323-4040 option 1 (domestic), or +001-847-832-7000 (Country code: 1) Option 1, or by email at contactcenter@cap.org.

**Step 3: Grant or Request Online Permissions to Laboratory Staff**

**Site Administrators**

Site administrators grant individuals access to use specific areas in ELSS including result form data entry, viewing reports, accreditation, etc. The site administrator will only be able to grant access to individuals who have requested access.

Site administrators can do the following:

- **Give individual users access** to your laboratory’s ELSS account.
- **Approve/decline user requests** to access your laboratory’s CAP programs online.
- **Add or remove user permissions** to view, enter, manage, or approve data for all programs.

**Laboratory Staff**

To request access to view PT/EQA reports, enter PT/EQA data, view evaluation reports:

- Follow **the steps to request access**.
- **View current permission status and/or request additional permissions**.
Step 4: Receive Your CAP PT/EQA Shipments and Perform Testing

- View, download, and print your laboratory’s My PT Shipping Calendar.
- Perform testing as soon as the kit materials are received. Access the online kit instructions and result form.

How to Navigate e-LAB Solutions Suite (ELSS)

Go to cap.org, click Access e-LAB Solutions Suite, and log in. Refer to How to Navigate e-LAB Solutions Suite in the HELP menu for more detailed information. The following image shows the ELSS home page.
Step 5: Enter CAP PT/EQA Results Online

Follow the steps to enter PT results in the online result form. You must submit results online. The CAP will not accept emailed, faxed, or mailed results. If needed, click on “View/Print/Download All Pages” to print the result form. Note: Direct transmission provides faster and more accurate PT result reporting by enabling laboratories to electronically transmit quantitative results. For more information, refer to the Proficiency Testing page at cap.org.
Step 6: Access and Analyze Your Proficiency Testing/EQA Results

A. **Access Your Evaluation** to assess how your laboratory performed compared to other laboratories. Refer to the PT Manual for additional information.

B. **Review your Participant Summary (PS) to see lists of results by peer group and compare data against your evaluation report.** Your PS can be found in the Evaluation Reports section mentioned above.

C. **Access Your Analyte Scorecard:**
   - This report allows you to see the performance of every analyte under a given subspecialty for your laboratory, and:
     - Includes up to five years of data and can be used as a means of identifying deficiencies or trends in performance.
     - Is a valuable tool to conduct root cause analysis, because it allows you to drill down at very granular levels.
     - For example, if you are reviewing tests with visual challenges as urine sediments, blood cell identification, parasite identification, etc, you can see the specific images on one screen.
# Online Help

To access our comprehensive help menu, go to cap.org, click **Access e-LAB Solutions Suite**, located in the top right of the page, and log in.

Click **HELP**, located above the LAB SELECTOR.

Visit the [proficiency testing web page](#) for additional information on the PT/EQA programs.

Performance Analytics Dashboard

The Performance Analytics Dashboard gives the comprehensive data view you need to proactively focus energy on areas that need immediate attention while filtering out distractions. Updated daily, this web-based reporting solution for your CAP PT/EQA and accreditation performance reduces the stress of managing today’s single laboratory or an expansive network’s performance with only a few clicks.

Highlights

• Perform data analysis to quickly identify trends/patterns to mitigate risk.
• Improve patient care via alerts to prompt action before a cease testing notice is received.
• Benchmark your laboratory against your peers and CAP-wide performance.
• Prepare for accreditation inspections by identifying areas for improvement based on past deficiencies.

Additionally, laboratory networks can:

• Identify systemwide issues by department, discipline, or analyte.
• Benchmark the performance of an individual laboratory against the overall system performance.
• Manage access to your data more efficiently with the ability to customize reporting groups.

Access the Dashboard

Use either of the links shown in the image below to access the dashboard.

Resources

• Get to Know the Performance Analytics Dashboard
• Quick Start Guide for a Single Laboratory
• Quick Start Guide for Laboratory Systems
Additional User Resources

Guides

- View the Hematology and Clinical Microscopy Glossary.
- Investigate any failures using the Investigation Worksheet.
- Implement and document corrective action as referenced in the Troubleshooting Guide.

Contact Us

For assistance, call a CAP Customer Contact Center representative at 800-323-4040 (domestic), or +001-847-832-7000 (Country code: 1) Option 1, or via email at contactcenter@cap.org.

Participants in countries serviced by a designated CAP distributor can also contact their distributor’s customer service department.
