#### WHY DO YOU WANT TO BE PRESIDENT-ELECT OF THE CAP?

I would like to serve the CAP and its members as president-elect because in today's dynamic world of medicine, pathologists must assertively engage with policymakers to best ensure pathologist's payment for the critical patient services we perform.

**WHAT MAJOR ISSUES DO YOU SEE FACING THE CAP DURING THE NEXT THREE YEARS?**

The main issue facing the CAP and its members in the next three years is payment of pathologists' services for our patients. All other issues relate to payment. Significant ones include growing membership, enhancing state and national advocacy, addressing the CAP's international expansion, and resident education in the time of rapid growth in molecular medicine and artificial intelligence.

**IF ELECTED, WHAT DO YOU HOPE TO ACCOMPLISH?**

My hope is to maintain and continue the CAP's good work for pathologists and our patients, even as we traverse the ever-more-complicated regulatory, political, and cost-conscious medical world. Beyond diversity, the CAP must ensure inclusion and an environment welcoming to all. International involvement and expansion, developing education that supports increased levels of graduated resident responsibility, robust medical student teaching and recruitment, and robust but simplified accreditation are also extremely important endeavors.
